

# Clearer AD0-E725 Explanation - AD0-E725 Reliable Exam Materials

DOWNLOAD the newest ValidVCE AD0-E725 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1t6U8gpmEfuDohl5QuUzmNGR5t\\_HQWkIS](https://drive.google.com/open?id=1t6U8gpmEfuDohl5QuUzmNGR5t_HQWkIS)

Our company is a professional certificate exam materials provider, and we have rich experiences in this field. AD0-E725 study guide are high quality, since we have a professional team to collect the information for the exam, and we can ensure you that AD0-E725 study guide you receive are the latest information we have. In order to strengthen your confidence for AD0-E725 Exam Dumps, we are pass guarantee and money back guarantee. If you fail to pass the exam, we will give you full refund. We offer you free update for one year for AD0-E725 exam dumps, and the update version will be sent to your email automatically.

ValidVCE provides you with actual Adobe AD0-E725 dumps in PDF format, Desktop-Based Practice tests, and Web-based Practice exams. These 3 formats of Adobe Commerce Developer Expert exam preparation are easy to use. This is a printable Adobe AD0-E725 PDF dumps file. The Adobe AD0-E725 Pdf Dumps enables you to study without any device, as it is a portable and easily shareable format, thus you can study Adobe AD0-E725 dumps on your preferred smart device such as your smartphone or in hard copy format.

## AD0-E725 Reliable Exam Materials, AD0-E725 Pdf Files

As we mentioned above that the Adobe Commerce Developer Expert (AD0-E725) exam questions is provided to students in three different formats. The first format is Adobe Commerce Developer Expert PDF dumps which is printable and portable. It means students can save it on their smart devices like smartphones, tablets, and laptops. The Adobe Commerce Developer Expert (AD0-E725) PDF dumps format can be printed so that candidates don't face any issues while preparing for the Adobe Commerce Developer Expert exam.

### Adobe AD0-E725 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>Section 1: Architecture: This section of the exam measures the skills of Backend Developers and covers the core structural concepts of Adobe Commerce. It involves demonstrating effective cache implementation, understanding key code components like plugins and observers, and managing multi-site configurations on a single instance. The domain also includes explaining the use of Git patches, critical security features, the CRON scheduling system, and how indexing functions within the platform.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>External Integrations: This section of the exam measures the skills of Integration Specialists and focuses on connecting Adobe Commerce with external SaaS services. It encompasses the skills needed to customize data flows, utilize Adobe App Builder for extensibility, and implement Adobe I</li> <li>O events and webhooks to create automated and connected business processes.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Customizations: This section of the exam measures the skills of Solutions Engineers and involves modifying and extending platform functionality. This includes customizing core areas like the product catalog, checkout process, and admin panel, as well as manipulating data entities, customizing APIs, working with message queues, and writing integration tests to ensure code quality and functionality.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Cloud: This section of the exam measures the skills of Cloud Architects and covers the deployment and management of Adobe Commerce on cloud infrastructure. It requires explaining the fundamental cloud architecture, performing setup and configuration tasks, and utilizing the Adobe Commerce Cloud CLI tool to manage the environment effectively.</li> </ul>

## Adobe Commerce Developer Expert Sample Questions (Q43-Q48):

### NEW QUESTION # 43

A client is setting up an Adobe Commerce B2B store and wants to start offering a Payment on Account option for their customers when placing orders.

How should the Developer achieve this?

- A. Create and implement a new Payment Method to provide credit accounts to customers.
- B. Install and activate the native Adobe Commerce module which activates payment.**
- C. Repurpose the native Cash on Delivery method.

**Answer: B**

Explanation:

Adobe Commerce B2B includes a native "Payment on Account" module, which is part of the B2B suite. This module allows customers with company accounts to place orders on account (credit).

A (repurpose COD) is a hack and not recommended.

C (create new payment method) is unnecessary since Adobe Commerce already includes this B2B feature.

B is correct: simply enable the native B2B Payment on Account module.

Reference:

Adobe Commerce B2B DevDocs - Payment on Account

### NEW QUESTION # 44

A client receives an alert stating that storage on their production environment is nearly full. They are using Pro architecture and are concerned about storage capacity. A Developer is asked to increase the disk size.

How should this problem be solved?

- A. Open a ticket with Adobe support.**
- B. Extend their Adobe license.
- C. Modify the magento.app.yaml file.

**Answer: A**

Explanation:

In Adobe Commerce Cloud Pro environments, disk allocation is provisioned at the infrastructure level and cannot be changed directly by developers. Increasing disk size requires assistance from Adobe's Cloud Ops team via a support ticket.

A (license extension) is unrelated to storage.

B (magento.app.yaml) configures services and resources but cannot increase allocated disk space.

C is correct: Adobe support ticket is required.

Reference:

Adobe Commerce Cloud DevDocs - Request support for Pro environments

#### NEW QUESTION # 45

A Developer is working on an Adobe Commerce Cloud project and needs to upgrade a Redis service on production to the latest version for improved performance and security.

Which step should the Developer follow to upgrade the installed service version in Adobe Commerce Cloud?

- A. Use the magento-cloud service:update command.
- B. Submit a ticket to Adobe support.
- C. Edit the services.yaml file to specify the new service version.

**Answer: C**

Explanation:

Service versions (Redis, MySQL, Elasticsearch, RabbitMQ, etc.) are defined in the services.yaml file in Adobe Commerce Cloud.

To upgrade a service version, the developer updates the version number in services.yaml and redeploys.

A (support ticket) is not required unless there is a provisioning problem.

C (magento-cloud service:update) is not a valid CLI command.

B is correct: update services.yaml and redeploy.

Reference:

Adobe Commerce Cloud DevDocs - services.yaml

#### NEW QUESTION # 46

A customer wants their Adobe Commerce Cloud platform to be upgraded to the latest available official version. They would like to assess the compatibility of their current version compared to the upgraded version.

How should the Developer gather this information and compile an upgrade plan for the customer?

- A. Familiarize themselves with the minimum system requirements of Adobe Commerce.
- B. Run the Site-Wide Analysis Tool (SWAT) which provides detailed information on the system.
- C. Run the command bin/magento upgrade:compatibilityreport to export the needed information.

**Answer: C**

Explanation:

Adobe Commerce provides a built-in Upgrade Compatibility Tool (UCT) that allows developers to check for potential code incompatibilities before performing a version upgrade.

The UCT:

\* Analyzes the current codebase against the target upgrade version.

\* Reports on deprecated classes, methods, and APIs that could break during the upgrade.

\* Produces a compatibility report (HTML/CSV/JSON) that can be shared with customers as part of the upgrade plan.

This tool is specifically designed to help developers assess upgrade risks and is the official Adobe Commerce-recommended method for preparing upgrade assessments.

\* Option A (SWAT): The Site-Wide Analysis Tool provides performance, configuration, and health insights, but it does not analyze code compatibility for upgrades.

\* Option B (minimum system requirements): This ensures the environment is technically capable of running the new version but does not provide insights into custom code and extension compatibility.

Official Documentation Extracts:

\* "The Upgrade Compatibility Tool helps you identify potential issues in your custom code when upgrading to a new Adobe Commerce release. It scans your codebase and produces a report highlighting possible code changes that may be required."- Adobe Commerce DevDocs: Upgrade Compatibility Tool

\* "Run bin/magento upgrade:compatibilityreport to generate the upgrade compatibility report. The report provides details about deprecated and removed code, APIs, and incompatibilities."- Adobe Commerce CLI Reference

### NEW QUESTION # 47

A Developer needs to set up a message queue topic in Adobe Commerce to asynchronously handle order processing. Which XML file should the Developer use to configure this?

- A. communication.xml
- B. queue\_consumer.xml
- C. queue\_topology.xml

**Answer: A**

Explanation:

The communication.xml file is used to define message queue topics and link publishers with subscribers. This is required when setting up asynchronous handling for events such as order processing.

B (queue\_topology.xml): Defines queue and exchange structure.

C (queue\_consumer.xml): Defines consumers for queues but does not declare topics.

A is correct: communication.xml is the right file for defining topics.

Reference:

Adobe Commerce DevDocs - communication.xml reference

In Adobe Commerce's Message Queue Framework (MQF), several XML configuration files are used, each with a specific purpose:

communication.xml # Defines message queue topics and the messages they carry.

Topics represent logical channels that connect publishers and consumers.

Example: An order placement event may publish a message to a topic like order.processing.

queue\_topology.xml # Defines the relationship between topics and queues.

Maps a topic to one or more queues.

Specifies routing and exchange bindings.

queue\_consumer.xml # Defines consumers that process messages from queues.

Each consumer is a PHP class responsible for handling a message pulled from a queue.

Since the question specifically asks about setting up a topic (not the routing or consumer), the correct configuration file is communication.xml.

Official Documentation Extracts:

"The communication.xml file defines the messages and topics in the message queue framework."- Adobe Commerce DevDocs: Message queues configuration

"Use queue\_topology.xml to bind topics to queues and define exchanges."- Message Queues: Topology configuration

"Consumers are defined in queue\_consumer.xml. A consumer listens to a queue and processes incoming messages."- Message Queues: Consumer configuration

### NEW QUESTION # 48

.....

In this knowledge-dominated world, the combination of the knowledge and the practical working competences has been paid high attention to is extremely important. If you want to improve your practical abilities you can attend the certificate examination. Our AD0-E725 exam questions are compiled by experts and approved by authorized personnel and boost varied function so that you can learn AD0-E725 Test Torrent conveniently and efficiently. Our passing rate is 98%-100% and there is little possibility for you to fail in the exam. But if you are unfortunately to fail in the exam we will refund you in full immediately.
