What is the SAP Signavio Process Manager?

- A. A tool for automating financial transactions in ERP systems.
- B. A software for managing customer relationships and sales pipelines.
- **C. A cloud-based tool for designing, modeling, and improving business processes.**
- D. An analytics solution for process mining and data analysis.

**Answer: C**

Explanation:

SAP describes SAP Signavio Process Manager as a collaborative, browser-based BPM tool focused on process design and improvement:

"SAP Signavio Process Manager is a cloud-based solution to model, document, and optimize business processes collaboratively using BPMN 2.0." Reference:

Option B confuses it with a different product in the same portfolio. SAP states that process mining sits in SAP Signavio Process Intelligence (not Process Manager):

"SAP Signavio Process Intelligence is the process mining and analytics solution of the SAP Signavio portfolio." Option C refers to ERP transaction automation, which is not the scope of Process Manager. SAP positions Process Manager for process modeling and documentation, not transaction execution/automation:

"Use SAP Signavio Process Manager to design and document processes and drive process improvement; execution of transactions is handled by operational systems (e.g., ERP)." Option D is about CRM. SAP clarifies that CRM and sales pipeline management are covered by customer experience/CRM solutions, not by Process Manager:
