

# Pass Guaranteed 2026 Cisco High Pass-Rate 400-007 Practice Exam Pdf

P.S. Free & New 400-007 dumps are available on Google Drive shared by GetValidTest: [https://drive.google.com/open?id=1nJ\\_fnH4olgeJxZ\\_l1HdqQxqc19wqI2H](https://drive.google.com/open?id=1nJ_fnH4olgeJxZ_l1HdqQxqc19wqI2H)

If you feel that you always suffer from procrastination and cannot make full use of your spare time, maybe our 400-007 study materials can help you solve your problem. We are willing to recommend you to try the 400-007 learning guide from our company. Our products are high quality and efficiency test tools for all people with three versions which satisfy all your needs. If you buy our 400-007 Preparation questions, you can use our 400-007 practice engine for study in anytime and anywhere.

Like the real exam, GetValidTest Cisco 400-007 Exam Dumps not only contain all questions that may appear in the actual exam, also the SOFT version of the dumps comprehensively simulates the real exam. With GetValidTest real questions and answers, when you take the exam, you can handle it with ease and get high marks.

## Reliable Cisco - 400-007 Practice Exam Pdf

Do you often feel that the product you have brought is not suitable for you? I would like to tell you that you will never meet the problem when you decide to use our 400-007 learning guide. Our 400-007 study materials have a high quality that you can't expect. If you do experience by the guidance of our 400-007 Study Materials, you will spend less time than you did before, you will obviously feel your progress, and you will find our 400-007 test quiz are so useful to help you make progress.

## Cisco Certified Design Expert (CCDE v3.0) Written Exam Sample Questions (Q177-Q182):

### NEW QUESTION # 177

An engineer is designing the QoS strategy for Company XYZ. A lot of scavenger traffic is traversing the 20Mb Internet link. The new design must limit scavenger traffic to 2 Mbps to avoid oversubscription during congestion. Which QoS technique can be used?

- A. Class-based traffic shaping
- B. LLQ
- C. Class-based traffic policing
- D. CBWFQ

**Answer: D**

Explanation:

\* C (Class-Based Weighted Fair Queuing - CBWFQ): CBWFQ allows assigning bandwidth limits (in this case, 2 Mbps) to specific traffic classes, effectively controlling scavenger traffic without dropping excess packets unnecessarily.

Other options explained:

- \* A: Policing drops excess traffic immediately rather than queuing.
- \* B: LLQ is for delay-sensitive traffic, not scavenger control.
- \* D: Shaping is useful but typically applied at interface level, not specific traffic classes.

#### NEW QUESTION # 178

A customer migrates from a traditional Layer 2 data center network into a new SDN-based spine-and-leaf VXLAN EVPN data center within the same location. The networks are joined to enable host migration at Layer 2. Which activity should be completed each time a legacy network is migrated?

- A. The migrated VLAN should be pruned from the Layer 2 interconnects.
- B. The migrated network should have a VXLAN VNID configured within the new network.
- C. The migrated network should be added to the EVPN BGP routing.
- D. The migrated network should be advertised to the EVPN network as a Type 2 network.

**Answer: A**

#### NEW QUESTION # 179

Refer to the exhibit.

Company XYZ BGP topology is as shown in the diagram. The interface on the LA router connected toward the 10.1.5.0/24 network is faulty and is going up and down, which affects the entire routing domain. Which routing technique can be used in the routing policy design so that the rest of the network is not affected by the flapping issue?

- A. Use route aggregation on LA router to summarize the 10.1.4.0/24, 10.1.5.0/24, 10.1.6.0/24, and 10.1.7.0/24 networks toward Chicago
- B. Use route filtering on Chicago router to block the 10.1.5.0/24 network from coming in from the LA router
- C. Use route filtering on LA router to block the 10.1.5.0/24 network from getting propagated toward Chicago and New York
- D. Use route dampening on LA router for the 10.1.5.0/24 network so that it does not get propagated when it flaps up and down

**Answer: A**

#### NEW QUESTION # 180

The controller has a global view of the network, and it can easily ensure that the network is in a consistent and optimal configuration. Which two statements describe a centralized SDN control path? (Choose two.)

- A. It significantly improves the latency when performing reactive handling of PACKET\_IN events.
- B. It is highly-available by design with no single-point-of-failure risks present.
- C. The centralized controller can support all southbound APIs, which allows for easy integration with legacy equipment.
- D. Scaling of the centralized controller cluster is challenging for services like DHCP and load-balancing.
- E. Integrating smart NIC capabilities on the local host level is made easier through REST APIs.

**Answer: A,D**

Explanation:

\* A (Scaling challenges for services): Centralized SDN controllers may experience scalability challenges for distributed services like DHCP and load balancing since these often require real-time responsiveness and distributed service locality.

\* D (Latency in reactive handling): Centralized controllers may introduce additional latency during reactive PACKET\_IN event handling as control decisions traverse the control plane before forwarding happens.

Other options explained:

- \* B: Centralized controllers still present failure domain risks; high-availability must be explicitly designed.
- \* C: Smart NICs operate primarily at the host level, often independently of centralized SDN controllers.
- \* E: Legacy equipment often lacks support for many SDN southbound APIs.

### NEW QUESTION # 181

Company XYZ connects its sites over a private WAN. Their overlay network is running a DMVPN setup where the headquarters site is the hub. The company is planning on implementing multicast routing on the network. What should be used in the multicast routing design?

- A. PIM dense mode with RP located at the hub
- B. PIM dense mode with RP located at each remote site
- **C. PIM sparse mode with RP located at the hub**
- D. PIM sparse mode with RP located at each remote site

**Answer: C**

Explanation:

<https://www.ccexpert.us/routing-switching-2/dynamic-multipoint-vpn.html>

### NEW QUESTION # 182

.....

if you choose to use the software version of our 400-007 study guide, you will find that you can download our 400-007 exam prep on more than one computer and you can practice our 400-007 exam questions offline as well. We strongly believe that the software version of our 400-007 Study Materials will be of great importance for you to prepare for the exam and all of the employees in our company wish you early success!
