

Workday Workday-Pro-Time-Tracking Valid Dumps Demo & Formal Workday-Pro-Time-Tracking Test

If you buy our Workday-Pro-Time-Tracking training quiz, you will find three different versions are available on our test platform. According to your need, you can choose the suitable version for you. The three different versions of our Workday-Pro-Time-Tracking study materials include the PDF version, the software version and the online version. We can promise that the three different versions are equipped with the high quality. If you purchase our Workday-Pro-Time-Tracking Preparation questions, it will be very easy for you to easily and efficiently find the exam focus and pass the Workday-Pro-Time-Tracking exam.

As you may know that we have become a famous brand for we have engaged for over ten years in this career. The system designed of Workday-Pro-Time-Tracking learning guide by our professional engineers is absolutely safe. Your personal information will never be revealed. Of course, our Workday-Pro-Time-Tracking Actual Exam will certainly not cover this small profit and sell your information. So you can just buy our Workday-Pro-Time-Tracking exam questions without any worries and trouble.

Hot Workday-Pro-Time-Tracking Valid Dumps Demo & Valid Workday Certification Training - 100% Pass-Rate Workday Workday ProTime Tracking Exam

In order to meet the needs of all customers, Our Workday-Pro-Time-Tracking study torrent has a long-distance aid function. If you feel confused about our Workday-Pro-Time-Tracking test torrent when you use our products, do not hesitate and send a remote assistance invitation to us for help, we are willing to provide remote assistance for you in the shortest time. We have professional IT staff, so your all problems about Workday ProTime Tracking Exam guide torrent will be solved by our professional IT staff. We can make sure that you will enjoy our considerate service if you buy our Workday-Pro-Time-Tracking study torrent. There are many IT staffs online every day; you can send your problem, we are glad to help you solve your problem. If you have any question about our Workday-Pro-Time-Tracking test torrent, do not hesitate and remember to contact us.

Workday Workday-Pro-Time-Tracking Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	<ul style="list-style-type: none"> • Time Calculation and Processing: Explains how Workday calculates time, including rules for overtime, shifts, and processing of recorded hours.
Topic 2	<ul style="list-style-type: none"> • Time Entry and Validation: Focuses on how workers enter time, how entries are validated, and the rules that ensure accuracy and compliance.
Topic 3	<ul style="list-style-type: none"> • Reporting and Auditing: Covers how to generate reports, monitor time data, and audit entries to ensure accuracy and compliance with policies.
Topic 4	<ul style="list-style-type: none"> • Time Tracking Fundamentals: Covers the core concepts of Workday time tracking, including basic setup, terminology, and how time is captured within the system.
Topic 5	<ul style="list-style-type: none"> • Time Off and Leave Integration: Describes how time tracking integrates with time off plans, leave requests, and absence management processes.

Workday ProTime Tracking Exam Sample Questions (Q43-Q48):

NEW QUESTION # 43

Where can you configure daily and weekly totals for a worker's time entry calendar?

- **A. Time calculation**
- B. Time calculation tag
- C. Time entry template
- D. Time entry code

Answer: A

Explanation:

The correct answer is B. Time calculation . In Workday Time Tracking, daily and weekly totals on a worker's time entry calendar are driven through the Time Calculation framework. Time calculations are used to evaluate entered time and produce results such as totals, overtime, premiums, exceptions, and other rule- based outcomes. When Workday needs to total time across a day or across a week, that logic is configured in a time calculation because calculations define how time is interpreted, accumulated, and processed.

The other options do not control this type of totaling behavior. A time calculation tag is mainly used to organize or identify calculations, not to perform the actual totaling logic. A time entry code identifies the type of time being entered, such as regular hours, training, or on-call time, but it does not define calendar total behavior. A time entry template helps control the layout or default structure for time entry, but it is not where daily or weekly total rules are configured.

So, if the question asks specifically where Workday configures the totals shown for a worker's calendar, the best and correct choice is Time calculation .

NEW QUESTION # 44

You create a Sum Related Instances calculated field to add the total number of hours worked in a week with a specific time entry code.

What is the related business object of the Sum Related Instances calculation?

- A. Time Calculation Tag
- B. Time Entry Code
- **C. Time Block**
- D. Time Week

Answer: C

Explanation:

The correct answer is A. Time Block .

In Workday Time Tracking, a Sum Related Instances calculated field is used when you want to total values from a set of related records. In this scenario, the goal is to add up the hours worked in a week for entries that use a particular time entry code . Although the overall calculation context may be weekly, the actual hours being summed come from the individual time records , which are stored as Time Blocks .

That is why the related business object for the Sum Related Instances calculation is Time Block . Each time block contains the detailed reported time information, including hours, time entry code, and other attributes used for filtering and summing. The weekly total is produced by summing the qualifying Time Block records associated with the week.

The other options are not correct as the related object for the sum itself. Time Entry Code is a filter attribute, not the object containing the hours to total. Time Week is the broader context or parent level for the calculation, but it is not the related instance being summed. Time Calculation Tag is also an identifying or filtering element used in calculations, not the transactional object that stores the hour values.

So, for a Sum Related Instances field totaling weekly hours by a specific entry code, the related business object is Time Block .

NEW QUESTION # 45

What report do you run to ensure that a period schedule is assigned to a worker?

- A. View Period Schedule
- B. Time Entry Period Schedule Review
- C. View Worker's Time Eligibility
- D. Audit - Workers with Multiple Time Period Schedules

Answer: C

Explanation:

The correct answer is D. View Worker's Time Eligibility .

In Workday Time Tracking, when you want to confirm whether a specific worker has been assigned a period schedule , the most direct report is View Worker's Time Eligibility . This report is used to review which Time Tracking components a worker is currently eligible for and receiving, including items such as time entry templates, approval templates, and period schedules . Since the question is focused on verifying assignment to a worker , this worker-level eligibility view is the most appropriate choice.

The other options do not fit the requirement as well. Audit - Workers with Multiple Time Period Schedules is an exception report used to identify workers who have more than one schedule, not to simply confirm that a worker has one assigned. View Period Schedule lets you inspect the schedule definition itself, but it is not the best worker-specific confirmation tool. Time Entry Period Schedule Review may sound related, but it is not the standard report used to validate a worker's eligibility-based assignment in the same direct way.

So, if your goal is to ensure that a particular worker is assigned the correct period schedule, the correct report is View Worker's Time Eligibility .

NEW QUESTION # 46

What worker population will an administrator commonly use Mass Submit Time for?

- A. Hours-only workers using micro-edit.
- B. In/Out workers who use check-in/check-out functionality.
- C. Salaried workers adjusting their auto-fill from schedule hours.
- D. Project workers using enter time by type.

Answer: C

Explanation:

The correct answer is A. Salaried workers adjusting their auto-fill from schedule hours .

In Workday Time Tracking, Mass Submit Time is most commonly used for worker populations whose time is largely predictable and auto-generated , especially salaried workers who use auto-fill from schedule hours . These workers often have standard scheduled hours and may only make small adjustments before time needs to be submitted. Because their time is generally consistent, administrators can efficiently submit time in bulk for many workers at once, which reduces manual effort and supports period-end processing.

This function is less appropriate for populations with more variable or punch-based time entry. Hours-only workers using micro-edit may still require individual changes that make bulk submission less common. In

/Out workers using check-in/check-out functionality rely on punch data and break patterns, so their entries often need closer review before submission. Project workers using enter time by type usually allocate time across projects, tasks, or worktags, making their time more complex and less suitable for broad mass submission.

Mass Submit Time is most valuable when time entry follows a stable pattern and does not require frequent day-by-day validation. That is why salaried workers with auto-fill from schedule hours are the most common population for this administrative action.

NEW QUESTION # 47

Refer to the following scenario to answer the question below.

You have received a requirement to create a set of Time Tracking Components for workers who have the following attributes:

* Time Type = Salary

* Country = United States

* Supervisory Organization = Facilities Group

A worker that you are testing is already assigned to a template. During testing, this worker, who meets all of the newly defined criteria, is not assigned to the new Time Entry Template.

How do you troubleshoot this issue?

- A. Run the Audit - Workers with Multiple Time Entry Templates report to confirm that there are overlapping assignments.
- B. Run the View Worker Time Eligibility by Organization to confirm that there are overlapping assignments.
- C. Run the All Time Entry Templates report to confirm that there are overlapping assignments.
- D. Run the Audit - Workers with Multiple Work Schedule Calendars to confirm that there are overlapping assignments.

Answer: A

Explanation:

The correct answer is C. Run the Audit - Workers with Multiple Time Entry Templates report to confirm that there are overlapping assignments .

In Workday Time Tracking, a worker should generally be eligible for only one active time entry template at a time . If a worker already has an existing template assignment and also meets the criteria for a newly created template, the most common issue is overlapping eligibility between templates. When this happens, Workday administrators need an audit tool that specifically identifies workers who match more than one template at the same time.

The Audit - Workers with Multiple Time Entry Templates report is built for exactly this troubleshooting scenario. It helps confirm whether the worker is being picked up by multiple eligibility rules and whether an overlap is preventing the expected result or creating assignment ambiguity. This makes it the most accurate report to run when validating time entry template setup.

Option A only lists templates and does not directly expose worker-level overlap issues. Option B focuses on work schedule calendars , which is a different setup area and not related to time entry template conflicts.

Option D may provide useful eligibility information, but it is not the primary audit report used to detect overlapping template assignments.

Therefore, the best troubleshooting step is C .

NEW QUESTION # 48

.....

Our experts who compiled the Workday-Pro-Time-Tracking practice materials are assiduously over so many years in this filed.

They add the new questions into the Workday-Pro-Time-Tracking study guide once the updates come in the market, so they recompose the contents according to the syllabus and the trend being relentless in recent years. With so accurate information of our Workday-Pro-Time-Tracking learning questions, we can confirm your success by your first attempt.
