These activities include setting up organizational structures, defining business processes, and customizing configurations. Below are the three correct answers:

\* Add blocking reasons for billing (Option A): Blocking reasons for billing can be configured during the Product-Specific Configuration Phase. This allows organizations to define conditions under which billing documents are blocked for processing. The SAP S/4HANA Cloud Billing Guide confirms this capability.

\* Change approval thresholds (Option C): Approval thresholds for workflows, such as purchase requisitions or invoices, can be adjusted during this phase. This ensures that the system aligns with the organization's governance and compliance requirements. The SAP Workflow Configuration Guide documents this functionality.

- B. 2502.2
- C. 0
- D. 2025.2.2

**Answer: A**
