2026 Adobe AD0-E725: Latest New Adobe Commerce Developer Expert Exam Pdf

With the rapid development of IT technology, the questions in the IT certification exam are also changing. Therefore, BraindumpStudy also keeps updating test questions and answers. And if you purchase BraindumpStudy Adobe AD0-E725 Practice Test materials, we will provide you with free updates for a year. As long as the questions updates, BraindumpStudy will immediately send the latest questions and answers to you which guarantees that you can get the latest materials at any time. BraindumpStudy can not only help you pass the test, but also help you learn the latest knowledge. Never pass up a good chance to have the substantial materials.

Adobe Commerce Developer Expert Sample Questions (Q33-Q38):

NEW QUESTION # 33

A new critical security vulnerability is found on Adobe Commerce Cloud. The successful exploitation may lead to arbitrary code execution, so the Developer must apply a security patch file given by Adobe as soon as possible to ensure system security. How should the Developer apply the security patch on Adobe Commerce hosted on cloud infrastructure according to best practices?

- A. Apply a security patch using composer.json.
- B. Upgrade Adobe Commerce to the latest security patch release.
- C. Copy a security patch to m2-hotfixes directory.

Answer: C

Explanation:

On Adobe Commerce Cloud, the best practice for urgent fixes is to place the patch file into the m2-hotfixes directory at the root of the project. Patches in this directory are automatically applied during the Cloud build and deploy process.

Option A (composer.json) applies to composer-based patches in on-premise installations, not the recommended cloud approach.

Option C (upgrade to latest release) is ideal for long-term but not feasible for urgent fixes that must be applied immediately.

NEW QUESTION # 34

An Adobe Commerce Developer is tasked with adding additional data to an order entity in REST API. Remembering upgradability, which solution should the developer implement?

- A. Use API events.
- B. Use interceptor plugins.
- C. Use extension attributes.

Answer: C

Explanation:

The correct way to expose additional data for service contracts (such as REST or GraphQL APIs) is via Extension Attributes.

A (plugins): Not intended for exposing new data in APIs.

C (events): Cannot modify service contract data structures.

B is correct: Extension Attributes allow adding new fields to API entities while maintaining backward compatibility and upgradability.

NEW QUESTION # 35

A Developer is writing an integration test. The particular functionality being tested has many admin area configurations that need to be tested.

Which DocBlock annotation should be used to allow configuration settings to be manipulated for testing purposes?

- A. `@testAdminConfFixture`
- B. `@testConfigFixture`
- C. `@testAdminArea`

Answer: B

NEW QUESTION # 36

A Developer working on a Magento 2 store needs to modify the Content Security Policy (CSP) to allow loading of images from a trusted external domain while maintaining strict policies for other resources. To accomplish this, the `csp_whitelist.xml` file must be updated.

Which code snippet should the Developer use to update the CSP configuration?

- A. XML

```
<csp>
<policies>
<policy id="media-src">
<values>
<value id="trusted_image" type="host">website.com</value>
</values>
</policy>
</policies>
</csp>
```
- B. XML

```
<policies>
<policy id="img-src">
<values>
<value id="trusted_image" type="host">website.com</value>
</values>
</policy>
</policies>
```
- C. XML

```
<policies>
<policy id="default-src">
<values>
<value id="trusted_image" type="host">website.com</value>
</values>
</policy>
</policies>
```

Answer: B

NEW QUESTION # 37

A Developer needs to replicate a recent issue that occurred in the staging environment so it can be tested locally. The Developer decides to dump the staging database and import it into the local setup.

Which command should the Developer use to do this?

- A. `vendor/bin/ece-tools db-snapshot`
- B. `magento-cloud snapshot:db-dump`
- C. `vendor/bin/ece-tools db-dump`

Answer: C
