Records are processed by the Maintain Project Enterprise Labor Resources process in ascending order based on the process order value that you specify on the Create Condition page. For example, assume that an HCM person is included in a condition with a process order value of 1. If a resource doesn't already exist for that person, then the process creates a resource for the condition with the process order value of 1. The process doesn't create more than one resource for the same person even if subsequent conditions apply to the person.

If multiple conditions have the same process order value, then records are processed in ascending alphabetic order based on the condition name.
