Having all the information about the Adobe Commerce Developer Expert (AD0-E725) Exam at your fingertips enhances your studying experience, making it easier and more effective, whether you're at home or on the go.

Adobe AD0-E725 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Section 1: Architecture: This section of the exam measures the skills of Backend Developers and covers the core structural concepts of Adobe Commerce. It involves demonstrating effective cache implementation, understanding key code components like plugins and observers, and managing multi-site configurations on a single instance. The domain also includes explaining the use of Git patches, critical security features, the CRON scheduling system, and how indexing functions within the platform.
Topic 2	<ul style="list-style-type: none">• Customizations: This section of the exam measures the skills of Solutions Engineers and involves modifying and extending platform functionality. This includes customizing core areas like the product catalog, checkout process, and admin panel, as well as manipulating data entities, customizing APIs, working with message queues, and writing integration tests to ensure code quality and functionality.
Topic 3	<ul style="list-style-type: none">• Cloud: This section of the exam measures the skills of Cloud Architects and covers the deployment and management of Adobe Commerce on cloud infrastructure. It requires explaining the fundamental cloud architecture, performing setup and configuration tasks, and utilizing the Adobe Commerce Cloud CLI tool to manage the environment effectively.
Topic 4	<ul style="list-style-type: none">• External Integrations: This section of the exam measures the skills of Integration Specialists and focuses on connecting Adobe Commerce with external SaaS services. It encompasses the skills needed to customize data flows, utilize Adobe App Builder for extensibility, and implement Adobe I• O events and webhooks to create automated and connected business processes.

Besides, we offer the exact questions with correct answers, which can ensure you 100% pass in your Adobe AD0-E725 Actual Test. We have 100% money back guarantee, in case of failure, we will give you full refund.

Adobe Commerce Developer Expert Sample Questions (Q20-Q25):

NEW QUESTION # 20

A client is setting up an Adobe Commerce B2B store and wants to start offering a Payment on Account option for their customers when placing orders.

How should the Developer achieve this?

- A. Create and implement a new Payment Method to provide credit accounts to customers.
- **B. Install and activate the native Adobe Commerce module which activates payment.**
- C. Repurpose the native Cash on Delivery method.

Answer: B

Explanation:

Adobe Commerce B2B includes a native "Payment on Account" module, which is part of the B2B suite. This module allows customers with company accounts to place orders on account (credit).

A (repurpose COD) is a hack and not recommended.

C (create new payment method) is unnecessary since Adobe Commerce already includes this B2B feature.

B is correct: simply enable the native B2B Payment on Account module.

NEW QUESTION # 21

A Developer is integrating a custom third-party gift card system into the Adobe Commerce checkout. During checkout, a customer enters a store-bought gift card for payment, and depending on external API checks, the gift card is verified and allowed to be used on the order.

Which approach should be used for the internal processing of such functionality?

- **A. Create a unique voucher code for each gift card usage request which grants a discount on the order's total.**
- B. Directly subtract the gift card amount from the order, keeping no history of the discount transaction.
- C. Create an Adobe Commerce gift card account and manage the account using the gift card repositories.

Answer: A

Explanation:

The correct way to integrate external gift cards is to generate a unique discount (voucher code) that maps to the validated gift card value. This approach ensures that the transaction is recorded in Magento's discount system, preserving order and accounting integrity.

A is incorrect because Adobe Commerce gift card accounts are native to the Commerce Gift Card module and not applicable to external systems.

C is incorrect as directly subtracting amounts without transaction history violates best practices and auditability.

B is correct: mapping external validation into a voucher/discount ensures proper tracking.

NEW QUESTION # 22

An Adobe Commerce Developer is tasked with adding additional data to an order entity in REST API.

Remembering upgradability, which solution should the developer implement?

- A. Use API events.
- B. Use interceptor plugins.
- C. Use extension attributes.

Answer: C

Explanation:

The correct way to expose additional data for service contracts (such as REST or GraphQL APIs) is via Extension Attributes.

A (plugins): Not intended for exposing new data in APIs.

C (events): Cannot modify service contract data structures.

B is correct: Extension Attributes allow adding new fields to API entities while maintaining backward compatibility and upgradability.

Adobe Commerce DevDocs - Extension attributes

NEW QUESTION # 23

A client requests changes to their Pro Staging and Production environments. They supply a Developer with different domains for new websites to be created with the goal of expanding operations to multiple countries, doubling the current number of SKUs, and adding more customer groups.

Which two issues should the Developer anticipate based on the requested changes? (Choose two.)

- A. Recreate hierarchy navigation for every new website.
- B. Multiple websites may require duplicating custom functionality for each store, which increases code redundancy.
- C. Additional stores can lead to a longer indexing process and slower response times for noncached catalog pages.
- D. Catalog data expands as the number of websites and stores are increased.

Answer: C,D

NEW QUESTION # 24

A customer wants their Adobe Commerce Cloud platform to be upgraded to the latest available official version. They would like to assess the compatibility of their current version compared to the upgraded version.

How should the Developer gather this information and compile an upgrade plan for the customer?

- A. Familiarize themselves with the minimum system requirements of Adobe Commerce.
- B. Run the command `bin/magento upgrade:compatibility:report` to export the needed information.
- C. Run the Site-Wide Analysis Tool (SWAT) which provides detailed information on the system.

Answer: B

NEW QUESTION # 25

.....

With our excellent AD0-E725 exam questions, you can get the best chance to obtain the AD0-E725 certification to improve yourself, for better you and the better future. With our AD0-E725 training guide, you are acknowledged in your profession. The AD0-E725 exam braindumps can prove your ability to let more big company to attention you. Then you have more choice to get a better job and going to suitable workplace. Why not have a try on our AD0-E725 Exam Questions, you will be pleasantly surprised our AD0-E725 exam questions are the best preparation material.
