#### Scenario

#### Additional Information

Further information on some resources who could be involved in the project:

Outcome Account Manager: He represents Outcome which is a recruitment agency that provides specialist outsourcing resources. Outcome provided the consultants who carried out the feasibility study and the same consultants will be providing support and guidance to the Information Technology and Facilities teams during the project.

Director of Finance Division: She was transferred from the Information Technology Division 12 months ago.

She is responsible for ensuring a cost-conscious approach is adopted in all operational and project activities across the Ministry of Food Hygiene.

Hardware Manager: Reports to the Director of Information Technology. He provides computer hardware to all business functions but has little awareness of the needs of his colleagues working in software.

Payroll Manager: Reports to the Director of Finance. He is a very experienced and efficient qualified accountant who has much of the responsibility of running the Finance Division on behalf of the Director of Finance. He has been involved in drafting the Ministry's business strategy and assisting in a full business risk assessment. He also drafted the corporate Business Case standards.

Which 2 alternative actions apply to the proposed user assurance for this project?

- B. Retain because selecting only one of them may cause unnecessary conflict.
- C. Retain because they are both very positive about outsourcing the selected business functions.
- D. Retain because their divisions will be the major users of the outsourced services and they can provide the user perspective on the impact of any proposed changes.

### 質問 # 113

Scenario

Additional Information

Extract from the Communication Management Strategy.

The project information in the table below is true, but it may not be recorded under the correct heading or be in the correct document.

Using the Project Scenario, select the appropriate response to each of the following 5 questions which have been raised by the Project Board.

The project is now at the end of the initiation stage. Having decided that the Calendar project is a relatively simple project, the Project Manager combined the Starting Up a Project process and the Initiating a Project process. No Project Brief has been produced. Instead the Project Manager used the project mandate to produce a simple Project Initiation Documentation (PIO). The PIO includes the Business Case, a product checklist and several Product Descriptions, Including the Project Product Description. Short sections are also included for each of the strategies and the controls to be applied. The Project Manager has elected to use the Daily Log to record all risks, issues, lessons and quality - results.

After the initiation stage there will be two further stages during which a small number of Work Packages will be authorized. While these are being managed, the Project Manager will hold regular checkpoints, which will support the production of weekly Highlight Reports to the Project Board.

There is no mention of any Stage Plans, yet there are two further stages proposed. How will this be resolved?

- A. Whilst the activities are divided into two further stages, there is no reason why the Calendar project should use stages. The project will therefore be run as a single stage project and the activities will be added to the Initiation Stage Plan.
- B. There will be three Stage Plans, the two management stages plus an additional stage to plan and complete the activities of the Closing a Project process.
- C. It is appropriate for the Calendar project to be run as two further stages as there is a key decision to be made at the end of stage 2. Stage Plans will be produced.
