SAP C-S4CPB-2502 certification is a reference of

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q13-Q18):

NEW QUESTION # 13
Which of the following actions does the lead configuration expert carry out during the content deployment phase in the SAP S/4HANA Cloud starter system? Note: There are 3 correct answers to this question.

- A. Create two projects
- B. Confirm primary HCM settings
- C. Define the scope
- D. Confirm primary logistics settings
- E. Confirm primary finance settings

Answer: A,C,D

Explanation:
For implementing SAP S/4HANA Cloud Public Edition for a customer, the following systems are commonly used:
* Sandbox system: This system is used in the very early stages of the project for exploration and trying out different configurations without affecting the development or production environments. It's a safe space for experimentation.
* Development system: This system is where the initial setup and customizations are made. Configuration changes, custom development, and extensions are carried out here before being moved to the test system for further testing.
* Test system: After configurations and developments are done in the development system, they are transported to the test system. This environment is used for rigorous testing to ensure that everything works as expected and to identify any issues before moving to the production environment.
These systems play crucial roles in the implementation process, allowing for a structured and phased approach to setting up, customizing, testing, and finally deploying SAP S/4HANA Cloud Public Edition.

NEW QUESTION # 14
Which type of testing should be done after a release upgrade has occurred?

- A. Integration tests
- B. User Acceptance tests
- C. String tests
- D. Regression tests

Answer: D

Explanation:
Regression tests are a type of testing that should be done after a release upgrade has occurred. Regression tests are performed to ensure that the existing functionality of the system is not affected by the changes introduced by the new release. Regression tests help to identify any defects or errors that may have been introduced or uncovered by the release upgrade. Regression tests are part of the quality assurance process and are essential for ensuring the stability and reliability of the system. References = SAP S/4HANA Cloud, Public Edition - All Learning Journeys | SAP Learning -> Implementing SAP S/4HANA Cloud Public Edition -> Unit 5: Quality Assurance -> Lesson: Performing Regression Tests

NEW QUESTION # 15
An SAP Fiori app isn't displaying on the SAP Fiori Launchpad even though the business role granting permission to the app is correctly assigned to the user.
How would you troubleshoot? Note: There are 3 correct answers to this question

- A. Check the business role template.
- B. Check the Role Maintenance app.
- C. Check the restrictions for the role.
- D. Check the business catalogues assigned to the role.

- E. Check the space and page(s) assigned to the role.

Answer: C,D,E

Explanation:
When an SAP Fiori app isn't displaying on the SAP Fiori Launchpad despite the user having the correct business role, several aspects need to be checked to troubleshoot the issue effectively:
* Check the restrictions for the role: It's essential to verify if there are any restrictions applied to the role that might prevent the app from being displayed. Restrictions can be based on various factors such as geographic location, department, or specific user attributes.
* Check the business catalogues assigned to the role: Business catalogues in SAP Fiori contain groups of apps related to specific business functions. If the necessary business catalogue is not assigned to the role, the app will not appear on the SAP Fiori Launchpad. Ensuring the correct assignment of catalogues is crucial for app visibility.
* Check the space and page(s) assigned to the role: With the introduction of spaces and pages in the SAP Fiori Launchpad, it's vital to ensure that the relevant space and page that should display the app are correctly assigned to the user's role. Spaces are higher-level groupings, while pages within those spaces contain the actual apps.

NEW QUESTION # 16
What do you use to collect the values that are entered into the configuration activities in SAP Central Business Configuration?

- A. Business Driven Configuration Questionnaire
- B. SAP Cloud ALM Requirements app
- C. SAP Cloud ALM Processes app
- D. Availability and Dependencies of Solution Processes Excel

Answer: A

NEW QUESTION # 17
In which deployment models is application management the responsibility of the customer? Note: There are 3 correct answers to this question.

- A. Infrastructure as a Service
- B. Private Cloud
- C. Platform as a Service
- D. Software as a Service
- E. On premise

Answer: B,C,E

Explanation:
In different deployment models, the responsibility for application management varies, with the customer typically taking on more responsibility in certain models:
* Platform as a Service (PaaS): In this model, the customer is responsible for managing the applications they develop or deploy on the platform, even though the provider manages the underlying infrastructure, operating systems, and middleware.
* On premise: In an on-premise deployment, the customer has full responsibility for managing both the applications and the infrastructure they run on. This includes maintenance, updates, security, and compliance for both the applications and the hardware/software infrastructure.
* Private Cloud: Similar to on-premise deployments, customers in a private cloud model are typically responsible for managing their applications, including SAP S/4HANA Cloud Public Edition. The cloud provider may manage the cloud infrastructure and virtualization layer, but the customer often handles application-level management tasks, including updates, customization, and user management.
These deployment models contrast with Software as a Service (SaaS), where the service provider is generally responsible for managing the application, including its maintenance, updates, and availability.

NEW QUESTION # 18
......

Our SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition exam question has been widely
