

Practice Fortinet FCP_FSM_AN-7.2 Mock - Reliable FCP_FSM_AN-7.2 Dumps Book

DOWNLOAD the newest Lead1Pass FCP_FSM_AN-7.2 PDF dumps from Cloud Storage for free:
<https://drive.google.com/open?id=1gVdWPhMF5Y8KJLeMXcCKUBKsMS1jbyYU>

Our excellent FCP_FSM_AN-7.2 study materials beckon exam candidates around the world with their attractive characters. Our experts made significant contribution to their excellence. So we can say bluntly that our FCP_FSM_AN-7.2 actual exam is the best. Our effort in building the content of our FCP_FSM_AN-7.2 Practice Questions lead to the development of practice materials and strengthen their perfection. So our FCP_FSM_AN-7.2 training prep is definitely making your review more durable.

Fortinet FCP_FSM_AN-7.2 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Incidents, notifications, and remediation: This section of the exam measures the skills of Incident Responders and encompasses the entire incident management lifecycle. This includes the skills required to manage and prioritize security incidents, configure policies for alert notifications, and set up automated remediation actions to contain and resolve threats.
Topic 2	<ul style="list-style-type: none">Analytics: This section of the exam measures the skills of Security Analysts and covers the foundational techniques for building and refining queries. It focuses on creating searches from events, applying grouping and aggregation methods, and performing various lookup operations, including CMDB and nested queries to effectively analyze and correlate data.
Topic 3	<ul style="list-style-type: none">Machine learning, UEBA, and ZTNA: This section of the exam measures the skills of Advanced Security Architects and covers the integration of modern security technologies. It involves performing configuration tasks for machine learning models, incorporating UEBA (User and Entity Behavior Analytics) data into rules and dashboards for enhanced threat detection, and understanding how to integrate ZTNA (Zero Trust Network Access) principles into security operations.

Topic 4	<ul style="list-style-type: none"> Rules and subpatterns: This section of the exam measures the skills of SOC Engineers and focuses on the construction and implementation of analytics rules. It involves identifying the different components that make up a rule, utilizing advanced features like subpatterns and aggregation, and practically configuring these rules within the FortiSIEM platform to detect security events.

Reliable Fortinet FCP_FSM_AN-7.2 Dumps Book | Study FCP_FSM_AN-7.2 Dumps

IT elite team of our Lead1Pass make a great effort to provide large numbers of examinees with the latest version of Fortinet's FCP_FSM_AN-7.2 exam training materials, and to improve the accuracy of FCP_FSM_AN-7.2 exam dumps. Choosing Lead1Pass, you can make only half efforts of others to pass the same FCP_FSM_AN-7.2 Certification Exam. What's more, after you purchase FCP_FSM_AN-7.2 exam training materials, we will provide free renewal service as long as one year.

Fortinet FCP - FortiSIEM 7.2 Analyst Sample Questions (Q14-Q19):

NEW QUESTION # 14

Refer to the exhibit.

Automation Policy

Automation Policy

Name:	Automation
Severity:	<input type="checkbox"/> Low <input type="checkbox"/> Medium <input checked="" type="checkbox"/> High
Rules:	Group:Network
Time Range:	ANY
Affected Items:	ANY
Affected Orgs:	Rule:Aviation
Action:	<input checked="" type="checkbox"/> Send Email/SMS/Webhook to the target users.  <input checked="" type="checkbox"/> Run Remediation/Script.  <input type="checkbox"/> Invoke an Integration Policy. Run: no policy  <input type="checkbox"/> Create Case when an incident is created.  <input type="checkbox"/> Send SNMP message to the destination set in <i>Admin > Settings > Analytics</i> . <input type="checkbox"/> Send XML file over HTTP(S) to the destination set in <i>Admin > Settings > Analytics</i> . <input type="checkbox"/> Open Remedy ticket using the configuration set in <i>Admin > Settings > Analytics</i> . <input type="checkbox"/> Invoke FortiAI and update Comments
Settings:	<input type="checkbox"/> Do not notify when an incident is cleared automatically. <input type="checkbox"/> Do not notify when an incident is cleared manually. <input type="checkbox"/> Do not notify when an incident is cleared by system.

Remediation/Script Options

Automation Policy > Define Script/Remediation

Type:	<input type="radio"/> Legacy Script <input checked="" type="radio"/> Remediation Script
Script:	Fortinet FortiOS - Block Source IP FortiOS via API
Protocol:	HTTPS
Enforce On:	Device:FortiGate50B,Device:FortiGate90D
Run On:	Supervisor
VDOM:	
Save Cancel	

FORTINET

If a rule containing the automation policy shown in the exhibit triggers, what will happen?

- A. Associated source IP addresses will be blocked on devices in the Network CMDB group.
- B. Associated source IP addresses will be blocked on two FortiGate firewalls.**
- C. Associated source IP addresses will be blocked on devices in the Aviation organization.
- D. Associated source IP addresses will be blocked on all FortiGate firewalls.

Answer: B

Explanation:

The automation policy is configured to run a remediation script named "Fortinet FortiOS - Block Source IP FortiOS via API". It specifies enforcement on two FortiGate devices: FortiGate508 and FortiGate90D. Therefore, associated source IP addresses will be blocked on those two FortiGate firewalls only.

NEW QUESTION # 15

Refer to the exhibit.

Run Mode: Local

Task: Regression

Algorithm: DecisionTreeRegressor

Fields to use for Prediction:

- AVG(CPU Util)
- AVG(Memory Util)
- AVG(Sent Bytes64)
- AVG(Received Bytes64)

Field to Predict:

- AVG(CPU Util)
- AVG(Memory Util)
- AVG(Sent Bytes64)
- AVG(Received Bytes64)

What will happen when a device being analyzed by the machine learning configuration shown in the exhibit has a consistently high memory utilization?

- A. FortiSIEM will update the model with a higher memory utilization average value.
- B. FortiSIEM will update the regression tables for memory utilization, and average sent and received bytes.
- C. FortiSIEM will trigger an incident for high memory utilization.
- D. FortiSIEM will lower the CPU utilization trigger requirement for CPU utilization.

Answer: A

Explanation:

In the configuration shown, FortiSIEM uses Memory Util, Sent Bytes, and Received Bytes as input features to predict CPU Utilization via a regression model. If a device shows consistently high memory utilization, the model will incorporate that into its training data and update itself with a higher average value for memory utilization, influencing future CPU utilization predictions.

NEW QUESTION # 16

Which running mode takes the most time to perform machine learning tasks?

- A. Regression
- B. Local auto
- C. Forecasting
- D. Local

Answer: D

Explanation:

In Local mode, FortiSIEM performs machine learning tasks using the full dataset without optimization shortcuts, making it the most time-consuming mode compared to Local Auto, Forecasting, or Regression.

NEW QUESTION # 17

Refer to the exhibit.

Source IP	Reporting Device	Reporting IP	Event Type	User	Application Category
15.2.3.4	FW01	10.1.1.1	Logon	Mike	DB
21.3.4.5	FW02	10.1.1.2	Logon	Bob	WebApp
14.12.3.1	FW01	10.1.1.1	Logon	Alice	SSH
192.168.1.5	FW03	10.1.1.3	Logon	Alice	DB
10.1.1.1	FW01	10.1.1.1	Logon	Bob	DB
123.123.1.1	FW04	10.1.1.4	Logon	Mike	SSH

If you group the events by Reporting Device, Reporting IP, and Application Category, how many results will FortiSIEM display?

- A. One
- B. Five
- C. Four
- D. Two
- E. Six

Answer: B

Explanation:

Grouping by Reporting Device, Reporting IP, and Application Category yields five unique tuples: (FW01, 10.1.1.1, DB), (FW02, 10.1.1.2, WebApp), (FW01, 10.1.1.1, SSH), (FW03, 10.1.1.3, DB), and (FW04, 10.1.1.4, SSH).

NEW QUESTION # 18

Which statement about thresholds is true?

- A. FortiSIEM uses global and per device thresholds for performance metrics.
- B. FortiSIEM uses only global thresholds for performance metrics.
- C. FortiSIEM uses only device thresholds for security metrics.
- D. FortiSIEM uses fixed, hardcoded global and device thresholds for all performance metrics.

Answer: A

Explanation:

FortiSIEM evaluates performance metrics against both global thresholds, which apply system-wide, and per-device thresholds, which can be customized for individual devices. This dual approach allows flexibility in monitoring while ensuring consistent baseline alerting.

NEW QUESTION # 19

.....

Today, getting FCP_FSM_AN-7.2 certification has become a trend, and FCP_FSM_AN-7.2 exam dump is the best weapon to help you pass certification. We all know that obtaining the FCP_FSM_AN-7.2 certification is very difficult, and students who want

to pass the exam often have to spend a lot of time and energy. After years of hard work, the experts finally developed a set of perfect learning materials FCP_FSM_AN-7.2 practice materials that would allow the students to pass the exam easily. With our study materials, you only need 20-30 hours of study to successfully pass the exam and reach the peak of your career. What are you waiting for? Come and buy it now.

Reliable FCP_FSM_AN-7.2 Dumps Book: https://www.lead1pass.com/Fortinet/FCP_FSM_AN-7.2-practice-exam-dumps.html
