

CSA Test Online, Reliable CSA Exam Simulator

P.S. Free & New CSA dumps are available on Google Drive shared by CramPDF: <https://drive.google.com/open?id=13p5Yv-qscm8uuV0chZikU-3hHTcDnQQk>

You can try our CSA study demo for free. There is no any personal information required from your side. The CSA complete study material contains comprehensive test information than the demo. So if you are interested with our CSA free demo then go for the CSA complete questions & answers. We will give you the best offer for the CSA practice dumps. 100% pass with CSA training dumps at first time is our guarantee.

To prepare for the exam, individuals can take ServiceNow's official training courses or use other resources such as study guides and practice exams. CSA exam is delivered online and consists of 60 multiple-choice questions. Candidates have 90 minutes to complete the exam and must achieve a passing score of 70% or higher.

To prepare for the ServiceNow CSA exam, candidates should have a thorough understanding of the ServiceNow platform and its various components. They should have experience in configuring and customizing ServiceNow instances, as well as a solid understanding of IT service management best practices. ServiceNow offers a range of training courses and study materials to help candidates prepare for the exam, including online courses, instructor-led training, and self-paced study materials.

Achieving the ServiceNow CSA Certification demonstrates an individual's expertise in ServiceNow administration and enhances their career prospects. ServiceNow Certified System Administrator certification is recognized globally and is highly valued by organizations that use ServiceNow for their ITSM and ITOM needs. ServiceNow Certified System Administrator certification also serves as a prerequisite for other ServiceNow certifications, such as the Certified Implementation Specialist and the Certified Application Developer.

Reliable CSA Exam Simulator, Valid Test CSA Tips

Our CSA Test Guide is suitable for you whichever level you are in right now. Whether you are in entry-level position or experienced exam candidates who have tried the exam before, this is the perfect chance to give a shot. Not only from precious experience about the exam but the newest information within them. Our ServiceNow Certified System Administrator study question will be valuable investment with reasonable prices. Besides, they can be obtained within 5 minutes if you make up your mind.

ServiceNow Certified System Administrator Sample Questions (Q464-Q469):

NEW QUESTION # 464

What icon do you use to change the boon and color on a Favorite?

- A. Clack
- B. Tringle
- **C. Pencil**
- D. Star

Answer: C

Explanation:

In ServiceNow, the Pencil (#) icon is used to edit and customize Favorites in the Application Navigator.

Open the Application Navigator.

Locate the Favorites section.

Click the Pencil (#) icon next to the favorite you want to edit.

Choose a new icon and color.

Click Save to apply changes.

B: Star

The Star icon is used to add or remove a favorite, not edit it.

C: Clock

The Clock icon represents Recently Viewed items, not Favorites customization.

D: Triangle

No Triangle icon is used for modifying Favorites in ServiceNow.

NEW QUESTION # 465

What attributes can you manage, using System Properties > Basic Configuration UI16? (Choose five.)

- A. Font style
- **B. Browser tab title**
- **C. Header background color**
- **D. Banner Image**
- E. Preferred browser
- **F. Module text color**
- **G. Base theme**
- H. Animation style

Answer: B,C,D,F,G

Explanation:

The System Properties > Basic Configuration UI16 page in ServiceNow allows administrators to customize the UI appearance for end users. It provides basic branding and theming options for the ServiceNow instance.

Attributes You Can Manage in Basic Configuration UI16:

Browser tab title → (A) You can modify the browser tab title that appears when users open ServiceNow.

Module text color → (B) This setting allows you to change the text color of the left navigation menu items.

Base theme → (D) You can select a base theme for the platform UI, impacting overall styling.

Header background color → (G) This setting changes the background color of the header in UI16.

Banner Image → (H) Allows uploading a custom banner/logo to replace the default ServiceNow logo.

Why the other options are incorrect:

C . Preferred browser → Incorrect. ServiceNow does not allow setting a preferred browser from System Properties. Users must configure this on their own.

E . Font style → Incorrect. UI16 Basic Configuration does not provide font customization options. Fonts are controlled through system themes and CSS.

F . Animation style → Incorrect. ServiceNow UI16 does not provide options to change animation styles from Basic Configuration.

NEW QUESTION # 466

Which of the following protects applications by identifying and restricting access to available files and data?

- A. Application Scope
- B. Application Configuration
- C. Access Control Rules
- D. Verbose Log

Answer: A

NEW QUESTION # 467

Which ServiceNow resource is a framework that ensures the data your ServiceNow application requires maps correctly to the appropriate CMDB tables?

- A. CMDB Class Manager (CMDBCM)
- B. Common Service Data Model (CSDM)
- C. Service Mapping Utility (SMU)
- D. CI Class Manager (CICM)
- E. Service Schema Map (SSM)

Answer: B

Explanation:

The Common Service Data Model (CSDM) is a framework provided by ServiceNow that ensures your application's data correctly maps to the Configuration Management Database (CMDB) tables. It standardizes how configuration items (CIs), services, and relationships are structured within the CMDB.

Standardized Data Model: Ensures consistent and correct CMDB data structuring.

Alignment with CMDB Best Practices: Helps businesses align their IT assets, services, and business functions effectively.

Better Service Mapping: Provides structured relationships between business services and their technical components.

Compliance & Governance: Ensures data integrity by enforcing best practices for CMDB population.

Key Functions of CSDM:

Incorrect Answer Choices Explanation: B. Service Mapping Utility (SMU)- Service Mapping is used for discovering and mapping dependencies but is not a data model framework.

C: Service Schema Map (SSM)- No such official term exists in ServiceNow documentation.

D: CMDB Class Manager (CMDBCM)- This is a tool used to manage CI classes but does not define a data model framework like CSDM.

E: CI Class Manager (CICM)- Incorrect term; CMDB Class Manager is used for CI class hierarchy management, not for mapping applications to CMDB tables.

NEW QUESTION # 468

Which ServiceNow utility provides a modern interactive graphical interface to visualize configuration items and their relationship?

- A. Business Service Map
- B. CI Class Map
- C. CSDM Schema
- D. Dependency View

Answer: D

Explanation:

In ServiceNow, the Dependency View provides an interactive graphical interface to visualize Configuration Items (CIs) and their relationships. It helps IT teams understand the dependencies between infrastructure components, applications, and services.

Key Features of Dependency View:

Graphical Representation of CI Relationships:

Displays Configuration Items (CIs) and their dependencies using a dynamic, interactive visualization.

Uses lines/arrows to represent relationships such as depends on, runs on, hosted by, etc.

Real-Time Impact Analysis:

Helps identify how an outage or change to one CI affects related components.

Useful for change management, incident resolution, and troubleshooting.

Integration with CMDB (Configuration Management Database):

Dependency Views pull data from the CMDB and display it visually.

Supports ITSM (IT Service Management), ITOM (IT Operations Management), and IT Asset Management.

Supports Multiple Relationship Types:

Application-to-Application relationships

Infrastructure dependencies (e.g., servers, databases, cloud resources) Business Services mapping to technical services Incorrect

Answer Choices Analysis:

A . CSDM Schema

☐ Incorrect - The Common Service Data Model (CSDM) is a framework for organizing CMDB data models, but it does not provide a graphical interface for visualizing dependencies.

B . Business Service Map

☐ Incorrect - Business Service Maps are part of Service Mapping (ITOM feature), showing high-level business service dependencies, but Dependency View provides a more detailed, real-time interactive visualization of CIs in CMDB.

D . CI Class Map

☐ Incorrect - The CI Class Map shows CMDB class structures, not live dependency relationships between CIs.

Official ServiceNow Documentation Reference:

ServiceNow Docs - Dependency Views

☐ Dependency Views Overview

ServiceNow Community - CMDB Best Practices

☐ CMDB and Dependency Views

Conclusion:

The correct answer is C. Dependency View because it provides a modern interactive graphical interface to visualize CIs and their relationships in CMDB.

NEW QUESTION # 469

.....

As job seekers looking for the turning point of their lives, it is widely known that the workers of recruitment is like choosing apples--viewing resumes is liking picking up apples, employers can decide whether candidates are qualified by the CSA appearances, or in other words, candidates' educational background and relating CSA professional skills. They develop the CSA exam guide targeted to real exam. The wide coverage of important knowledge points in our CSA latest braindumps would be greatly helpful for you to pass the exam.
