# Hot SAP C-AIG-2412 Questions & Reliable C-AIG-2412 Exam Online

P.S. Free 2025 SAP C-AIG-2412 dumps are available on Google Drive shared by PassTorrent: https://drive.google.com/open?id=1f_jBq2xfhhYBdMcLdiqeMJC5LGvYGoGI

Our SAP Certified Associate - SAP Generative AI Developer C-AIG-2412 questions PDF is a complete bundle of problems presenting the versatility and correlativity of questions observed in past exam papers. These questions are bundled into SAP Certified Associate - SAP Generative AI Developer PDF questions following the official study guide. SAP C-AIG-2412 PDF Questions are a portable, printable document that simultaneously plays on multiple devices. Our SAP C-AIG-2412 PDF questions consists of problems in all aspects, whether theoretical, practical, or analytical.

As what have been demonstrated in the records concerning the pass rate of our C-AIG-2412 free demo, our pass rate has kept the historical record of 98% to 99% from the very beginning of their foundation. During these years, our PDF version of our C-AIG-2412 study engine stays true to its original purpose to pursue a higher pass rate that has never been attained in the past. And you will be content about our considerate service on our C-AIG-2412 training guide. If you have any question, you can just contact us!

Reliable SAP C-AIG-2412 Exam Online - C-AIG-2412 Exam Introduction

We believe our C-AIG-2412 exam questions will meet all demand of all customers. If you long to pass the exam and get the certification successfully, you will not find the better choice than our C-AIG-2412 preparation questions. Now you can have a chance to try our C-AIG-2412 study braindumps before you pay for them. There are the free demos on our website for you download to check the quality and validity of our C-AIG-2412 practice engine. Just have a try, then you will fall in love with our C-AIG-2412 learning quiz!

SAP C-AIG-2412 Exam Syllabus Topics:

Topic	Details
Topic 1	• Large Language Models (LLMs): This section of the exam measures the skills of AI Developers and covers the practical use of large language models in SAP environments. Candidates are expected to understand how LLMs can be applied to automate tasks, enhance decision-making, and improve user interaction within SAP systems. The exam evaluates knowledge of handling model selection, fine-tuning, and adapting LLMs to specific business cases.
Topic 2	• SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers SAP's Generative AI Hub, which acts as the central layer for designing and managing generative AI solutions. The exam tests knowledge of building, deploying, and connecting AI models to business scenarios through the Hub. Emphasis is placed on leveraging the Hub to streamline workflows and ensure scalable solutions that align with organizational needs.

Topic 3	• Advanced AI Techniques with SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers advanced techniques available through SAP's Generative AI Hub. Candidates are assessed on their ability to design, optimize, and scale generative AI solutions that go beyond basic implementations. The focus includes applying sophisticated strategies to integrate advanced models, manage performance, and align AI-driven outcomes with complex enterprise goals.
Topic 4	• SAP AI Core: This section of the exam measures the skills of AI Developers and covers the fundamental components of SAP AI Core. Candidates are assessed on their ability to work with the core services that allow machine learning models to be deployed and managed within SAP environments. The focus is on understanding how AI Core fits into SAP's ecosystem and ensures smooth integration with enterprise applications.

SAP Certified Associate - SAP Generative AI Developer Sample Questions (Q41-Q46):

NEW QUESTION # 41

You want to download a json output for a prompt and the response.
Which of the following interfaces can you use in SAP's generative AI hub in SAP AI Launchpad?

- A. Prompt management
- B. Chat
- C. Administration
- D. Prompt Editor

Answer: A

NEW QUESTION # 42

What is the primary function of the embedding model in a RAG system?

- A. To encode queries and documents into vector representations for comparison
- B. To store vector representations of documents and search for relevant passages
- C. To generate responses based on retrieved documents and user queries
- D. To evaluate the faithfulness and relevance of generated Answers

Answer: A

Explanation:
In a Retrieval-Augmented Generation (RAG) system, the embedding model plays a crucial role in encoding textual data into vector representations, facilitating efficient retrieval and comparison.
1. Function of the Embedding Model:
* Vector Encoding:The embedding model transforms both user queries and documents into high- dimensional vector representations. This numerical encoding captures the semantic meaning of the text, enabling the system to assess similarities between different pieces of text effectively.
* Facilitating Retrieval:By encoding text into vectors, the system can perform efficient similarity searches within a vector database, identifying documents or passages that are most relevant to the user's query.
2. Importance in RAG Systems:
* Semantic Matching:The vector representations allow the system to match user queries with relevant documents based on semantic content rather than mere keyword overlap, enhancing the relevance of retrieved information.
* Efficiency:Vector-based retrieval is computationally efficient, enabling rapid identification of pertinent information from large datasets, which is essential for real-time applications.
3. Application in SAP's Generative AI Hub:
* Integration with HANA Vector Search:SAP's Generative AI Hub integrates embedding models with HANA's vector search capabilities, allowing for efficient storage and retrieval of vector embeddings.
This integration supports the development of RAG systems that can effectively utilize SAP's data assets.
* Generative AI Hub SDK:SAP provides an SDK that facilitates the implementation of embedding models within RAG systems, enabling developers to encode queries and documents into vector representations seamlessly.

NEW QUESTION # 43

Which of the following must you do before connecting to a dataset in order to train a machine learning model in SAP AI Core?

Note: There are 2 correct answers to this question.

- A. Provide the storage secret to access the dataset.
- B. Store the dataset in the SAP HANA Vector Engine.
- C. Store the dataset in a hyperscaler object store.
- D. Grant access rights to the SAP BTP cockpit.

Answer: A,C

NEW QUESTION # 44

What are some examples of generative AI technologies?

Note: There are 2 correct answers to this question.

- A. Rule-based algorithms
- B. AI models that generate new content based on training data
- C. Robotic process automation
- D. Foundation models

Answer: B,D

NEW QUESTION # 45

What are some drivers for the rapid adoption of generative AI?

Note: There are 2 correct answers to this question.

- A. Ease of use
- B. Wide availability
- C. Availability of skilled developers
- D. Significant hardware cost savings

Answer: A,B
