Achieving the Microsoft AZ-305 certification can be a valuable asset for professionals looking to advance their careers in Azure infrastructure design. Designing Microsoft Azure Infrastructure Solutions certification demonstrates to potential employers that the candidate has the necessary knowledge and skills to design and implement Azure solutions that meet the specific needs of their organization. It can also provide a competitive advantage in the job market, as more and more businesses are moving their operations to the cloud.

Understanding of the salary of the Microsoft AZ-305 Certified Professional

The salary of a Microsoft AZ-305 Certified Professional depends on the company you are working in. However, the average salary of a Microsoft AZ-305 Certified Professional who passes his exam with the help of **AZ-305 exam dumps** is given as follows

- In the United States: 120,000 USD
- In Australia: 85,000 AUD
- In the UK: 100,000 GBP
- In India: 70,000 INR
- In Germany: 100,000 EUR

Microsoft AZ-305 Exam is designed for individuals who have prior experience in designing and implementing solutions using Microsoft Azure cloud services. AZ-305 exam is one of the two exams required to earn the Microsoft Certified: Azure Solutions Architect Expert certification. AZ-305 exam focuses on testing the knowledge and skills of candidates in designing and implementing Azure infrastructure solutions, including compute, storage, networking, and security.

Customizable PDF Questions for Improved Success in Microsoft AZ-305 Certification Exam

The Designing Microsoft Azure Infrastructure Solutions PDF questions version is user-friendly. It means one can easily have a printout of actual Designing Microsoft Azure Infrastructure Solutions exam questions and these can be studied anywhere. Designing Microsoft Azure Infrastructure Solutions is also suitable for smartphones as well as tablets too. Hence, it is portable. Simply after having your Designing Microsoft Azure Infrastructure Solutions AZ-305 PDF Dumps file in your hand, you need no installation and just carry on with your preparation of Designing Microsoft Azure Infrastructure Solutions test with confidence. Web-based AZ-305 Practice Exam is customizable and you can adjust its time and type of Designing Microsoft Azure Infrastructure Solutions AZ-305 questions. It is compatible with all operating systems like Mac, Linux, IOS, Android and Windows, etc.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q225-Q230):

NEW QUESTION # 225

Your company has the divisions shown in the following table.

Division	Azure subscription	Azure Active Directory (Azure AD) tenant
East	Sub1, Sub2	East.contoso.com
West	Sub3, Sub4	West.contoso.com

You plan to deploy a custom application to each subscription. The application will contain the following:

A resource group

An Azure web app

Custom role assignments

An Azure Cosmos DB account

You need to use Azure Blueprints to deploy the application to each subscription.

What is the minimum number of objects required to deploy the application? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Management groups:

 1
 2
 3
 4

Microsoft

Blueprint definitions:

 1
 2
 3
 4

Blueprint assignments:

 1
 2
 3
 4

Answer:

Explanation:

The screenshot shows the Azure portal interface with three dropdown menus:

- Management groups:** A list with items 1, 2, 3, 4. Item 2 is highlighted with a red box.
- Blueprint definitions:** A list with items 1, 2, 3, 4. Item 2 is highlighted with a red box.
- Blueprint assignments:** A list with items 1, 2, 3, 4. Item 4 is highlighted with a red box.

NEW QUESTION # 226

You have the resources shown in the following table.

Name	Type
AS1	Azure Synapse Analytics instance
CDB1	Azure Cosmos DB SQL API account

CDB1 hosts a container that stores continuously updated operational data. You are designing a solution that will use AS1 to analyze the operational data dairy.

You need to recommend a solution to analyze the data without affecting the performance of the operational data store.

What should you include in the recommendation?

- A. Azure Data Factory with Azure Cosmos DB and Azure Synapse Analytics connectors
- B. Azure Synapse Analytics with PolyBase data loading
- C. **Azure Synapse Link for Azure Cosmos DB**
- D. Azure Cosmos DB change feed

Answer: C

NEW QUESTION # 227

You have the Azure resources shown in the following table.

Name	Description
contoso.com	Microsoft Entra tenant
fabrikam.com	Microsoft Entra tenant
mg01	Management group in the contoso.com tenant that contains two Azure subscriptions
mg02	Management group in the contoso.com tenant that contains one Azure subscription
mg03	Management group in the fabrikam.com tenant that contains three Azure subscriptions

You need to recommend a virtual network management solution that uses Azure Virtual Network Manager.

The solution must meet the following requirements:

- * Minimize the number of network managers.
- * Minimize administrative effort when assigning the network group membership.

What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Minimum number of required network managers:

Assign the network group membership by using:

Azure Policy
Azure Automanage
Azure Automation
Azure Policy

Answer:

Explanation:

Answer Area

Minimum number of required network managers:

Assign the network group membership by using:

Azure Policy
Azure Automanage
Azure Automation
Azure Policy

Explanation:

Answer Area

Minimum number of required network managers:

Assign the network group membership by using:

Azure Policy

NEW QUESTION # 228

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has deployed several virtual machines (VMs) on-premises and to Azure. Azure ExpressRoute has been deployed and configured for on-premises to Azure connectivity. Several VMs are exhibiting network connectivity issues. You need to analyze

the network traffic to determine whether packets are being allowed or denied to the VMs.

Solution: Use the Azure Advisor to analyze the network traffic.

Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Instead use Azure Network Watcher to run IP flow verify to analyze the network traffic.

Note: Advisor is a personalized cloud consultant that helps you follow best practices to optimize your Azure deployments. It analyzes your resource configuration and usage telemetry and then recommends solutions that can help you improve the cost effectiveness, performance, high availability, and security of your Azure resources.

With Advisor, you can:

Get proactive, actionable, and personalized best practices recommendations. Improve the performance, security, and high availability of your resources, as you identify opportunities to reduce your overall Azure spend.

Get recommendations with proposed actions inline.

NEW QUESTION # 229

What should you implement to meet the identity requirements? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Service:	<ul style="list-style-type: none">Azure AD Identity GovernanceAzure AD Identity ProtectionAzure AD Privilege Access Management (PIM)Azure Automation
Feature:	<ul style="list-style-type: none">Access packagesAccess reviewsApprovalsRunbooks

Answer:

Explanation:

Service:

- Azure AD Identity Governance
- Azure AD Identity Protection
- Azure AD Privilege Access Management (PIM)
- Azure Automation

Feature:

- Access packages
- Access reviews
- Approvals
- Runbooks

Reference:

Topic 4, HABInsurance

Current environment

General

An insurance company, HABInsurance, operates in three states and provides home, auto, and boat insurance. Besides the head office, HABInsurance has three regional offices.

Technology assessment

The company has two Active Directory forests: main.habinsurance.com and region.habinsurance.com. HABInsurance's primary internal system is Insurance Processing System (IPS). It is an ASP.Net/C# application running on IIS/Windows Servers hosted in a data center. IPS has three tiers: web, business logic API, and a datastore on a back end. The company uses Microsoft SQL Server and MongoDB for the backend. The system has two parts: Customer data and Insurance forms and documents. Customer data is stored in Microsoft SQL Server and Insurance forms and documents - in MongoDB. The company also has 10 TB of Human Resources (HR) data stored on Segment NAS at the head office location. Requirements General HABInsurance plans to migrate its workloads to Azure. They purchased an Azure subscription. Title Changes During a transition period, HABInsurance wants to create a hybrid identity model along with a Microsoft Office 365 deployment. The company intends to sync its AD forests to Azure AD and benefit from Azure AD administrative units functionality.

HABInsurance needs to migrate the current IPSCustomers SQL database to a new fully managed SQL database in Azure that would be budget-oriented, balanced with scalable compute and storage options. The management team expects the Azure database service to scale the database resources dynamically with minimal downtime. The technical team proposes implementing a DTU-based purchasing model for the new database.

HABInsurance wants to migrate Insurance forms and documents to Azure database service. HABInsurance plans to move IPS first two tiers to Azure without any modifications. The technology team discusses the possibility of running IPS tiers on a set of virtual machines instances. The number of instances should be adjusted automatically based on the CPU utilization. An SLA of 99.95% must be guaranteed for the compute infrastructure.

The company needs to move HR data to Azure File shares.

In their new Azure ecosystem, HABInsurance plans to use internal and third-party applications. The company considers adding user consent for data access to the registered applications. Later, the technology team contemplates adding a customer self-service portal to IPS and deploying a new IPS to multi-region ASK. But the management team is worried about performance and availability of the multi-region AKS deployments during regional outages.

NEW QUESTION # 230

.....

A considerable amount of effort goes into our products. So in most cases our AZ-305 study materials are truly your best friend. On

one hand, our AZ-305 study materials are the combination of the latest knowledge and the newest technology, which could constantly inspire your interest of study. On the other hand, our AZ-305 Study Materials can predicate the exam correctly. Therefore you can handle the questions in the real exam like a cork. Through highly effective learning method and easily understanding explanation, you will pass the AZ-305 exam with no difficulty.
