

# Achieve Success 100% With NGFW-Engineer Exam Questions In The First Attempt

[www.nwexam.com](http://www.nwexam.com) PDF

Section	Weight	Objectives
		<ul style="list-style-type: none"><li>- Use APIs to automate deployment</li><li>- Manage third-party services to deploy NGFWs (e.g., Kubernetes, hypervisors, CSPs, Terraform, Ansible)</li><li>- Use on-premises centralized management<ul style="list-style-type: none"><li>• Panorama</li><li>• Templates and device groups</li><li>• Pre- and post-ruleset</li></ul></li><li>- Build Application Command Center (ACC) dashboards and custom reports</li></ul>

What type of questions are on the Palo Alto NGFW-Engineer exams?

- Single answer multiple choice
- Multiple answer multiple choice
- Drag and Drop (DND)
- Router Simulation
- Testlet

## NGFW-Engineer Practice Exam Questions.

Grab an understanding from these [Palo Alto NGFW-Engineer](#) sample questions and answers and improve your NGFW-Engineer exam preparation towards attaining a Next-Generation Firewall Engineer Certification. Answering these sample questions will make you familiar with the types of questions you can expect on the actual exam. Doing practice with Next-Generation Firewall Engineer questions and answers before the exam as much as possible is the key to passing the Palo Alto NGFW-Engineer certification exam.

Next-Generation Firewall Engineer Sample Questions:-

**01. What is the function of a Certificate Revocation List (CRL) in a PKI?**

- a) Lists expired certificates
- b) Lists certificates that have been revoked before their expiration date
- c) Lists all issued certificates
- d) Lists certificates pending renewal

**Answer: b**

**02. How do Zone Protection Profiles enhance network security?**

- a) By providing protection against flood attacks, reconnaissance scans, and packet-based threats

As is known to us, the high pass rate is a reflection of the high quality of NGFW-Engineer study torrent. The more people passed their exam, the better the study materials are. There are more than 98 percent that passed their exam, and these people both used our NGFW-Engineer test torrent. There is no doubt that our Palo Alto Networks Next-Generation Firewall Engineer guide torrent has a higher pass rate than other study materials. We deeply know that the high pass rate is so important for all people, so we have been trying our best to improve our pass rate all the time. Now our pass rate has reached 99 percent. If you choose our NGFW-Engineer study torrent as your study tool and learn it carefully, you will find that it will be very soon for you to get the Palo Alto Networks Next-Generation Firewall Engineer certification in a short time. Do not hesitate and buy our NGFW-Engineer test torrent, it will be very helpful for you.

## Palo Alto Networks NGFW-Engineer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• PAN-OS Device Setting Configuration: This section evaluates the expertise of System Administrators in configuring device settings on PAN-OS. It includes implementing authentication roles and profiles, and configuring virtual systems with interfaces, zones, routers, and inter-VSYS security. Logging mechanisms such as Strata Logging Service and log forwarding are covered alongside software updates and certificate management for PKI integration and decryption. The section also focuses on configuring Cloud Identity Engine User-ID features and web proxy settings.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• PAN-OS Networking Configuration: This section of the exam measures the skills of Network Engineers in configuring networking components within PAN-OS. It covers interface setup across Layer 2, Layer 3, virtual wire, tunnel interfaces, and aggregate Ethernet configurations. Additionally, it includes zone creation, high availability configurations (active and active</li> <li>• active and active</li> <li>• passive), routing protocols, and GlobalProtect setup for portals, gateways, authentication, and tunneling. The section also addresses IPSec, quantum-resistant cryptography, and GRE tunnels.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Integration and Automation: This section measures the skills of Automation Engineers in deploying and managing Palo Alto Networks NGFWs across various environments. It includes the installation of PA-Series, VM-Series, CN-Series, and Cloud NGFWs. The use of APIs for automation, integration with third-party services like Kubernetes and Terraform, centralized management with Panorama templates and device groups, as well as building custom dashboards and reports in Application Command Center (ACC) are key topics.</li> </ul>

## Palo Alto Networks Next-Generation Firewall Engineer Exam Questions Can Help You Gain Massive Knowledge - DumpsValid

For candidates who prefer a more flexible and convenient option, Palo Alto Networks provides the NGFW-Engineer PDF file, which can be easily printed and studied at any time. The PDF file contains the latest real Palo Alto Networks Next-Generation Firewall Engineer (NGFW-Engineer) questions, and NGFW-Engineer ensures that the file is regularly updated to keep up with any changes in the exam's content.

## Palo Alto Networks Next-Generation Firewall Engineer Sample Questions (Q36-Q41):

### NEW QUESTION # 36

An organization has configured GlobalProtect in a hybrid authentication model using both certificate-based authentication for the pre-logon stage and SAML-based multi-factor authentication (MFA) for user logon.

How does the GlobalProtect agent process the authentication flow on Windows endpoints?

- A. The GlobalProtect agent uses the machine certificate during pre-logon for initial tunnel establishment, and then seamlessly reuses the same machine certificate for user-based authentication without requiring MFA.
- B. GlobalProtect requires the user to log in first for SAML-based MFA before establishing the pre-logon tunnel, rendering the pre-logon certificate authentication (CA) flow redundant.
- C. The GlobalProtect agent uses the machine certificate to establish a pre-logon tunnel; upon user sign-in, it prompts for SAML-based MFA credentials, ensuring both device and user identities are validated before granting full access.
- D. Once the machine certificate is validated at pre-logon, the Windows endpoint completes MFA on behalf of the user by passing existing Windows Credential Provider details to the GlobalProtect gateway without prompting the user.

**Answer: C**

Explanation:

In a hybrid authentication model with both certificate-based authentication for pre-logon and SAML-based multi-factor authentication (MFA) for user logon, the GlobalProtect agent processes the flow as follows:

During the pre-logon stage, the agent uses the machine certificate to authenticate and establish the initial VPN tunnel.

Once the user logs in (after the machine is connected), the agent then triggers SAML-based MFA to ensure the user is authenticated with multi-factor authentication, validating both the device and the user identity before granting full access.

This method ensures that both the device and user are properly authenticated and validated in the hybrid authentication model.

### NEW QUESTION # 37

What is the purpose of assigning an Admin Role Profile to a user in a Palo Alto Networks NGFW?

- A. Define granular permissions for management tasks.

- B. Restrict access to sensitive report data.
- C. Enable multi-factor authentication (MFA) for administrator access.
- D. Allow access to all resources without restrictions.

**Answer: A**

Explanation:

Assigning an Admin Role Profile to a user in a Palo Alto Networks NGFW is used to define granular permissions for management tasks. This allows administrators to control what actions a user can perform on the firewall, such as configuration changes, monitoring, and logging. By assigning different admin roles, you can ensure that users have access only to the areas and tasks they need, enforcing the principle of least privilege.

#### NEW QUESTION # 38

In an active/active high availability (HA) configuration with two PA-Series firewalls, how do the firewalls use the HA3 interface?

- A. To forward packets to the HA peer during session setup and asymmetric traffic flow
- B. To synchronize sessions, forwarding tables, IPSec security associations, and ARP tables between firewalls in an HA pair
- C. To exchange hellos, heartbeats, HA state information, and management plane synchronization for routing and User-ID information
- D. To perform session cache synchronization among all HA peers having the same cluster ID

**Answer: D**

Explanation:

In an active/active HA configuration with two PA-Series firewalls, the HA3 interface is used primarily for the exchange of HA state information between the firewalls. This includes:

Hellos and heartbeats to monitor the status of the HA peer.

Synchronization of management plane data, which includes critical routing and User-ID information.

#### NEW QUESTION # 39

Which zone type allows traffic between zones in different virtual systems (VSYS), without the traffic leaving the firewall?

- A. Transient
- B. Internal
- C. Isolated
- D. External

**Answer: A**

Explanation:

The Transient zone type is used to allow traffic between zones in different virtual systems (VSYS) on a Palo Alto Networks firewall without the traffic leaving the firewall. It provides a way for virtual systems to communicate with each other by acting as a temporary or intermediary zone. Traffic can pass through the firewall between the virtual systems without requiring physical interfaces or leaving the device.

#### NEW QUESTION # 40

For explicit proxy deployment, which port is typically used by the client browsers to send requests to the proxy?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

#### NEW QUESTION # 41

We promise during the process of installment and payment of our Palo Alto Networks Next-Generation Firewall Engineer prep torrent, the security of your computer or cellphone can be guaranteed, which means that you will be not afraid of virus intrusion and personal information leakage. Besides we have the right to protect your email address and not release your details to the 3rd parties. Moreover if you are not willing to continue our NGFW-Engineer Test Braindumps service, we would delete all your information instantly without doubt. The main reason why we try our best to protect our customers' privacy is that we put a high value on the reliable relationship and mutual reliance to create a sustainable business pattern.
