Certification 156-215.82 Dumps, 156-215.82 Real Questions

Our three versions of 156-215.82 study materials are the PDF, Software and APP online. They have their own advantages differently and their prolific 156-215.82 practice materials can cater for the different needs of our customers, and all these 156-215.82 simulating practice includes the new information that you need to know to pass the test for we always update it in the first time. So you can choose them according to your personal preference.

CheckPoint Check Point Certified Security Administrator - R82 Sample Questions (Q295-Q300):

NEW QUESTION # 295

How can the changes made by an administrator before publishing the session be seen by a superuser administrator?

- A. By impersonating the administrator with the 'Login as...' option

- B. From the SmartView Tracker audit log
- **C. From Manage and Settings > Sessions, right click on the session and click 'View Changes...'**
- D. They cannot be seen

Answer: C

Explanation:

The changes made by an administrator before publishing the session can be seen by a superuser administrator from Manage and Settings > Sessions, right click on the session and click 'View Changes...'. This option allows the superuser to review the changes made by another administrator in a pending session. Check Point R81 Security Management Administration Guide

NEW QUESTION # 296

Which option in a firewall rule would only match and allow traffic to VPN gateways for one Community in common?

- A. Accept all encrypted traffic
- **B. Specific VPN Communities**
- C. All Connections (Clear or Encrypted)
- D. All Site-to-Site VPN Communities

Answer: B

Explanation:

Specific VPN Communities is the option that would only match and allow traffic to VPN gateways for one Community in common. This option allows you to define a specific VPN community that includes the VPN gateways that are allowed to communicate with each other. The other options are either too broad or too narrow for this scenario. [Site to Site VPN in R80.x - Tutorial for Beginners]

NEW QUESTION # 297

Can multiple administrators connect to a Security Management Server at the same time?

- A. Yes, but only one has the right to write
- **B. Yes, every administrator has their own username, and works in a session that is independent of other administrators**
- C. Yes, all administrators can modify a network object at the same time
- D. No, only one can be connected

Answer: B

Explanation:

Multiple administrators can connect to a Security Management Server at the same time, and each administrator has their own username and works in a session that is independent of other administrators. This allows concurrent administration and prevents conflicts between different administrators. The other options are incorrect. Only one administrator can be connected is false. All administrators can modify a network object at the same time is false, as only one administrator can lock and edit an object at a time. Only one has the right to write is false, as all administrators have write permissions unless they are restricted by roles or permissions. Security Management Server - Check Point Software

NEW QUESTION # 298

Fill in the blank: Browser-based Authentication sends users to a web page to acquire identities using _____.

- **A. Captive Portal and Transparent Kerberos Authentication**
- B. Captive Portal
- C. User Directory
- D. UserCheck

Answer: A

Explanation:

Browser-based Authentication sends users to a web page to acquire identities using Captive Portal and Transparent Kerberos Authentication. Captive Portal is a web page that prompts users to enter their credentials. Transparent Kerberos Authentication is a

method that automatically authenticates users who have a valid Kerberos ticket from the Active Directory domain controller. UserCheck is a feature that allows users to interact with the security policy, not a method of authentication. User Directory is a component that integrates with external user databases, not a web page for authentication. Captive Portal alone is not enough to fill in the blank, as it is only one of the methods used by Browser-based Authentication.

NEW QUESTION # 299

Fill in the blanks: The Application Layer Firewalls inspect traffic through the _____ layer(s) of the TCP/IP model and up to and including the _____ layer.

- A. Upper; Application
- B. First two; Transport
- C. First two; Internet
- **D. Lower; Application**

Answer: D

Explanation:

The Application Layer Firewalls inspect traffic through the Lower layer(s) of the TCP/IP model and up to and including the Application layer. The lower layers are the Physical, Data Link, and Network layers, which deal with the transmission and routing of packets. The Application layer is the highest layer of the TCP/IP model, which provides services and protocols for specific applications such as HTTP, FTP, SMTP, etc. The Application Layer Firewalls can inspect the content and context of the traffic and enforce granular security policies based on various criteria such as user identity, application identity, content type, etc. [Check Point R81 Firewall Administration Guide]

NEW QUESTION # 300

.....

TroytecDumps's experts have simplified the complex concepts and have added examples, simulations and graphs to explain whatever could be difficult for you to understand. Therefore even the average 156-215.82 exam candidates can grasp all study questions without any difficulty. Additionally, the 156-215.82 Exam takers can benefit themselves by using our testing engine and get numerous real 156-215.82 exam like practice questions and answers. They will help them revising the entire syllabus within no time.
