

Professional VMware - 2V0-17.25 - VMware Cloud Foundation 9.0 Administrator Key Concepts

P.S. Free & New 2V0-17.25 dumps are available on Google Drive shared by PassTestking: <https://drive.google.com/open?id=1ibjNGbGmSDZpSxEPQ28eJeOPPBkak5sD>

With the increasing marketization, the product experience marketing has been praised by the consumer market and the industry. Attract users interested in product marketing to know just the first step, the most important is to be designed to allow the user to try before buying the VMware Cloud Foundation 9.0 Administrator study training dumps, so we provide free pre-sale experience to help users to better understand our products. The user only needs to submit his E-mail address and apply for free trial online, and our system will soon send free demonstration research materials of 2V0-17.25 Latest Questions to download. If the user is still unsure which is best for him, consider applying for a free trial of several different types of test materials. It is believed that through comparative analysis, users will be able to choose the most satisfactory 2V0-17.25 test guide.

VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.
Topic 2	<ul style="list-style-type: none"> IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.
Topic 3	<ul style="list-style-type: none"> Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.

Topic 4	<ul style="list-style-type: none"> VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.

Reliable VMware 2V0-17.25 Test Guide - 2V0-17.25 Latest Exam Cram

If you want to progress and achieve their ideal life, if you are not satisfied with life now, if you still use the traditional methods by exam, so would you please choose the 2V0-17.25 test materials, it will surely make you shine at the moment. Our 2V0-17.25 latest dumps provide users with three different versions, including a PDF version, a software version, and an online version. Although involved three versions of the teaching content is the same, but for all types of users can realize their own needs, whether it is which version of 2V0-17.25 Learning Materials, believe that can give the user a better learning experience. Below, I would like to introduce you to the main advantages of our research materials, and I'm sure you won't want to miss it.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q52-Q57):

NEW QUESTION # 52

An administrator has been tasked with configuring Single Sign-On (SSO) to a VMware Cloud Foundation (VCF) instance to provide Role-Based Access Control for a team of cloud administrators.

Once the initial configuration of VCF SSO has been completed, which three components must the administrator assign service roles in order to allow elevated access to the VCF management components?

(Choose three.)

- A. VMware NSX Manager
- B. VCF Installer
- C. VCF Operations
- D. VMware vCenter
- E. VMware ESX
- F. VMware vSAN

Answer: A,C,D

Explanation:

After configuring SSO in VCF, administrators must assign appropriate roles in the management components to grant elevated privileges.

VCF 9.0 architecture includes these primary management components:

- * vCenter Server (A) - Manages clusters and VMs.
- * NSX Manager (B) - Manages networking and security services.
- * VCF Operations (D) - Provides monitoring and operational visibility.

Roles must be assigned within each of these systems to allow full administrative access.

vSAN (E) and ESX (F) are managed through vCenter, not independently assigned service roles.

VCF Installer (C) is used for deployment and does not require ongoing RBAC assignments for operations.

Therefore, the correct components are vCenter, NSX Manager, and VCF Operations .

NEW QUESTION # 53

What are two benefits of enabling workload Management on a vSphere Cluster within a VI Workload Domain using SDDC Manager? (Choose two.)

- A. It enhances the security of the vSphere cluster.
- B. It allows the deployment of traditional VMs with enhanced performance.
- C. It enables the use of Kubernetes for container orchestration on the vSphere cluster.

- D. It integrates vSphere with third-party cloud providers.
- E. It integrates the vSphere supervisor with NSX Networking.

Answer: C,E

Explanation:

Workload Management integrates the vSphere Supervisor with NSX networking to provide Kubernetes control plane connectivity. It enables Kubernetes-based container orchestration directly on the vSphere cluster via the Supervisor control plane.

NEW QUESTION # 54

Which feature automatically balances virtual machine workloads across a cluster based on CPU and memory utilization?

- A. Storage vMotion
- B. vSphere HA
- C. Fault Tolerance
- D. vSphere DRS

Answer: D

Explanation:

Distributed Resource Scheduler (DRS) continuously monitors utilization and automatically places VMs on hosts to optimize resource distribution.

NEW QUESTION # 55

An administrator is deciding on a storage solution to create the first management workload domain for a new VMware Cloud Foundation (VCF) instance. Which three storage solutions can the administrator use as principal storage? (Choose three.)

- A. VMFS on Fibre Channel (FC)
- B. NFSv3
- C. Virtual Volumes (vVols)
- D. NVMe/TCP
- E. vSAN OSA

Answer: A,B,E

Explanation:

The management domain must be deployed using vSAN, NFS, or Fibre Channel (FC). Supported protocols include NFSv3 and VMFS on FC.

vSAN (including OSA) is the default recommended option, but NFSv3 and VMFS on FC are also supported for environments where external storage arrays are required.

NVMe/TCP and vVols are not supported for the initial management domain's principal storage.

vVols may be used in workload domains after deployment, but they are not a supported foundation for the management domain.

Therefore, the three correct storage solutions for the first management workload domain are:

VMFS on FC, NFSv3, and vSAN OSA.

NEW QUESTION # 56

An administrator logged into NSX Manager to view host details. The administrator noticed that the "Tunnel" status for the ESXi hosts, in the VI workload domain, is showing down.

What is a possible reason the ESXi host tunnels are showing down in NSX?

- A. The host TEP IP addresses are being dynamically assigned through DHCP instead of being statically assigned.
- B. The overlay traffic is being blocked by the gateway firewall.
- C. The MTU setting for the host TEPs has been set to 1500.
- D. The IGMP has been disabled on the network.

Answer: C

Explanation:

The "Tunnel" status in NSX indicates the status of the VXLAN tunnels used for communication between ESXi hosts. If the MTU setting for the host Tunnel Endpoint (TEP) is incorrectly set to 1500, this can cause issues with VXLAN encapsulation, as VXLAN packets typically require an MTU of at least 1600 bytes to function correctly. Setting the MTU too low can cause packet drops and result in the tunnel status being down.

NEW QUESTION # 57

.....

Are you still upset about how to pass VMware certification 2V0-17.25 exam? Are you still waiting for the latest information about VMware certification 2V0-17.25 exam? PassTestking has come up with the latest training material about VMware certification 2V0-17.25 exam. Do you want to pass VMware certification 2V0-17.25 exam easily? Please add PassTestking's VMware certification 2V0-17.25 exam practice questions and answers to your cart now! PassTestking has provided part of VMware Certification 2V0-17.25 Exam practice questions and answers for you on www.PassTestking.com and you can free download as a try. I believe you will be very satisfied with our products. With our products you can easily pass the exam. We promise that if you have used PassTestking's latest VMware certification 2V0-17.25 exam practice questions and answers exam but fail to pass the exam, PassTestking will give you a full refund.
