3V0-22.25 Certification Torrent & 3V0-22.25 Valid Study Questions

With the development of the times, the pace of the society is getting faster and faster. If we don't try to improve our value, we're likely to be eliminated by society. Under the circumstances, we must find ways to prove our abilities. For example, getting the 3V0-22.25 Certification is a good way. If we had it, the chances of getting a good job would be greatly improved. However, obtaining the 3V0-22.25 certification is not an easy task.

VMware Advanced VMware Cloud Foundation 9.0 Operation Sample Questions (Q272-Q277):

NEW QUESTION # 272

What is a mandatory vSphere prerequisite for VCF Operations to perform Cross-Cluster Workload Optimization (moving a VM from Cluster A to Cluster B)?

- A. The clusters must be configured with "vSphere HA" Disabled.
- B. The clusters must share the same vCenter Server.
- C. The clusters must be in different Datacenters.
- D. The source and destination hosts must be connected to the same Shared Storage (or a shared datastore cluster), OR the environment must meet the requirements for vMotion without Shared Storage (x-vCenter vMotion requirements, routed vMotion network).

Answer: D

NEW QUESTION # 273

An administrator integrates vCenter Server with VCF Operations for Logs. The goal is to collect Events, Tasks, and Alarms from

vCenter. The integration status is Green, but searches for vc_event_type return zero results. What specific checkbox in the integration configuration was likely missed?

- A. "Enable Syslog Service"
- B. "Configure ESXi hosts to send logs"
- C. "Collect vCenter Server events, tasks, and alarms". This is a specific toggle within the vSphere Integration wizard. If unchecked, the integration only configures the ESXi hosts but ignores the vCenter application events themselves.
- D. "Enable API Ingestion"

Answer: C

NEW QUESTION # 274

A Solution Architect is using the VCF Operations for Logs Sizing Calculator to plan a deployment for a financial institution. The customer requires logs to be searchable for 30 days and archived for 1 year.

Daily ingestion is estimated at 200 GB.

Which specific input in the calculator determines the Local Disk Space requirement for the appliance nodes?

- A. The bandwidth of the WAN link.
- B. The number of concurrent users.
- C. The Archive Retention period (1 Year).
- D. The Searchable Retention period (30 Days) multiplied by the Daily Ingestion Rate, plus a required overhead factor (typically ~120-130% for indexing).

Answer: D

NEW QUESTION # 275

An operator needs to decommission a host (host-05) from the "Finance-WLD" Workload Domain due to a hardware fault, but the "Remove Host" workflow in SDDC Manager is failing validation. The operator reviews the following VCF Operations dashboard data for the host.

Host Utilization - host-05.corp.local

State: Connected

Maintenance Mode: No

Virtual Machine Placement

Total VMs: 4

VM List:

1. fin-web-01 (Powered On)
2. fin-db-01 (Powered On)
3. nsx-edge-01 (Powered On)
4. vcls-vm-1 (Powered On)

vSAN Status

Data Evacuation: Not Started

What is the most likely reason the removal workflow is blocked based on the component list?

- A. The vCLS VM (vcls-vm-1) prevents the host from entering maintenance mode under any circumstance.
- B. The host is not in Maintenance Mode; the operator must manually place it in Maintenance Mode in vCenter before triggering the SDDC Manager workflow.
- C. The host contains "Powered On" user VMs (fin-web-01), and DRS is fully automated, but the workflow requires manual evacuation first.
- D. The host is running an active NSX Edge node (nsx-edge-01), which must be migrated or powered off before the host can be entered into maintenance mode by the workflow.

Answer: D

NEW QUESTION # 276

A Manager wants to know the "Potential Cost Savings" if the team deletes all VMs that have been powered off for more than 6 months.

Current View

Reclaim Dashboard -> Powered Off VMs

Issue

The list includes VMs powered off for only 7 days, skewing the total savings number high.

How can the Manager filter the view and the savings calculation to only reflect the 6-month candidates?

- A. Use the Filter or Graph within the Reclaim workbench to slide the "Powered Off Duration" selector (or filter the list) to "> 180 Days". The dashboard dynamically recalculates the "Reclaimable Capacity" and "Savings" values based on the filtered selection.
- B. Change the "Currency" setting to Euro.
- C. Export the list to Excel and sum the columns manually.
- D. It is not possible; the savings calculation is always global.

Answer: A

NEW QUESTION # 277

.....

The (3V0-22.25 exam offered by VMware is regarded as one of the most promising certification exams in the field of. The 3V0-22.25 preparation products available here are provided in line with latest changes and updates in 3V0-22.25 syllabus. The VMware 3V0-22.25 undergo several changes which are regularly accommodated to keep our customers well-informed. We have the complete list of Popular 3V0-22.25 Exams. Now you can simply choose your 3V0-22.25 exam from the list and be directed right to its page where you can find links to download 3V0-22.25 exams.
