Authoritative Online AP-201 Version, AP-201 Test Dumps

Not only our AP-201 study guide has the advantage of high-quality, but also has reasonable prices that are accessible for every one of you. So it is incumbent upon us to support you. On the other side, we know the consumers are vulnerable for many exam candidates are susceptible to ads that boost about AP-201 skills their practice with low quality which may confuse exam candidates like you, so we are trying hard to promote our high quality AP-201 study guide to more people.

Salesforce B2B Commerce for Administrators Accredited Professional Sample Questions (Q87-Q92):

NEW QUESTION # 87

A company decided to change their payment method from one payment gateway to another. 08m 07s.

What does an Administrator need to do to configure the store to use the new payment gateway?

- A. Link the integration in store administration.
- B. Use a Salesforce Labs package.
- **C. Update the payment gateway settings on the Payment and Billing subflow.**
- D. Configure the payment gateway using the Experience Builder Administration page.

Answer: C

Explanation:

To configure the store to use a new payment gateway, an Administrator needs to Update the payment gateway settings on the Payment and Billing subflow (A). This involves configuring the new gateway's details and parameters within the relevant settings, ensuring that the store's payment processing is correctly aligned with the new gateway.

NEW QUESTION # 88

What three job titles would likely come up for users that commonly interact with Salesforce B2B Commerce storefronts?

- **A. Wholesale buyers**
- B. Project managers
- **C. Purchasing directors**
- **D. Purchasing managers**
- E. Equipment technicians

Answer: A,C,D

Explanation:

The common job titles for users interacting with Salesforce B2B Commerce storefronts include A. Purchasing directors, C. Wholesale buyers, and E. Purchasing managers. These roles frequently engage with B2B Commerce platforms for procuring goods and services for their organizations.

NEW QUESTION # 89

An Administrator has automated the rebuild of a store search index. The solution uses a trigger and a custom metadata value. Each time a product record is created or updated it increments a metadata counter value. If the counter value is divisible by 5, then the rebuild search index functionality is started using an API call. The automation has worked until today. In the past 10 minutes, 80 products have been updated. The B2B Store Manager complains that the store search results are out of date. The product changes are missing in the search results.

What could be the cause of this issue?

- A. The automation is triggering the search index rebuild too often. The store search index should not be rebuilt more than 10 times per day.
- B. The automation is working as designed. The B2B Store Manager needs to login again to the store to see results of the updated search index.
- **C. The automation is triggering the search index rebuild too often. The store search index should not be rebuilt more than five times per hour.**

Answer: C

Explanation:

The issue with the search index not reflecting recent product updates could be due to the automation triggering the search index rebuild too frequently. If the store search index is rebuilt more than five times per hour, as suggested in option (C), it can lead to performance issues and delays in updating the search results. This frequency can overwhelm the system, leading to a queue of rebuild operations that can't be processed in a timely manner, causing the search results to become outdated despite the updates to product records.

NEW QUESTION # 90

An Administrator sets up a new store and imports the product catalog. While verifying the store display, the Administrator notices a "Products" category that the Store Manager asked to not display. How can the Administrator fix this?

- A. Enable the Do Not Display in Menu attribute.
- B. Disable the Show in Menu attribute.
- **C. Disable the Display in Menu attribute.**
- D. Enable the Hide in Menu attribute.

Answer: C

Explanation:

To prevent a "Products" category from being displayed as requested by the Store Manager, the Administrator should Disable the Display in Menu attribute (A). This action will remove the category from the storefront navigation menu, ensuring it does not appear to store visitors. This approach allows for flexibility in managing how products and categories are presented on the storefront, aligning with business requirements and preferences. The other options, such as Enable the Do Not Display in Menu attribute (B), Disable the Show in Menu attribute (C), and Enable the Hide in Menu attribute (D), are not standard attributes in Salesforce B2B Commerce for controlling menu display.

NEW QUESTION # 91

An Administrator needs to add a B2B store to a site that already exists. The Administrator has entered a valid store name. Which two conditions are required to be able to add a B2B store to an existing site?

- **A. The existing site should use the Build your own (Aura), Customer Portal or B2B template.**
- **B. The site should not have a store created.**
- C. The site should already have a store created.
- D. The existing site should only use the Microsite (LWR) template.

Answer: A,B

Explanation:

To add a B2B store to an existing site, two conditions required are A. The existing site should use the Build your own (Aura), Customer Portal, or B2B template, ensuring compatibility with B2B Commerce functionalities, and D. The site should not have a store created, as each site can typically support one B2B store.

NEW QUESTION # 92

.....

PassCollection Salesforce AP-201 practice exam software went through real-world testing with feedback from more than 90,000 global professionals before reaching its latest form.
