No matter how much you study, it can be difficult to feel confident going into the VMware vSphere 8.x Advanced Design (3V0-21.23) exam. However, there are a few things you can do to help ease your anxiety and boost your chances of success. First, make sure you prepare with real VMware 3V0-21.23 Exam Dumps. If there are any concepts you're unsure of, take the time to take 3V0-21.23 Practice Exams until you feel comfortable. Buy VMware vSphere 8.x Advanced Design (3V0-21.23) preparation material from a trusted company such as Actual4Exams. This will ensure you get updated VMware vSphere 8.x Advanced Design (3V0-21.23) study material to cover everything before the big day.

## VMware 3V0-21.23 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Plan and Design the VMware Solution: This part targets Solution Designers, evaluating their ability to gather business objectives, create conceptual models based on these objectives, develop logical designs, and translate them into physical designs that meet specific requirements like manageability or security.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>VMware Products and Solutions: Targeting VMware Engineers, this section describes VMware Cloud Foundation architecture, its components like vSphere and NSX, benefits such as automation and scalability, and use cases like hybrid cloud environments. It assesses understanding of VMware Validated Solutions.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers differentiating between business and technical requirements, as well as conceptual, logical, and physical design. A key skill measured is "Designing System Availability."</li> </ul>

## 3V0-21.23 New Dumps Book | 3V0-21.23 Exam Topics

Actual4Exams trained experts have made sure to help the potential applicants of VMware vSphere 8.x Advanced Design certification to pass their VMware vSphere 8.x Advanced Design exam on the first try. Our PDF format carries real VMware 3V0-21.23 Exam Dumps. You can use this format of VMware 3V0-21.23 actual questions on your smart devices.

### VMware vSphere 8.x Advanced Design Sample Questions (Q26-Q31):

#### NEW QUESTION # 26

An architect is reviewing the security and compliance requirements for a new application that will be hosted on a vSphere 8 environment.

The following information has been noted about the new application:

The application stores and processes confidential data

The supporting virtual infrastructure is shared with other departments

No other application stores or processes confidential data

The application virtual machines must be able to run on any ESXi host in the cluster The storage layer is a iSCSI attached SAN Data at Rest Encryption is in place for each presented LUN validated to FIPS 140-2 No budget is available for additional infrastructure components or software Application data must not be accessible outside of the application's virtual machines The architect has been tasked with providing a secure virtual machine design to host the application.

Which three design elements must the architect include to meet the requirements? (Choose three.)

- A. External Key Management Service (KMS) provider
- B. A new encrypted iSCSI LUN
- C. VMware vSAN
- D. A new local VMFS volume
- E. Virtual Machine Encryption
- F. The vSphere Native Key Provider

**Answer: B,E,F**

#### NEW QUESTION # 27

During a requirements gathering workshop, the customer provides the following information:

- Each host has 2 × 10 GbE NIC

- EtherChannel is not currently configured

- No changes can be made to the physical network

- Network throughput must be prioritized for defined critical services

Which two recommendations should the architect make with regard to virtual networking?

(Choose two.)

- A. Use Network I/O Control with Shares.
- B. Use Network I/O Control with Limits.
- C. Use Link Aggregation Control Protocol (LACP).
- D. Use Route Based on Physical NIC Load.
- E. Use Network I/O Control with Reservation.

**Answer: A,D**

Explanation:

Use route based on Physical NIC load, to maximize the total throughput. And then use Shares to prioritize.

### NEW QUESTION # 28

The Chief Information Security Officer (CISO) for an organization is concerned about the security posture of the operating system images that are used for the provisioning of their Software-as-a-Service (SaaS) applications. The organization is in a growth period. The organization is opening a new data center to launch its next phase of new SaaS-based solutions.

The DevOps team currently creates encrypted virtual machine (VM) templates that are used for various operating systems and adds these to the vSphere inventory. The DevOps team already uses a published content library and has been granted a role with the ability to add and delete library items.

The following requirements have been noted:

- Impacts to the DevOps team's operational processes must be kept to a minimum
- The DevOps team must be able to regularly check out a copy of the image for updates and check in a new version of the image.
- Images must be synchronized from the primary data center to the new data center.

Which three recommendations should the architect make to design a content library solution that will meet these requirements- (Choose three.)

- A. Clone virtual machines as Open Virtualization Format (OVF) templates to the published content library
- **B. Create a subscription and publish VM templates to a subscribed content library**
- **C. Clone virtual machines as VM templates to the published content library**
- D. Create a subscribed library from the published library and synchronize Open Virtualization Format (OVF) templates on-demand
- **E. Update the role for the DevOps team with new privileges**
- F. Create a subscribed library from the published library and synchronize Open Virtualization Format (OVF) templates automatically

**Answer: B,C,E**

Explanation:

Content Library in vSphere 7 has a few new privileges that are important to bring up as well as a few existing ones that should be considered. Please refer to the chart below for more details.

### NEW QUESTION # 29

An architect is designing a solution for an environment with two types of resource profiles that must be virtualized. The first type consists of Tier 1 virtual machines that are disk I/O intensive, but do NOT require high CPU or memory. The second type consists of Tier 2 virtual machines that require a lower CPU and memory allocation and have minimal disk I/O.

Which design recommendation should the architect make for distributing the resource profiles?

- A. Separate the two resource profiles into two clusters. The Tier 1 cluster will have fast storage while the Tier 2 cluster will not.
- B. Run both resource profiles on the same cluster with host hardware that has fast CPU, large amounts of memory, and the fastest storage platform
- **C. Run both resource profiles on the same cluster with the same host hardware platform**
- D. Separate the two resource profiles into two clusters. The Tier 2 cluster will have faster CPU and more memory while the Tier 1 cluster will have slower CPU and less memory but more disk space.

**Answer: C**

Explanation:

Both resource profiles DO NOT require high CPU or memory, only a different level of disk IOPS.

We can use vSAN here to apply a storage policy to the the different tier VM's.

### NEW QUESTION # 30

An architect is tasked with designing a repeatable edge hosting solution using VMware technologies that can be deployed to existing hotels across the world and operate independently of other locations.

During interviews with stakeholders, the architect notes the following information:

There are 123 hotels in total.

All hotels have a minimum of two 1 Gbps connections for guest Internet access.

The company operates hotels in four countries: Canada, USA, Cuba and Mexico.

The company is rebranding the hotels located in Mexico.

Which of these is a business factor that will impact this design?

- **A. The company is rebranding the hotels located in Mexico.**
- B. There are 123 hotels in total
- C. The company operates hotels in four countries: Canada, USA, Cuba and Mexico.
- D. All hotels have a minimum of two 1 Gbps connections for guest Internet access.

**Answer: A**

Explanation:

This is a business factor that will impact the design because rebranding the hotels in Mexico could lead to changes in the company's requirements, such as the need for new branding, updated infrastructure, or integration of new services. These factors will influence the design decisions related to the edge hosting solution, potentially requiring special configurations or considerations for these locations.

### NEW QUESTION # 31

.....

You may have gone through a lot of exams. Now if you go to the exam again, will you feel anxious? 3V0-21.23 study guide can help you solve this problem. When you are sure that you really need to obtain an internationally certified 3V0-21.23 certificate, please select our 3V0-21.23 exam questions. You must also realize that you really need to improve your strength. Our company has been developing in this field for many years.
