## Valid Braindumps DEP-2025 Ebook & DEP-2025 Reliable Dumps Files

Many candidates may take the price into consideration while buying DEP-2025 exam materials. The price of DEP-2025 exam materials is quite reasonable, you can afford it no matter you are students or the employees in the company. Furthermore the DEP-2025 Exam Materials is high-quality, so that it can help you to pass the exam just one time, we will never let your money gets nothing returns. If you indeed fail the exam, money back will be guaranteed.

### Apple Deployment and Management Exam Sample Questions (Q172-Q177):

#### NEW QUESTION # 172

How can you identify if a Rapid Security Response was applied to iPadOS?

- A. A single-letter identifier is appended to the operating system version.
- B. A single-digit identifier is appended to the operating system version.
- C. The letters ".eve" are appended to the operating system version.
- D. The letters ".rsr" are appended to the operating system version.

**Answer: A**

Explanation:

Apple introduced Rapid Security Response (RSR) to deliver urgent security patches without waiting for a full OS release. When an RSR is applied to iOS, iPadOS, or macOS, Apple adds a single letter (such as "a", "b", or "c") to the OS version. For example, iPadOS 16.5 (a) indicates an RSR patch has been installed. Apple Learning documents clarify that these patches can later be incorporated into full OS updates, at which point the letter disappears. This simple identifier lets IT admins and users quickly confirm whether a device has received critical security protections.

References: Apple Platform Security - "Rapid Security Response."

#### NEW QUESTION # 173

Which type of 802.1X configuration allows Mac computers to connect to Wi-Fi before login and user authentication after login?

- A. System+Login Window Mode
- B. User Mode
- C. System+User Mode
- D. System Mode

**Answer: C**

Explanation:

System+User Mode supports pre- and post-login connectivity. The Apple Platform Deployment Guide states, "System+User Mode for 802.1X allows a Mac to connect to Wi-Fi using system credentials before login and switches to user credentials after login, ensuring network access at all stages." Option B is not a standard term, C requires login first, and D uses only system credentials.

Reference:

Apple Platform Deployment Guide, "802.1X Authentication" section.

macOS Deployment Reference, "Network Configuration" section.

#### **NEW QUESTION # 174**

Which type of Apple ID is required for User Enrollment?

- A. Shared Apple ID
- B. Apple ID
- C. Personal Apple ID
- **D. Managed Apple ID**

**Answer: D**

Explanation:

User Enrollment, designed for BYOD, requires a Managed Apple ID to separate personal and managed data cryptographically. Created via Apple Business Manager (ABM) or Apple School Manager (ASM), Managed Apple IDs enable organizational policies while preserving user privacy. Personal Apple IDs (options A and C, the same) are not used for User Enrollment, as they lack organizational control. There's no "Shared Apple ID" (option D); Shared iPad uses Managed Apple IDs differently. The Apple Platform Deployment Guide mandates Managed Apple IDs for User Enrollment.

#### **NEW QUESTION # 175**

Which type of device supports Profile Manager?

- **A. Mac with macOS 10.14 or later**
- B. iPad with iPadOS 13 or later
- C. Apple Watch with watchOS 6 or later
- D. iPhone with iOS 13 or later

**Answer: A**

Explanation:

Profile Manager, a feature for creating and managing configuration profiles, is supported on Mac computers running macOS 10.14 (Mojave) or later, following the integration of macOS Server features into the OS.

iPads (option A), iPhones (option B), and Apple Watches (option D) don't host Profile Manager, though they can receive profiles from it. The Apple Platform Deployment Guide specifies macOS as the platform for Profile Manager.

Reference: Apple Platform Deployment Guide (Chapter: Profile Manager).

#### **NEW QUESTION # 176**

You try to start in macOS Recovery. You're asked to choose a user and enter a password. Why are you asked to choose a user and enter a password?

- A. Lockdown Mode is turned on
- B. Recovery Lock is enabled
- C. Startup Security Utility is set to Full Security
- **D. FileVault is turned on**

**Answer: D**

Explanation:

FileVault encryption requires authentication. The macOS Security Overview states, "When FileVault is enabled, macOS Recovery requires a FileVault-enabled user account and password to decrypt the disk." Option D (Recovery Lock) uses a separate
