FCP_FAZ_AN-7.4 Materials & Latest FCP_FAZ_AN-7.4 Exam Guide

Fortinet FCP_FAZ_AN-7.4 practice test software can be used on devices that range from mobile devices to desktop computers. We provide the Fortinet FCP_FAZ_AN-7.4 exam questions in a variety of formats, including a web-based practice test, desktop practice exam software, and downloadable PDF files. Itcerttest provides proprietary preparation guides for the certification exam offered by the Fortinet FCP_FAZ_AN-7.4 Exam Dumps. In addition to containing numerous questions similar to the Fortinet FCP_FAZ_AN-7.4 exam, the Fortinet FCP_FAZ_AN-7.4 exam questions are a great way to prepare for the Fortinet FCP_FAZ_AN-7.4 exam dumps.

Fortinet FCP - FortiAnalyzer 7.4 Analyst Sample Questions (Q26-Q31):

NEW QUESTION # 26

Which two of the following must you configure on FortiAnalyzer to email a FortiAnalyzer report externally? (Choose two.)

- A. SFTP server
- B. Mail server
- C. Output profile
- D. Report scheduling

Answer: B,C

NEW QUESTION # 27

When managing incidents on FortiAnlyzer, what must an analyst be aware of?

- A. Incidents must be acknowledged before they can be analyzed.
- B. Severity incidents rated with the level High have an initial service-level agreement (SLA) response time of 1 hour.
- C. The status of the incident is always linked to the status of the attach event.
- D. You can manually attach generated reports to incidents.

Answer: D

Explanation:
In FortiAnalyzer's incident management system, analysts have the option to manually manage incidents, which includes attaching relevant reports to an incident for further investigation and documentation. This feature allows analysts to consolidate information, such as detailed reports on suspicious activity, into an incident record, providing a comprehensive view for incident response.
Let's review the other options to clarify why they are incorrect:
Option A: You can manually attach generated reports to incidents
This is correct. FortiAnalyzer allows analysts to manually attach reports to incidents, which is beneficial for providing additional context, evidence, or analysis related to the incident. This functionality is part of the incident management process and helps streamline information for tracking and resolution.
Option B: The status of the incident is always linked to the status of the attached event This is incorrect. The status of an incident on FortiAnalyzer is managed independently of the status of any attached events. An incident can contain multiple events, each with different statuses, but the incident itself is tracked separately.
Option C: Severity incidents rated with the level High have an initial service-level agreement (SLA) response time of 1 hour This is incorrect. While incidents have severity levels, specific SLA response times are typically set according to the organization's incident response policy, and FortiAnalyzer does not impose a default SLA response time of 1 hour for high-severity incidents.
Option D: Incidents must be acknowledged before they can be analyzed
This is incorrect. Incidents on FortiAnalyzer can be analyzed even if they are not yet acknowledged. Acknowledging an incident is often part of the workflow to mark it as being actively addressed, but it is not a prerequisite for analysis.

NEW QUESTION # 28

Refer to the exhibit.

The exhibit shows "remoteservergroup" is an authentication server group with LDAP and RADIUS servers.

Which two statements express the significance of enabling "Match all users on remote server" when configuring a new administrator? (Choose two.)

- A. Use remoteadmin from LDAP and RADIUS servers will be able to log in to FortiAnalyzer at anytime.
- B. It creates a wildcard administrator using LDAP and RADIUS servers.
- C. Administrator can log in to FortiAnalyzer using their credentials on remote servers LDAP and RADIUS.
- D. It allows administrators to use two-factor authentication.

Answer: B,C

NEW QUESTION # 29

Which two statements about log forwarding are true? (Choose two.)

- A. The client retains a local copy of the logs after forwarding.
- B. You can use aggregation mode only with another FortiAnalyzer.
- C. Logs are forwarded in real-time only.
- D. Forwarded logs cannot be filtered to match specific criteria.

Answer: A,B

NEW QUESTION # 30

What must you consider when using log fetching? (Choose two.)

- A. The archive logs retrieved from the server become archive logs in the client.
- B. The fetching profile must include a user with the Super_User profile.
- C. You can use filters to include only logs from a single device.
- D. The fetch client can retrieve logs from devices that are not added to its local Device Manager.

Answer: C,D

NEW QUESTION # 31
......

The content of our study materials is easy to be mastered and has simplified the important information. Our FCP_FAZ_AN-7.4 test questions convey more important information with less questions and answers and thus make the learning relaxing and efficient. The software boosts self-learning and self-assessment functions to check the results of the learning. The software can help the learners find the weak links and deal with them. Our FCP_FAZ_AN-7.4 Test Questions boost timing function and the function to stimulate the exam. Our FCP_FAZ_AN-7.4 exam materials have simplified the complicated notions and add the instances , the stimulation and the diagrams to explain any contents which are hard to explain. So you can enjoy the service of high quality and pass the exam successfully.

FCP_FAZ_AN-7.4 Materials: https://www.itcerttest.com/FCP_FAZ_AN-7.4_braindumps.html

With the good FCP_FAZ_AN-7.4 latest prep torrent, you can get your certification at your first try, The high-efficiency FCP_FAZ_AN-7.4 sure prep torrent will bring you surprise, Fortinet Valid Test FCP_FAZ_AN-7.4 Braindumps Are you a brave person, Fortinet Valid Test FCP_FAZ_AN-7.4 Braindumps This is the right kind of helping tool which will provide you the biggest success with maximum ease and comfort in the test, We provide 24-hour online service on the FCP_FAZ_AN-7.4 training engine.
