Professional - Multicloud Infrastructure (v5.15) Exam  
Successfully

## NCP-MCI-5.15 Exam Questions

226Q&As

Real NCP-MCI-5.15 screenshot exam questions with 100% Passing Guarantee, as well as offering Instant download NCP-MCI-5.15 study guide, 1-Year Free Update, Money-Back Policy.

<https://www.itexamshop.com/questions/ncp-mci-5-15-exam-questions/>

Active 37% discount online are available for all IT certification exam questions. During the process of making an order, the discount will be automatically taken effect.

Free update for 365 days are available for NCP-MCI-7.5 exam dumps, that is to say, if you buy NCP-MCI-7.5 study guide materials from us, you can get the latest information for free in the following year. Besides, NCP-MCI-7.5 exam dumps are compiled by experienced experts, and they are quite familiar with the exam center, and therefore the quality and exam dumps can be guaranteed. And we have online and offline chat service staff for NCP-MCI-7.5 Exam Materials, they have professional knowledge for the exam dumps, and if you have any questions about NCP-MCI-7.5 exam materials, just consult us.

ExamsTorrent offers a full refund guarantee according to terms and conditions if you are not satisfied with our Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) 7.5 (NCP-MCI-7.5) product. You can also get free Nutanix Dumps updates from ExamsTorrent within up to 365 days of purchase. This is a great offer because it helps you prepare with the latest Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) 7.5 (NCP-MCI-7.5) dumps even in case of real Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) 7.5 (NCP-MCI-7.5) exam changes. ExamsTorrent gives its customers an opportunity to try its NCP-MCI-7.5 product with a free demo.

>> Valid NCP-MCI-7.5 Exam Guide <<

**2026 Nutanix NCP-MCI-7.5: High Hit-Rate Valid Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) 7.5 Exam Guide**

Through a large number of simulation tests, you can rationally arrange your own NCP-MCI-7.5 exam time, adjust your mentality in the examination room, find your own weak points and carry out targeted exercises. But I am so sorry to say that NCP-MCI-7.5 test answers can only run on Windows operating systems and our engineers are stepping up to improve this. In fact, many people only spent 20-30 hours practicing our NCP-MCI-7.5 Guide Torrent and passed the exam. This sounds incredible, but we did, helping them save a lot of time.

## Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) 7.5 Sample Questions (Q59-Q64):

### NEW QUESTION # 59

A node in a 3-node cluster is running out of physical resources. All three nodes are equally configured. An administrator wants to live migrate VMs to another node, but is unable to do so.

What is causing this issue?

- A. VMs have GPU passthrough.
- B. VMs have vGPU.
- C. VMs have memory overcommitment.
- D. VMs have vNUMA enabled.

**Answer: A**

Explanation:

Nutanix documentation clearly states that guest VMs with GPU passthrough cannot be migrated to other hosts in the cluster. By contrast, Nutanix does support live migration for some vGPU-enabled VMs under supported conditions, but not for passthrough GPUs. That distinction is exactly what this question is testing.

Therefore the correct answer is D. (portal.nutanix.com, portal.nutanix.com, portal.nutanix.com) This is a high-value exam distinction: vGPU and GPU passthrough are not interchangeable in migration behavior. Memory overcommitment and vNUMA may affect placement or performance, but they are not the documented hard stop presented here. If a VM uses GPU passthrough, live migration is not supported, so the administrator cannot evacuate it the way they can with ordinary VMs.

### NEW QUESTION # 60

An administrator needs to protect a volume group using a protection policy that supports an RPO of 1 hour.

The environment consists of two clusters in different geographic regions. Which replication type should be used?

- A. Synchronous
- B. NearSync
- C. Asynchronous
- D. Metro Availability

**Answer: C**

Explanation:

Nutanix DR documentation for volume groups distinguishes replication types by RPO range. Nutanix documents Asynchronous Replication as the model for 1 hour or more RPO, while NearSync covers 1 minute to 15 minutes, and synchronous/Metro designs target near-zero or zero-RPO behavior with tighter latency expectations. Since the requirement here is 1 hour and the clusters are in different geographic regions, Asynchronous is the correct fit. That makes D the right answer.

The geography in the question is also a clue. Synchronous and Metro Availability are usually associated with low-latency links and more demanding network requirements, which are not implied by "different geographic regions." NearSync is too aggressive for a 1-hour target and is documented for much shorter RPO windows.

Nutanix's own replication taxonomy places 1 hour or more squarely in the Asynchronous category, so D is the authentic answer.

### NEW QUESTION # 61

An administrator needs to change the bond type on an existing virtual switch in a production AHV cluster running critical workloads.

The administrator wants to avoid any disruption to running VMs during the change.

How should the administrator complete this task?

- A. Place all of the nodes in maintenance mode simultaneously, then apply the bond type change.
- B. Delete the virtual switch and recreate it with a new bond type to avoid a rolling update.

- C. Use the Quick method to apply changes without putting nodes into maintenance mode.
- D. Use the Standard method to migrate VMs and apply changes sequentially to each node.

**Answer: D**

Explanation:

Nutanix documentation for updating an existing virtual switch describes both Quick and Standard (Recommended) methods. Nutanix explicitly recommends the Standard method for production-style changes because it applies updates in a controlled rolling manner, typically by migrating workloads and updating nodes sequentially to minimize impact. The Quick method is available only in certain update scenarios and is not the recommended path for critical workloads when avoiding disruption is the priority. That makes A correct. ( portal.nutanix.com , portal.nutanix.com , portal.nutanix.com ) Deleting and recreating the switch would be far more disruptive. Putting all nodes into maintenance mode at once defeats the entire purpose of non-disruptive rolling change. Nutanix's own recommendation in this area is the strongest clue: for production, use the Standard method.

### NEW QUESTION # 62

An administrator manages a 3-node AHV cluster and needs to optimize overall cluster consumption starting from a recording server workload that stores MP4 videos on dedicated local vDisks. Specifications:

Compression: post process 60 min

Capacity dedupe: disabled

Erasure coding: Disabled

Which configuration would best improve cluster performance?

- A. Create a storage policy to disable compression.
- B. Move data from local vDisk to a Nutanix Files NFS share.
- C. Enable capacity deduplication at storage container level.
- D. Configure Erasure Coding with 1 minute delay.

**Answer: A**

Explanation:

This workload stores MP4 video files, which are typically large, sequential, and already compressed. For data with those characteristics, additional compression work often provides little benefit and can create unnecessary processing overhead. The best optimization is to disable compression for that workload through a storage policy so cluster resources are not wasted trying to compress data that is unlikely to shrink meaningfully. ( Nutanix Portal ) The other choices are weaker for this scenario. Capacity deduplication is generally most beneficial for repeated blocks or common-image patterns, not unique media streams. Erasure Coding is a capacity- efficiency feature, but on a small 3-node cluster and for a write-heavy recording pattern, it is not the primary performance optimization answer. Moving the data to Files changes the access method, but it does not address the specific inefficiency already identified in the storage settings. Nutanix exams often test whether the administrator can match the data service to the workload profile. Since MP4 content is already compressed, removing unnecessary compression overhead is the most targeted and sensible answer, making D correct. ( Nutanix Portal )

### NEW QUESTION # 63

An administrator is configuring Runway Analysis settings in Prism Central and selects Auto Detect under Reserve Capacity For Failure.

How will runway capacity be calculated in this configuration?

- A. The runway analysis reserves a fixed 10% of cluster CPU, memory, and storage capacity by default.
- B. The runway analysis calculates capacity using the full cluster resources but automatically adds a performance buffer.
- C. The runway analysis reserves capacity only for storage resources while CPU and memory remain unchanged.
- D. The runway analysis excludes the resources of the largest node so estimates account for a node failure.

**Answer: D**

Explanation:

Nutanix documentation for Updating Capacity Configurations explains that the Reserve Capacity For Failure option determines whether runway analysis should account for the impact of a node failure, and when Auto Detect is selected, Prism Central automatically uses the cluster's failure assumptions rather than the full unconstrained cluster total. In practical runway terms, that means the calculation reflects the loss of the node whose failure would have the greatest effect on usable capacity. Among the provided options, the best match for that documented logic is D: the runway analysis excludes the resources of the largest node so

estimates account for a node failure. ( Nutanix Portal ) This behavior is important because runway is intended to answer "how long until I run out of safe usable capacity," not just "how long until all raw resources are consumed." Nutanix therefore lets administrators model capacity while preserving headroom for failure scenarios. The fixed 10% answer is too generic and not how Nutanix documents the option. Storage-only reservation also misses the fact that runway tracks CPU, memory, and storage dimensions. So, based on Nutanix's Auto Detect wording and the resilience-oriented design of runway planning, D is the most authentic answer. ( Nutanix Portal )

## NEW QUESTION # 64

.....

We are committed to helping you pass the exam and get the certificate as soon as possible. NCP-MCI-7.5 exam bootcamp of us have the questions and answers, and it not only have quality but also contain certain quantity, it will be enough for you to deal with your exam. With the pass rate more than 98.65%, we can ensure you pass your exam NCP-MCI-7.5 Exam Dumps also have most of knowledge points of the exam, and they may help you a lot. We offer you free update for 365 days after you purchase the NCP-MCI-7.5 exam bootcamp.

**Exam NCP-MCI-7.5 Labs:** <https://www.examstorrent.com/NCP-MCI-7.5-exam-dumps-torrent.html>

Nutanix Valid NCP-MCI-7.5 Exam Guide It is very convenient, In the content of NCP-MCI-7.5 exam VCE, we give you more details about test and information of website, Nutanix NCP-MCI-7.5 dumps torrent and NCP-MCI-7.5 test questions have three versions: the PDF version, the software version and the online version, which can meet your needs during your NCP-MCI-7.5 exam preparation. If you have never bought our NCP-MCI-7.5 exam materials on the website before, we understand you may encounter many problems such as payment or downloading NCP-MCI-7.5 practice quiz and so on, contact with us, we will be there.

Its extensively illustrated, attractive format will also appeal NCP-MCI-7.5 to users who just want to dip in and out for specific knowledge and skills, Major differences exist in the formulas.

It is very convenient, In the content of NCP-MCI-7.5 Exam Vce, we give you more details about test and information of website, Nutanix NCP-MCI-7.5 dumps torrent and NCP-MCI-7.5 test questions have three versions: the PDF version, the software version and the online version, which can meet your needs during your NCP-MCI-7.5 exam preparation.

## 100% Pass Quiz Nutanix - Latest NCP-MCI-7.5 - Valid Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) 7.5 Exam Guide

If you have never bought our NCP-MCI-7.5 exam materials on the website before, we understand you may encounter many problems such as payment or downloading NCP-MCI-7.5 practice quiz and so on, contact with us, we will be there.

We guarantee you that our top-rated Nutanix NCP-MCI-7.5 practice exam will enable you to pass the Nutanix NCP-MCI-7.5 certification exam on the very first go.
