NEW QUESTION # 30

The illegitimate use of a person's role for gain is what form of ethical issue?

- A. Bribery
- **B. Corruption**
- C. Fraud
- D. Slavery

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Documents:

The L5M5 study guide (p.48) defines corruption as the illegitimate use of one's role or position for personal gain. This differs from bribery (A), which is offering or accepting inducements, and fraud (C), which involves deception such as falsifying records or creating phantom suppliers. Slavery (D) refers to forced labour. Procurement professionals must recognise corruption risks, particularly in international supply chains, and implement controls such as segregation of duties, audit trails, and whistleblowing policies.

Procurement professionals and suppliers must collaborate to effectively eliminate forced labor. Which of the following strategies can procurement professionals use to address forced labor practices?

2. Inclusion of anti-slavery and human trafficking clauses in contracts
3. Training for employees and suppliers to raise awareness of slavery issues
4. Treat all women and men fairly at work

- A. 2 and 4
- B. 4 and 1
- C. 1 and 2
- **D. 2 and 3**

Answer: D

NEW QUESTION # 32

EcoSmart Solutions, a company specializing in sustainable construction materials, intends to make a sustainability claim for their product. They are aware of the ISEAL Alliance's guidelines for valid sustainability claims. Which of the following would be considered a valid sustainability claim according to ISEAL Alliance standards?

- A. The product is marketed as "eco-friendly" based on internal environmental policies without any external certification
- **B. The product is made using 100% recycled materials, with claims verified by third-party certification from a recognized sustainability standard**
- C. The product claims to improve sustainability, but the claims are solely based on anecdotal evidence and not on any recognized environmental criteria or certification
- D. The product reduces carbon emissions, but the claim is not supported by any third-party audits or verifications

Answer: B

Explanation:

Choice A- This is the correct answer. According to ISEAL Alliance guidelines, a valid sustainability claim must be supported by third-party certification from a credible and recognized sustainability standard, ensuring the claim is verifiable and transparent.

Incorrect answer:

Choice B- This is not a valid claim under ISEAL guidelines because third-party verification is necessary to substantiate any claims related to carbon emissions.

Choice C- This is not a valid claim under ISEAL guidelines. Claims need to be independently verified, and internal policies alone do not provide credibility to the sustainability claim.

Choice D- This is not a valid claim according to ISEAL standards. Claims should be based on verifiable evidence and supported by recognized sustainability standards.
