堂，捷徑只有一個，那就是使用PDFExamDumps CertiPro的I27001F考試培訓資料。這是我們對每位IT考生的忠告，希望他們能抵達夢想的天堂。

最新的 ISO 27000 I27001F 免費考試真題 (Q11-Q16):

問題 #11

What does ISO/IEC 27001:2022 require for information security risk assessment?

- A. Acquisition of a set of information security tools to automate the assessment using artificial intelligence
- **B. Applying an information security risk assessment process that establishes and maintains information security risk criteria**
- C. A person designated by top management
- D. A consultancy to perform the information security risk assessment professionally

答案: B

解題說明:

ISO/IEC 27001:2022 does not require a specific tool, consultant, or named individual as the basis for compliance. What it does require is that the organization define and apply an information security risk assessment process that establishes and maintains risk criteria, ensures consistent, valid, and comparable results, identifies risks, analyzes risks, and evaluates risks. Therefore, option D is the correct answer.

問題 #12

Which of the following options should be included in the ISMS policy?

- **A. The information security objectives**
- B. The results of previous audits
- C. The name of the intrusion detection system
- D. The company history and the motivation for implementing the ISMS

答案: A

解題說明:

Under ISO/IEC 27001:2022, the information security policy must be appropriate to the purpose of the organization, include information security objectives or provide the framework for setting them, and include a commitment to satisfy applicable requirements and to continual improvement of the ISMS. The standard does not require technical product names, company history, or prior audit results to appear in the policy. Therefore, option C is the best and correct answer.

問題 #13

What does ISO/IEC 27001:2022 require in order for top management to demonstrate leadership and commitment with respect to the Information Security Management System?

- A. Nothing is required
- **B. Ensuring that the information security policy and information security objectives are established and are compatible with the strategic direction of the organization**
- C. Appointing a volunteer to be responsible for the Information Security Management System
- D. Hiring a consultancy to determine the best way to do it

答案: B

解題說明:

ISO/IEC 27001:2022 requires top management to demonstrate leadership and commitment by ensuring that the information security policy and information security objectives are established and are compatible with the strategic direction of the organization. Top management must also integrate ISMS requirements into the organization's processes, ensure resources are available, support relevant roles, and promote continual improvement. The standard does not allow leadership accountability to be replaced by a consultant or a volunteer. Therefore, option A is correct.

問題 #14

What does ISO/IEC 27001:2022 require for information security risk treatment?

- A. Acquiring a set of information security tools to automate risk treatment
- B. A person designated by top management with expertise to perform information security risk treatment
- C. A consultancy to accurately perform information security risk treatment
- **D. Performing an information security risk treatment process to select appropriate risk treatment options, taking into account the results of the risk assessment**

答案: D

解題說明:

ISO/IEC 27001:2022 requires the organization to define and apply an information security risk treatment process. This process must select appropriate information security risk treatment options, determine the controls necessary to implement the chosen options, compare the selected controls with Annex A, produce a Statement of Applicability, and formulate a risk treatment plan. The standard does not require a consultant, a specific tool, or a single appointed individual as the basis for compliance. Therefore, option B is correct.

問題 #15

What is the purpose of management review in ISO/IEC 27001:2022?

- **A. To ensure the continuing suitability, adequacy, and effectiveness of the ISMS**
- B. To ensure that the information security policy covers all controls indicated in ISO/IEC 27001
- C. To ensure that the information security policy matches all identified risks
- D. To ensure that employees receive information about updates to information security policies

答案: A

解題說明:

ISO/IEC 27001:2022 requires top management to review the organization's ISMS at planned intervals to ensure its continuing suitability, adequacy, and effectiveness. Management review is a formal requirement under performance evaluation and is intended to confirm that the ISMS continues to support the organization's objectives and strategic direction. It is broader than policy review alone and is not limited to communication or Annex A coverage. Therefore, option C is correct.

問題 #16
