ITIL4-DPI Valid Test & ITIL4-DPI Cert Material & ITIL4-DPI Sure Pass Exam

A ITIL ITIL4-DPI practice questions is a helpful, proven strategy to crack the ITIL ITIL4-DPI exam successfully. It helps candidates to know their weaknesses and overall performance. BraindumpsPrep software has hundreds of ITIL exam dumps that are useful to practice in real time. The ITIL 4 Strategist: Direct, Plan and Improve (DPI) (ITIL4-DPI) practice questions have a close resemblance with the actual ITIL4-DPI exam.

ITIL 4 Strategist: Direct, Plan and Improve (DPI) Sample Questions (Q21-Q26):

NEW QUESTION # 21

An organization has determined that a significant percentage of incidents have delayed resolutions because they are escalated to the wrong team, and need to be reassigned before they can be resolved. They plan to improve the flow of work by improving the accuracy of incident escalation.

What is this an example of?

- A. Organizational change management
- B. Addressing the four dimensions
- **C. Elimination of waste**
- D. Collecting feedback

Answer: C

Explanation:

ITIL DPI applies Lean principles such as the elimination of waste. Repeated reassignments and delays in incident handling represent a form of waste in workflow. Improving accuracy of escalation removes unnecessary handoffs and accelerates resolution, optimizing flow. This aligns with Lean-inspired waste elimination. OCM (D) is about managing people through change, not fixing workflow inefficiencies.

(Reference: ITIL 4 Strategist DPI, section on "Lean principles - eliminate waste and optimize flow")

NEW QUESTION # 22

A retailer is considering introducing a new virtual reality feature to its online presence. Recognizing this is a significant effort requiring new skills and technology, the CIO has asked the operations manager to assess the impact to the organization.

Which assessment method would work BEST in this situation?

- A. Customer satisfaction analysis
- B. Process maturity assessment
- **C. Gap analysis**
- D. SLA achievement analysis

Answer: C

Explanation:

In ITIL DPI, gap analysis is used to compare the current state against the desired future state. Since the retailer is adopting new technology and skills, gap analysis identifies capability shortfalls and resource needs to support the change. Customer satisfaction analysis (A) and SLA analysis (C) measure service performance, not organizational readiness. Process maturity assessment (D) examines process capability but not the holistic gap to achieve new capabilities.

(Reference: ITIL 4 Strategist DPI, section on "Assessment methods - gap analysis for change initiatives")

NEW QUESTION # 23

A service provider has developed a strategy to increase its revenue by launching a new cloud storage service. This strategy is being cascaded down to the technical teams. Which is a relevant objective that will support the strategy?

- A. Increase profit by launching new wi-fi services into new geographic markets
- **B. Design and implement new infrastructure by the end of quarter 2**
- C. Average number of storage access failures per month
- D. Achieve a 10% increase in service requests fulfilled in the target time

Answer: B

Explanation:

ITIL DPI emphasizes that objectives must cascade logically from strategy into actionable plans. Since the strategic goal is to launch a new cloud storage service, the technical objective must directly support that initiative. "Design and implement new infrastructure by the end of quarter 2" is aligned, measurable, and time-bound. The other options either do not directly relate to the cloud service (B, C) or are ongoing operational metrics (A), not strategic enablers. (Reference: ITIL 4 Strategist DPI, section on "Cascading objectives and alignment with strategy")

NEW QUESTION # 24

The IT organization of a large company has an existing improvement programme. Individual IT divisions have fully embraced continual improvement. The business has seen areas of improved performance, but the improvements do not last long. Which action BEST maintains long-term improvement?

- A. Developing a business case for continual improvement and asking for support from senior management
- B. Starting all improvement efforts with a clear understanding of the current and desired future state
- **C. Establishing a strong governance capability to help build a culture of continual improvement**
- D. Developing a value stream map for the continual improvement effort to better understand how it is working

Answer: C

Explanation:

In DPI, sustainable continual improvement requires embedding it into the organization's governance structures. Governance ensures accountability, decision-making, and cultural reinforcement that prevents improvements from being short-lived. Option A is part of the continual improvement model but does not ensure sustainability. Option B helps with funding, not culture. Option D is useful for visualization but not long-term adoption. Only strong governance embeds continual improvement as an ongoing culture. (Reference: ITIL 4 Strategist DPI, section on "Governance and continual improvement culture")

NEW QUESTION # 25

A service provider is implementing a new self-service portal for users to request access to IT services. The portal will be made available to 5000 users across 50 sites. Which is the BEST guidance for producing guidelines for users of the self-service portal?

- **A. Produce simple guidelines for users of the self-service portal for access requests, making it clear who to contact for exceptions**
- B. Provide guidelines for using the self-service portal for access requests to the service desk staff so that they can help users
- C. Circulate detailed guidelines to users for using the self-service portal to request access to IT services
- D. Provide guidelines outlining the difference from previous methods of requesting access to IT services

Answer: A

Explanation:

DPI and the guiding principle "Keep it simple and practical" stress that guidance should be clear, concise, and user-friendly. With 5000 users, simple guidelines prevent confusion and reduce support overhead. Explicit instructions on who to contact for exceptions ensures smooth adoption. Options A and D risk overwhelming users with detail, while B shifts responsibility to the service desk instead of empowering users. (Reference: ITIL 4 Strategist DPI, section on "Organizational change management - communication and adoption support")
