

Valid Test NCP-DB-6.10 Braindumps, NCP-DB-6.10 Book Pdf

now our NCP-DB-6.10 training materials have become the most popular NCP-DB-6.10 practice materials in the international market. There are so many advantages of our study materials, and will show you some of them for your reference. First and foremost, our company has prepared NCP-DB-6.10 free demo in this website for our customers. Second, it is convenient for you to read and make notes with our PDF version. So let our NCP-DB-6.10 practice materials to be your learning partner in the course of preparing for the NCP-DB-6.10 exam, especially the PDF version is really a wise choice for you.

At the same time, NCP-DB-6.10 study material also has a timekeeping function that allows you to be cautious and keep your own speed while you are practicing, so as to avoid the situation that you can't finish all the questions during the exam. With NCP-DB-6.10 Learning Materials, you only need to spend half your money to get several times better service than others. And you can get the NCP-DB-6.10 certification with little effort and money.

NCP-DB-6.10 Book Pdf & Dumps NCP-DB-6.10 Cost

To do this the Nutanix NCP-DB-6.10 certification exam candidates can stay updated and competitive and get a better career opportunity in the highly competitive market. So we can say that with Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 NCP-DB-6.10 certificate you can not only validate your expertise but also put your career on the right track.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q191-Q196):

NEW QUESTION # 191

An administrator needs to add multiple databases to an existing PostgreSQL instance. How should the administrator satisfy this requirement?

- A. Modify parameter profile using NDB CLI.
- **B. Modify parameter profile using the GUI.**
- C. Modify parameter profile using ncli.

- D. Modify parameter profile using post script.

Answer: B

Explanation:

To add multiple databases to an existing PostgreSQL instance managed by NDB, the administrator should use the NDB graphical user interface (GUI). The GUI provides a user- friendly way to modify the parameter profile associated with the PostgreSQL instance, allowing the addition of new databases by adjusting settings such as database names, sizes, or configurations. This process typically involves navigating to the "Databases" or "Instances" section, selecting the PostgreSQL instance, and editing the parameter profile to include additional databases.

NEW QUESTION # 192

An administrator needs to perform LCM upgrades on an AHV cluster registered with NDB. The cluster hosts NDB-provisioned database server VMs that are part of a database server cluster.

What should the administrator do to allow the DB Server VMs to stay available while the cluster is being upgraded?

- A. Update Nutanix Cluster
- B. Unset VM-Host Affinity
- C. Remove Nutanix Cluster
- D. Set VM-Host Affinity

Answer: D

Explanation:

The correct answer is B because setting VM-Host affinity ensures that the DB Server VMs are not migrated to another host during the LCM upgrade process. This way, the DB Server VMs can continue to serve the database requests without interruption. Option A is incorrect because updating the Nutanix cluster does not prevent the DB Server VMs from being moved to another host. Option C is incorrect because removing the Nutanix cluster from NDB will make the DB Server VMs unmanaged by NDB and lose the benefits of NDB features. Option D is incorrect because unsetting VM-Host affinity will allow the DB Server VMs to be migrated to another host during the LCM upgrade process, which may cause downtime or performance degradation.

NEW QUESTION # 193

An administrator is creating a Windows Domain profile in Era. Which optional field can be skipped and provided during the provisioning process?

- A. Domain to join
- B. SQL Service Startup Account
- C. Organizational Units
- D. Domain Account

Answer: B

Explanation:

When an administrator is creating a Windows Domain profile in Era, the SQL Service Startup Account is an optional field that can be skipped and provided during the provisioning process.

This account is used to start the SQL Server service when the server starts up. If this field is not provided during the creation of the Windows Domain profile, it can be provided later during the provisioning process.

NEW QUESTION # 194

Which NDB feature is most essential when converting an Oracle single instance into an Oracle RAC setup?

- A. Compute Profile
- B. Network Profile
- C. Cluster Scale-Out
- D. Software Profile

Answer: B

Explanation:

Oracle RAC requires multiple networks (Public, Private, SCAN). NDB's Network Profile ensures correct VLAN and IP configuration for all RAC nodes.

NEW QUESTION # 195

An administrator needs the ability to clone a source database to a point in time. What is the lowest log frequency in minutes that can be configured in the Era IJI for log catchup operation?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

The log frequency in the Era IJI for log catchup operation can be configured to as low as 5 minutes. This allows the system to capture changes to the database at a high frequency, enabling more precise point-in-time recovery options. However, it's important to note that a higher frequency of log catchup operations can lead to increased system load. Therefore, the optimal frequency may vary depending on the specific requirements and capabilities of your system.

Please refer to the Nutanix Database Automation (NCP-DB) Learning documents for more detailed information.

NEW QUESTION # 196

.....

We want to finish long term objectives through customer satisfaction and we have achieved it already by our excellent NCP-DB-6.10 exam questions. In this era of cut throat competition, we are successful than other competitors. What is more, we offer customer services 24/7. Even if you fail the exams, the customer will be reimbursed for any loss or damage after buying our NCP-DB-6.10 Guide dump. One decision will automatically lead to another decision, we believe our NCP-DB-6.10 guide dump will make you fall in love with our products and become regular buyers.
