Salesforce Certified Education Cloud Consultant pass4sure practice & ED-Con-101 pdf training material

You can absolutely assure about the high quality of our products, because the contents of ED-Con-101 training materials have not only been recognized by hundreds of industry experts, but also provides you with high-quality after-sales service. Before purchasing ED-Con-101 exam torrent, you can log in to our website for free download. Whatever where you are, whatever what time it is, just an electronic device, you can practice. With Salesforce Certified Education Cloud Consultant study questions, you no longer have to put down the important tasks at hand in order to get to class; with ED-Con-101 Exam Guide, you don't have to give up an appointment for study. Our study materials can help you to solve all the problems encountered in the learning process, so that you can easily pass the exam.

Salesforce Certified Education Cloud Consultant Sample Questions (Q119-

Q124):

NEW QUESTION # 119

A partner wants to self-certify that its app complies with Education Data Architecture (EDA) readiness. The partner needs to certify that its solution is compatible with EDA, or if it duplicates EDA functionality, that it is properly documented and abides by conventions for key EDA objects.

What are two key objects used with EDA?

Choose 2 answers.

- A. **Affiliation**
- B. **Attribute**
- C. Opportunity
- D. Account

Answer: A,B

Explanation:

Affiliation and Attribute are two key objects used with EDA. Affiliation is an object that represents a relationship between a Contact and an Account or another Contact. Affiliation can be used to track various types of relationships, such as student, faculty, staff, alumni, donor, or advisor. Attribute is an object that stores additional information about a Contact or an Applicant that is not captured by other EDA objects. Attribute can be used to track various types of information, such as test scores, languages, hobbies, certifications, and documents. Opportunity and Account are not key objects specific to EDA, but rather standard Salesforce objects. Reference:

NEW QUESTION # 120

The career center at a university plans to use Student Success Hub and is preparing to import student data.

In which order should the data be imported?

- A. Account, Term, Course, and Course Offering records
- B. Course, Course Offering, Program Plan, and Affiliation records
- **C. Account, Term, Program Enrollment, and Course records**

Answer: C

Explanation:

The data should be imported in the order of Account, Term, Program Enrollment, and Course records for the career center that plans to use Student Success Hub and is preparing to import student data. The order of data import is important to ensure that the data is consistent and accurate in Salesforce and that the relationships between the objects are maintained. The data should be imported in the order of Account, Term, Program Enrollment, and Course records because these objects have dependencies or lookups to each other. For example, a Program Enrollment record has a lookup to an Account record and a Term record, and a Course record has a lookup to a Term record. Importing the data in this order can help avoid errors or missing data. Course, Course Offering, Program Plan, and Affiliation records or Account, Term, Course, and Course Offering records are not correct orders of data import for the career center that plans to use Student Success Hub and is preparing to import student data.

NEW QUESTION # 121

A consultant is working with a university that uses Salesforce and wants to install the Education Data Architecture (EDA) in that environment.

What does the consultant need to do after installing EDA to ensure it is set up correctly?

- A. Create and assign roles to all users who have access to EDA.
- B. Assign EDA layouts to the Cases object.
- **C. Make the EDA record types available to profiles.**
- D. Assign EDA access to a cloned System Admin profile.

Answer: C

Explanation:

After installing EDA, the consultant needs to make the EDA record types available to profiles that need to access them. This is because EDA comes with several custom record types for standard objects, such as Account, Contact, Course, and Program Enrollment. These record types enable different views and fields for different types of records, such as Household, Student, Faculty, Course Offering, and Program Enrollment. By default, these record types are not assigned to any profiles, so the consultant needs to manually assign them to the appropriate profiles based on the business requirements and user roles of the university. This will ensure that the users can see and use the EDA record types and fields correctly and efficiently. Reference: Education Data Architecture Basics, Assign Record Types to Profiles

NEW QUESTION # 122

A university is implementing a student community and rolling it out to 20,000 students. The IT manager is concerned about the large increase in users accessing the system at any one time.

Which step should the consultant recommend?

- A. Leverage MuleSoft Anypoint Platform
- B. Log a case with Salesforce Support to increase limits.
- **C. Identify areas that may impact governor limits.**

Answer: C

Explanation:

When a university is rolling out a student community to a large number of users, it is essential to ensure that the system can handle the increased load. Salesforce has governor limits that regulate the usage of resources to ensure the platform's stability and performance. The consultant should recommend identifying areas that may impact these governor limits, such as data storage, API calls, and processing limits. By understanding and planning for these limits, the university can optimize its implementation and avoid potential issues.

Best Practices for Managing Governor Limits

NEW QUESTION # 123

A university provides corporate training options to local businesses. The university wants to offer a seamless experience to students and allow them to select and purchase available courses.

Which solution should the consultant recommend to meet the requirement?

- A. Salesforce CPQ
- B. Salesforce File
- **C. A third-party app**
- D. Financial Service Cloud

Answer: C

Explanation:

A third-party app is a solution that the consultant can recommend to meet the requirement of offering a seamless experience to students and allowing them to select and purchase available courses. A third-party app is an application that provides additional features and solutions for Salesforce. There are many third-party apps on the AppExchange that offer e-commerce and online learning capabilities, such as course catalog, shopping cart, payment processing, and course delivery. The consultant can help the university choose an app that meets their needs and budget. Salesforce CPQ, Financial Service Cloud, and Salesforce Files are not solutions that can offer a seamless experience to students and allow them to select and purchase available courses. Reference:
