Pass Guaranteed Quiz High-quality JN0-650 - Enterprise Routing and Switching, Professional (JNCIP-ENT) Actual Test Pdf

If you feel unconfident in self-preparation for your JN0-650 test and want to get professional aid of questions and answers, VCETorrent JN0-650 test questions materials will guide you and help you to pass the certification exams in one shot. If you want to know our JN0-650 Test Questions materials, you can download our free demo now. Our demo is a small part of the complete charged version. Also you can ask us any questions about JN0-650 exam any time as you like.

If you want to make progress and mark your name in your circumstances, you should never boggle at difficulties. As far as we know, many customers are depressed by the exam ahead of them, afraid of they may fail it unexpectedly. Our JN0-650 exam tool has three versions for you to choose, PDF, App, and software. If you have any question or hesitate, you can download our free Demo. The Demo will show you part of the content of our JN0-650 Study Materials real exam materials. So you do not have to worry about the quality of our exam questions. Our JN0-650 exam tool have been trusted and purchased by thousands of candidates. What are you waiting for?

Free PDF 2026 Juniper Professional JN0-650: Enterprise Routing and Switching, Professional (JNCIP-ENT) Actual Test Pdf

Enterprise Routing and Switching, Professional (JNCIP-ENT) Exam Questions save your study time and help you prepare in less duration. We have hundreds of most probable questions which have a chance to appear in the real Enterprise Routing and

Switching, Professional (JNCIP-ENT) exam. The Juniper JN0-650 exam questions are affordable and 365 days free updated, and you can use them without any guidance. However, in case of any trouble, our support team is always available to sort out the problems. We will provide you with the information covered in the current test and incorporate materials that originate from Juniper JN0-650 Exam Dumps.

Juniper Enterprise Routing and Switching, Professional (JNCIP-ENT) Sample Questions (Q15-Q20):

NEW QUESTION # 15
You are currently using VLAN IDs 2 through 300 within your Layer 2 domain and you need to configure VSTP to prevent loops You must ensure that all VL ANs are loop free.
In this scenario, which statement is correct?

- A. You must ensure that the bridge priority is set to the lowest value on all switches in the Layer 2 domain
- B. You must enable all VLANs, 2 through 300, under the VSTP configuration
- C. You must enable RSTP to account for all VLANs
- D. You must ensure that the VLANs are balanced between two different root bridges

Answer: B

NEW QUESTION # 16
Exhibit

Referring to the exhibit, which two statements are correct? (Choose two.)

- A. The BGP configuration includes the multipath parameter.
- B. This route has two next hops available.
- C. This route has a hidden next hop.
- D. The BGP configuration is for IBGP

Answer: A,B

Explanation:
The exhibit shows the output of the command show route protocol bgp on router R1 for the prefix 172.16.10.1
/32. To determine the correct characteristics of this route, we analyze the specific BGP attributes and next-hop information provided in the routing table entry:
Multipath Parameter (Option B): The routing table shows two distinct paths for the prefix 172.16.10.1/32. The first path has two next hops (192.168.10.1 and 192.168.20.1) and is marked with the plus symbol (+) and the asterisk (*), indicating it is both an active and the best route. The presence of multiple next hops being used simultaneously for a single BGP path is a clear indication that the multipath parameter is enabled in the BGP configuration. In Junos OS, BGP multipath allows the installation of multiple equal-cost BGP paths into the forwarding table to facilitate load balancing.
Available Next Hops (Option C): The output explicitly lists two functional next hops for the active path:
192.168.10.1 via ge-1/0/0.2 and 192.168.20.1 via ge-1/0/1.3. Both show an outgoing interface, confirming that this route has two next hops available for traffic forwarding.
IBGP vs. EBGP (Option A): The BGP routes shown have an AS path of 200 I. This indicates the routes were learned from an external Autonomous System (AS 200). Furthermore, the protocol preference is 170. In Junos OS, the default preference for External BGP (EBGP) is 170, whereas the default preference for Internal BGP (IBGP) is 200. Therefore, this configuration is for EBGP, not IBGP.
Hidden Next Hops (Option D): The summary line at the top of the exhibit mentions that there are "2 hidden" routes in the inet.0 table. However, these hidden routes are not the next hops for the 172.16.10.1/32 prefix. A hidden route is a prefix that was rejected by policy or has an unreachable next hop; it is not a "hidden next hop" belonging to an active route.

NEW QUESTION # 17
There are two BGP routes to 10.200.200.0/24 received from two external peers. Route 1 comes from a neighbor with a router ID of 10.10.100.1 and a peer IP address of 10.10.30.1, and route 2 comes from a neighbor with a router ID of 10.10.200.1 and a peer IP address of 10.10.50.1. Both routes have the same MED value, origin value, AS path length, and local preference number.
In this scenario, which statement is correct about the active route?

- A. Route 2 will be active because of the peer IP address.

- B. Route 1 will be active because of the router ID.
- C. Route 2 will be active because of the router I
- D. Route 1 will be active because of the peer IP address.

Answer: B

NEW QUESTION # 18

You have a multicast enabled network that uses PIM sparse mode.
Which two statements are true? (Choose two.)

- A. The end receiver sends a register stop message to the source DR when it receives the first packets of a multicast flow.
- B. The source DR sends a register stop message to the source DR when it begins forwarding traffic on the shortest path free.
- C. The RP sends a register stop message to the source DR when it receives the first packets of a multicast flow.
- D. The source DR encapsulates multicast traffic of a new flow and unicasts it to the RP.

Answer: C,D

NEW QUESTION # 19

Which two options are MAC limit actions? (Choose two.)

- A. forwarding-class
- B. log
- C. drop
- D. tcp-reset

Answer: B,C

NEW QUESTION # 20

......

PayPal is the safer and world-widely using in the international online trade. We hope all candidates can purchase JN0-650 latest exam braindumps via PayPal. Though PayPal require that sellers should be "Quality first, integrity management", if your products and service are not like what you promise, PayPal will block sellers' account. But PayPal can guarantee sellers and buyers' account safe while paying for JN0-650 Latest Exam braindumps with extra tax. SWREG will cost extra tax such as intellectual property taxation.
