Moreover, you can alter settings of these C_S4EWM_2023 practice exams to suit your learning requirements.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q75-Q80):

NEW QUESTION # 75

What can you do with a hotspot in the warehouse management monitor?

- A. Change from the list view to the form view of the selected object.
- B. Call the corresponding user interface on the selected object.
- C. Create a basic measurement service.
- **D. Call a method to perform actions on the selected object.**

Answer: D

Explanation:

A hotspot in the SAP Warehouse Management Monitor allows you to:

* B. Call a Method to Perform Actions on the Selected Object:

* Hotspots enable execution of predefined methods, such as triggering actions or navigating to specific functions related to the object in focus.

Incorrect Options:

- * A: Calling user interfaces is not the purpose of hotspots.
- * C: Changing from list view to form view is unrelated to hotspot functionality.
- * D: Creating basic measurement services is outside the scope of hotspots.

References:

* SAP Help Portal: Warehouse Management Monitor Features

* SAP EWM Documentation: Hotspots and Methods in the Monitor

NEW QUESTION # 76

You have maintained several process types that should all use the same storage type search sequence for putaway. You want to minimize customizing efforts and create only one entry for these process types. What can you use to achieve this goal?

- A. Storage process
- B. Putaway control indicator
- **C. Process type group**
- D. Activity assigned to process type

Answer: C

NEW QUESTION # 77

What do you influence with a resource group definition?

- A. The queues a resource should process
- B. The bin access type limitations of the resource
- C. The operating environment of the resource
- D. The horizontal and vertical speed of a resource

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

A resource group in SAP EWM links resources to specific tasks. Option B ("The queues a resource should process") is correct because it determines which queues (task lists) the resource handles, configured in SPRO:

SCM Extended Warehouse Management > Resource Management > Define Resource Group. Options A (bin access), C (environment), and D (speed) are controlled by other settings like bin type restrictions or resource type parameters, not the group.

NEW QUESTION # 78

With SAP S/4HANA embedded EWM or EWM 9.5, you can skip certain document categories. Which document category combination is still mandatory?

- A. A production material request and a stock transfer
- B. An outbound delivery request and an outbound delivery
- C. An outbound delivery order and an outbound delivery
- D. An outbound delivery request and an outbound delivery order

Answer: C

NEW QUESTION # 79

What can you do with a hot-spot in the warehouse management monitor.

- A. Change from the list view to the form view of the selected object.
- B. Call the corresponding user interface on the selected object.
- C. Create a basic measurement service.
- D. Call a method to perform actions on the selected object.

Answer: D

Explanation:

Hot-Spot Functionality in the Warehouse Management Monitor

* A hot-spot is an interactive element in the Warehouse Management Monitor that allows you to trigger predefined actions directly on a selected object.

* Example: Clicking on a hot-spot in the monitor can execute a method such as releasing a warehouse task or reprocessing an object.

Excluded Options

* Option A: Creating a basic measurement service is not a hot-spot function; it is part of cockpit configuration.

* Option C: Switching between list and form views is a UI navigation feature, not specific to hot-spots.

* Option D: Calling a UI interface can be indirectly related but is not the primary function of a hot-spot.

SAP S/4HANA Cloud Private Edition Reference

* Refer to SAP documentation under Warehouse Management Monitor Functions and Features for more details.

NEW QUESTION # 80

.....
