DumpsQuestion makes it possible for candidates to download a free Demo for the Microsoft SC-900 Practice Test before making a decision to buy any of the Microsoft SC-900 study guides.

Microsoft SC-900 (Microsoft Security, Compliance, and Identity Fundamentals) certification exam is designed to validate one's understanding of security, compliance, and identity concepts. It is an entry-level exam that is ideal for individuals who are new to the field of security and compliance, as well as those who are looking to refresh their knowledge and skills in these areas.

Microsoft SC-900 exam is designed to test a candidate's understanding of security concepts such as security threats, security solutions, and security management. SC-900 exam also covers compliance concepts such as regulatory compliance, data protection, and risk management. Additionally, the exam covers identity management concepts such as authentication, authorization, and access control.

## Microsoft Security, Compliance, and Identity Fundamentals Sample Questions (Q81-Q86):

### NEW QUESTION # 81

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Communication compliance is configured by using the Microsoft 365 admin center.	<input type="radio"/>	<input type="radio"/>
Microsoft SharePoint Online supports communication compliance.	<input type="radio"/>	<input type="radio"/>
Communication compliance can remediate compliance issues.	<input type="radio"/>	<input type="radio"/>

### Answer:

Explanation:

Answer Area	Statements	Yes	No
	Communication compliance is configured by using the Microsoft 365 admin center.	<input type="radio"/>	<input checked="" type="radio"/>
	Microsoft SharePoint Online supports communication compliance.	<input type="radio"/>	<input checked="" type="radio"/>
	Communication compliance can remediate compliance issues.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

No

No

Yes

Microsoft states that Communication Compliance is administered in Microsoft Purview, not the Microsoft 365 admin center. The Learn article shows configuration and policy templates "in the Microsoft Purview portal" and directs admins to "configure Communication Compliance" there, confirming the management plane is the Purview compliance portal, not the M365 admin center.

Regarding supported locations, Microsoft lists the communication channels that policies can inspect:

"Microsoft Teams... Exchange Online... Viva Engage... [and] Third-party sources." SharePoint Online is not listed among supported channels, so SharePoint content isn't monitored by Communication Compliance policies.

Finally, Communication Compliance includes built-in workflows to address findings. The Learn page explicitly provides a Remediate step: "Remediate Communication Compliance issues you investigate by using the following options:" such as "Notify the user" and "Escalate to another reviewer." These actions demonstrate that the solution does more than detect; it supports remediation within the Purview portal workflow.

Exact extracts (selected):

- \* "You can choose from the following policy templates in the Microsoft Purview portal."
- \* "Communication Compliance policies check... Microsoft Teams... Exchange Online... Viva Engage... Third-party sources."
- \* "Remediate Communication Compliance issues you investigate by using the following options: Notify the user... Escalate to another reviewer."

#### NEW QUESTION # 82

Which three authentication methods can be used by Azure Multi-Factor Authentication (MFA)? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. phone call
- B. security question
- C. Microsoft Authenticator app
