

# SC-401 Exam Pass4sure | SC-401 Latest Exam Guide

P.S. Free & New SC-401 dumps are available on Google Drive shared by ExamsTorrent: [https://drive.google.com/open?id=1ZZfvOav-dqvhEBLsQFofgmC\\_uKfinLt](https://drive.google.com/open?id=1ZZfvOav-dqvhEBLsQFofgmC_uKfinLt)

There is no site can compare with ExamsTorrent site's training materials. This is unprecedented true and accurate test materials. To help each candidate to pass the exam, our Microsoft elite team explore the real exam constantly. I can say without hesitation that this is definitely a targeted training material. The ExamsTorrent's website is not only true, but the price of materials are very reasonable. When you choose our SC-401 products, we also provide one year of free updates. This allow you to have more ample time to prepare for the exam. So that you can eliminate your psychological tension of exam, and reach a satisfactory way.

## Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.</li> </ul>

## Numerous Benefits of the Microsoft SC-401 Exam Material

In today's highly developed and toughly competitive society, professional certificates are playing crucial importance for individuals like SC-401. The choices of useful SC-401 study materials have become increasingly various which serve to convey information about the SC-401 Exam. And we have become a famous brand for we have engaged in this career. If you choose our SC-401 practice engine, you will find the shortcut to the success.

### Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q100-Q105):

#### NEW QUESTION # 100

You have a Microsoft 365 E5 subscription that contains four users named User1, User2, User3, and User4 and a file named File1.docx.

To File1, you apply a sensitivity label that has the permissions shown in the following exhibit.

Users and groups		Permissions	Edit	Delete
User1@86s40q.onmicrosoft.com		Co-Owner		
User2@86s40q.onmicrosoft.com		Co-Author		
User3@86s40q.onmicrosoft.com		Reviewer		
User4@86s40q.onmicrosoft.com		Viewer		

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

#### Answer Area

Microsoft 365 Copilot can summarize File1 for [answer choice].

For [answer choice], Microsoft 365 Copilot can reference File1 by using a link.

#### Answer:

Explanation:

#### Answer Area

Microsoft 365 Copilot can summarize File1 for [answer choice].

For [answer choice], Microsoft 365 Copilot can reference File1 by using a link.

Explanation:

#### Answer Area

Microsoft 365 Copilot can summarize File1 for [answer choice].

For [answer choice], Microsoft 365 Copilot can reference File1 by using a link.

#### Step 1 - Summarization in Copilot

For Microsoft 365 Copilot to summarize a file:

The user needs at least View permission.

Summarization does not require editing, copying, or ownership rights.

Looking at the exhibit:

User1 (Co-Owner) # has full access including view.

User2 (Co-Author) # has edit and view.

User3 (Reviewer) # has read-only rights.

User4 (Viewer) # has read rights.

All four users can view the document. Therefore, Copilot can summarize File1 for User1, User2, User3, and User4.

#### Step 2 - Referencing a file by link in Copilot

For Copilot to reference a file by link (i.e., cite or share within generated content):

The user must have rights that include resharing or exporting.

Only the Co-Owner has full rights to manage access and allow referencing by link.

From the exhibit:

User1 (Co-Owner) # Can reference by link.

User2 (Co-Author), User3 (Reviewer), User4 (Viewer) # Do not have reshare or link rights.

So, only User1 can reference File1 by link.

Reference: Sensitivity labels and Microsoft 365 Copilot

#### NEW QUESTION # 101

Hotspot Question

You have a Microsoft 365 E5 subscription.

In Microsoft Exchange Online, you have the mail flow rule shown in the following exhibit.

## Protect with OMEv2

 Edit rule conditions  Edit rule settings

Status: Enabled

### Rule settings

Rule name	Mode
Protect with OMEv2	Enforce
Severity	Set date range
Not Specified	Specific date range is not set
Senders address	Priority
Matching Header	0

### For rule processing errors

Ignore

### Rule description

#### Apply this rule if

*Is sent to 'Outside the organization'  
and includes these words in the message subject '[Encrypt]'*

#### Do the following

*rights protect messages with RMS template: 'Do Not Forward'*

### Rule comments

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the

graphic.

NOTE: Each correct selection is worth one point.

#### Answer Area

Outbound messages with the [Encrypt] string in the **[answer choice]** of the message will be encrypted.

body
email address
header
subject line

The mail flow rule will **[answer choice]**.

allow recipients to copy and paste message content
allow recipients to print the message
restrict recipients from printing the message
restrict recipients from viewing attachments

Answer:

Explanation:

#### Answer Area

Outbound messages with the [Encrypt] string in the **[answer choice]** of the message will be encrypted.

body
email address
header
subject line

The mail flow rule will **[answer choice]**.

allow recipients to copy and paste message content
allow recipients to print the message
restrict recipients from printing the message
restrict recipients from viewing attachments

Explanation:

Box 1: subject line

Box 2: restrict recipients from printing the message

Note: IRM is an encryption solution that also applies usage restrictions to email messages. It helps prevent sensitive information from being printed, forwarded, or copied by unauthorized people.

IRM capabilities in Microsoft 365 use Azure Rights Management (Azure RMS).

## NEW QUESTION # 102

Hotspot Question

You have a Microsoft 365 E5 tenant.

You have sensitivity labels as shown in the Sensitivity Labels exhibit. (Click the Sensitivity Labels tab.)

+ Create a label			Publish labels	Refresh
Name	Order	Scope		
Public	0 – lowest	File, Email		
General	1	File, Email		
Confidential	2	File, Email		
Internal	3	File, Email		
External	4 – highest	File, Email		

The Confidential/External sensitivity label is configured to encrypt files and emails when applied to content.

The sensitivity labels are published as shown in the Published exhibit. (Click the Published tab.)

# Sensitivity Policy1

[Edit policy](#)[Delete policy](#)

## Name

Sensitivity Policy1

## Published labels

Public

General

Confidential

Confidential/External

Confidential/Internal

## Published to

All

## Policy settings

Users must provide justification to remove a label or lower its classification

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

### Answer Area

Statements	Yes	No
The Internal sensitivity label inherits all the settings from the Confidential label.	<input type="radio"/>	<input type="radio"/>
Users must provide justification if they change the label of content from Confidential/Internal to Confidential/External.	<input type="radio"/>	<input type="radio"/>
Content that has the Confidential/External label applied will retain the encryption settings if the sensitivity label is removed from the label policy.	<input type="radio"/>	<input type="radio"/>

### Answer:

Explanation:

## Statements

Yes 

The Internal sensitivity label inherits all the settings from the Confidential label.

No 

Users must provide justification if they change the label of content from Confidential/Internal to Confidential/External.

Content that has the Confidential/External label applied will retain the encryption settings if the sensitivity label is removed from the label policy.

## NEW QUESTION # 103

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1.

You need to deploy a Microsoft Purview insider risk management solution that will generate an alert when users share sensitive information on Site1 with external recipients.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct answer is worth one point.

- A. Create an insider risk policy.
- B. Turn on analytics.
- C. Configure adaptive protection.
- D. Create a data loss prevention (DLP) policy.
- E. Turn on indicators.

**Answer: A,E**

Explanation:

Turning on indicators is required to enable the monitoring of user activities, such as file sharing and access to sensitive data, which are used by insider risk policies to evaluate risk.

Creating an insider risk policy allows you to define risk scenarios, such as data leaks to external users, and trigger alerts when the policy conditions are met, including sensitive info sharing from SharePoint Online (Site1).

Reference:

<https://learn.microsoft.com/en-us/purview/insider-risk-management-settings-policy-indicators>

## NEW QUESTION # 104

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1 and the data loss prevention (DLP) policies shown in the following table.

Name	Priority	Rule
DLP1	0	Rule1
DLP2	1	Rule2
DLP3	2	Rule3
DLP4	3	Rule4

The DLP rules are configured as shown in the following table.

Rule	User notifications	Policy tip	If there's a match for this rule, stop processing additional DLP policies and rules
Rule1	On	Tip 1	Enabled
Rule2	On	Tip 2	Disabled
Rule3	On	Tip 3	Enabled
Rule4	On	Tip 4	Disabled

All the policies are assigned to Site1.

You need to ensure that if a user uploads a document to Site1 that matches all the rules, the user will be shown the Tip 2 policy tip. What should you do?

- A. Change the priority of DLP2 to 3.
- B. Change the priority of DLP2 to 0.
- C. Prevent additional processing of the policies if there is a match for Rule2.

- D. Enable additional processing of the policies if there is a match for Rule1.

**Answer: B**

Explanation:

The rule with priority 0 is processed first.
