The Salesforce Salesforce-Certified-Administrator PDF dumps file, desktop practice test software, and web-based practice test software. All three Salesforce-Certified-Administrator Exam Questions format contain the Salesforce Salesforce-Certified-Administrator actual questions and help you in Salesforce-Certified-Administrator exam preparation entirely.

Salesforce Certified Administrator Sample Questions (Q185-Q190):

NEW QUESTION # 185
Cloud Kicks has asked the administrator to test a new screen flow that create contacts.
What are two key components of testing the flow?
Choose 2 answers

- A. Run the flow using it to create contacts.
- B. Test the flow in a sandbox.
- C. Set Up a flow interview to test the flow.
- D. Use Debug to test the flow in Flow Builder.

Answer: A,B

NEW QUESTION # 186
At universal Containers, users would like to be able to share Salesforce records with other members of their team, while collaborating around general topics as well.
Which are two considerations for enabling this functionality?
Choose 2 answers

- A. The Add Record action must be configured in the group publisher.
- B. An administrator needs to create a group to enable record sharing
- C. Collaboration groups are created automatically for every department.
- D. Object layouts should be configured to include the groups related list.

Answer: A,D

Explanation:
Explanation
To enable record sharing and collaboration with groups, you need to add the groups related list to the object layouts and configure the Add Record action in the group publisher.

NEW QUESTION # 187
A user at Cloud Kicks is having issues logging in to Salesforce. The user asks the administrator to reset their password.
Which two options should the administrator consider when resetting the user's password?
Choose 2 answers

- A. After resetting a password, the user may be required to activate their device to successfully log in to Salesforce.
- B. Resetting a locked-out user's password automatically unlocks the user's account.
- C. Resetting the password will change the user's password policy.
- D. Single sign-on users can reset their own passwords using the forgot password link.

Answer: A,B

Explanation:
Explanation
Page layout editor is a tool that allows you to customize the layout and organization of detail and edit pages for a specificobject and record type combination. You can use page layout editor to make fields editable or read-only on page layouts for different profiles or record types. After resetting a password, the user may be required to activate their device by entering a verification code sent to their email address or phone number before they can log in to Salesforce. This is a security feature that helps prevent unauthorized access to Salesforce from unknown devices or browsers. References:

NEW QUESTION # 188
Cloud Kicks generates leads for its different product categories (shoes, apparel, and accessories) through many different sources.

While some lead sources are used for all three categories, other lead sources are specific to a single category. The VP of marketing requests that only the proper lead sources be displayed based on the product category chosen.
How should the administrator configure Salesforce to meet this requirement?

- A. Create a page layout for each category and filter the Lead Source field based on category.
- B. Create a single business process, then create record types for each product category.
- C. Create a dependency between the Product Category field and Lead Source field.
- D. Create business processes and record types for each of the three product categories.

Answer: C

Explanation:
Explanation
To display only the proper lead sources based on the product category chosen, an administrator should create a dependency between the Product Category field and Lead Source field on Lead object. A dependency is a relationship between two picklist fields that restricts the values available in one picklist based on the value selected in another picklist. For example, an administrator can create a dependency that shows only Online Store and Social Media as lead sources if Product Category is Shoes, but shows only Trade Show and Magazine as lead sources if Product Category is Apparel. Creating a page layout for each category, creating business processes and record types for each category, or creating a single business process with record types for each category will not display only the proper lead sources based on the product category chosen.

NEW QUESTION # 189
administrator at Northern TrailOutfitters is unable to add a new user in Salesforce.
What could cause this issue?

- A. The username is restricted to a domain specific to my domain.
- B. The email used for the username is not a corporate email address.
- C. The username is already in use another organization.
- D. The email address used for the username has a contact record.

Answer: C

Explanation:
Explanation
One of the possible causes for being unable to add a new user in Salesforce is that the username is already in use by another organization. Usernames must beglobally unique across all Salesforce orgs, so if another user has claimed that username before, it cannot be used again. To fix this issue, choose a different username that is not taken by anyone else. The username is not restricted to a domain specific to my domain unless specified by an administrator. The email address used for the username does not have to match a contact record. The email used for the username can be any valid email address.
