

NetSec-Pro Quiz | NetSec-Pro Authentic Exam Questions

P.S. Free & New NetSec-Pro dumps are available on Google Drive shared by TrainingDumps: <https://drive.google.com/open?id=19Zv7y6Fg0No-93l6N2yb0e26w-Te4knN>

It is not hard to know that Palo Alto Networks Network Security Professional torrent prep is compiled by hundreds of industry experts based on the syllabus and development trends of industries that contain all the key points that may be involved in the examination. NetSec-Pro guide torrent will never have similar problems, not only because NetSec-Pro exam torrent is strictly compiled by experts according to the syllabus, which are fully prepared for professional qualification examinations, but also because NetSec-Pro Guide Torrent provide you with free trial services. Before you purchase, you can log in to our website and download a free trial question bank to learn about NetSec-Pro study tool.

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.
Topic 2	<ul style="list-style-type: none">• GFW and SASE Solution Maintenance and Configuration: This domain evaluates the skills of network security administrators in maintaining and configuring Palo Alto Networks hardware firewalls, VM-Series, CN-Series, and Cloud NGFWs. It includes managing security policies, profiles, updates, and upgrades. It also covers adding, configuring, and maintaining Prisma SD-WAN including initial setup, pathing, monitoring, and logging. Maintaining and configuring Prisma Access with security policies, profiles, updates, upgrades, and monitoring is also assessed.
Topic 3	<ul style="list-style-type: none">• Platform Solutions, Services, and Tools: This section measures the expertise of security engineers and platform administrators in Palo Alto Networks NGFW and Prisma SASE products. It involves creating security and NAT policies, configuring Cloud-Delivered Security Services (CDSS) such as security profiles, User-ID and App-ID, decryption, and monitoring. It also covers the application of CDSS for IoT security, Enterprise Data Loss Prevention, SaaS Security, SD-WAN, GlobalProtect, Advanced WildFire, Threat Prevention, URL Filtering, and DNS security. Furthermore, it includes aligning AIOps with best practices through administration, dashboards, and Best Practice Assessments.

Palo Alto Networks NetSec-Pro Authentic Exam Questions | Exam NetSec-Pro Reviews

Our products are the accumulation of professional knowledge worthy practicing and remembering. There are so many specialists who join together and contribute to the success of our NetSec-Pro guide quiz just for your needs. Our responsible and patient staff who has being trained strictly before get down to business and interact with customers. Once you have practiced and experienced the quality of our NetSec-Pro Exam Preparation, you will remember the serviceability and usefulness of them. It explains why our NetSec-Pro practice materials helped over 98 percent of exam candidates get the certificate you dream of successfully. Believe me you can get it too.

Palo Alto Networks Network Security Professional Sample Questions (Q68-Q73):

NEW QUESTION # 68

Which offering can be managed in both Panorama and Strata Cloud Manager (SCM)?

- **A. VM-Series Next-Generation Firewall (NGFW)**
- B. SaaS Security
- C. Prisma SD-WAN
- D. Autonomous Digital Experience Manager (ADEM)

Answer: A

Explanation:

The VM-Series NGFWs are designed to integrate seamlessly with both Panorama and Strata Cloud Manager (SCM), allowing administrators to manage physical and virtual firewall deployments from either interface.

You can manage VM-Series Next-Generation Firewalls using either Panorama for centralized management of all firewalls or Strata Cloud Manager for cloud-based management, giving flexibility across hybrid environments.

Unified management flexibility is key for enterprises with hybrid or multi-cloud deployments.

NEW QUESTION # 69

In a service provider environment, what key advantage does implementing virtual systems provide for managing multiple customer environments?

- A. Shared threat prevention policies across all tenants
- B. Centralized authentication for all customer domains
- C. Unified logging across all virtual systems
- **D. Logical separation of control and Security policy**

Answer: D

Explanation:

Virtual systems provide logical separation in a single physical firewall, allowing different customers (or tenants) to have isolated control and security policies.

Virtual systems enable service providers to offer logically separated, independent environments on a single firewall. Each virtual system can have its own security policies, interfaces, and administrators.

This ensures secure, tenant-specific segmentation within multi-tenant environments.

NEW QUESTION # 70

Which two security services are required for configuration of NGFW Security policies to protect against malicious and misconfigured domains? (Choose two.)

- **A. Advanced DNS Security**
- B. Advanced WildFire
- **C. Advanced Threat Prevention**
- D. SaaS Security

Answer: A,C

Explanation:

Protecting against malicious and misconfigured domains requires two critical services:

Advanced Threat Prevention

Provides signature-based and advanced analysis to identify threats, including DNS-based attacks.

"Advanced Threat Prevention enables the NGFW to detect and prevent exploits and malware-based communications, including those leveraging DNS." (Source: Advanced Threat Prevention) Advanced DNS Security Specifically designed to detect and sinkhole malicious and misconfigured DNS queries.

"DNS Security uses real-time intelligence to block DNS-based threats, protect against data exfiltration, and automatically sinkhole suspicious domain lookups." (Source: DNS Security) By combining these services in security policies, NGFWs ensure robust protection against domain-based threats and misconfigurations.

NEW QUESTION # 71

A network engineer pushes specific Panorama reports of new AI URL category types to branch NGFWs. Which two report types achieve this goal? (Choose two.)

- A. SNMP
- B. Custom
- C. PDF summary
- D. CSV export

Answer: B,C

Explanation:

Panorama allows engineers to create custom reports and generate PDF summary formats for consistent reporting across NGFWs. Custom Reports

Custom Reports provide tailored reporting based on URL categories, application usage, and threat visibility. They are generated within Panorama and can include data on newly categorized AI URL types.

PDF Summaries

You can generate PDF summary reports to distribute these insights across branch firewalls, providing an easy-to-read format for compliance and operational review.

Together, these options provide a consistent, standardized method to push insights about AI- based URL categories to branch devices.

NEW QUESTION # 72

Which of the following are considered best practices for network hardening on Palo Alto firewalls?
(Choose two)

- A. Use User-ID and Device-ID-based policies
- B. Enable unused administrative interfaces
- C. Segment networks using zones
- D. Disable logging

Answer: A,C

Explanation:

Use User-ID and Device-ID-based policies: This approach enhances security by allowing granular policy enforcement based on authenticated user identity and device information, rather than just IP addresses, improving control and reducing attack surfaces.

Segment networks using zones: Network segmentation by creating zones helps isolate different network areas, limits lateral movement of threats, and enables precise policy enforcement between network segments, which is fundamental for robust security posture.

NEW QUESTION # 73

.....

There is plenty of skilled and motivated staff to help you obtain the Palo Alto Networks Network Security Professional exam certificate that you are looking forward. We have faith in our professional team and our NetSec-Pro Study Tool, and we also wish you trust us wholeheartedly. Because of this function, you can easily grasp how the practice system operates and be able to get hold of the core knowledge about the Palo Alto Networks Network Security Professional exam. In addition, when you are in the real exam environment, you can learn to control your speed and quality in answering questions and form a good habit of doing exercise, so that you're going to be fine in the Palo Alto Networks Network Security Professional exam.
