The most attractive thing about a learning platform is not the size of his question bank, nor the amount of learning resources, but more importantly, it is necessary to have a good control over the annual propositional trend. The H13-624_V5.5 quiz guide through research and analysis of the annual questions, found that there are a lot of hidden rules are worth exploring, plus we have a powerful team of experts, so the rule can be summed up and use. The H13-624_V5.5 prepare torrent can be based on the analysis of the annual questions, it is concluded that a series of important conclusions related to the H13-624_V5.5 qualification examination, combining with the relevant knowledge of recent years, then predict the direction which can determine this year's H13-624_V5.5 exam. H13-624_V5.5 test material will improve the ability to accurately forecast the topic and proposition trend this year.

Huawei H13-624_V5.5 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> Storage System O&M Management: This section of the exam measures the skills of a Storage Operations Specialist and covers the daily operational management of Huawei storage systems. It emphasizes practical abilities in system monitoring, troubleshooting, fault handling, and health checks. The goal is to ensure smooth, reliable operations and reduce risks through proactive maintenance and efficient use of Huawei's O&M tools.
Topic 2	<ul style="list-style-type: none"> Basic Storage Technologies: This section of the exam measures the skills of a Storage Engineer and includes fundamental knowledge of storage systems. It covers key concepts such as intelligent storage architecture, RAID levels, storage networking, and widely used data protocols. The section also introduces the structure and function of SAN and NAS environments. A strong grasp of these basic technologies helps professionals support large-scale data infrastructure with efficiency and stability.
Topic 3	<ul style="list-style-type: none"> Huawei Intelligent Storage Products and Features: This section of the exam measures the skills of a Storage Administrator and focuses on Huawei's intelligent storage solutions. It includes understanding product models, management interfaces, and advanced features like storage tuning and data protection. Candidates will explore how to manage system operations, optimize resource usage, and apply Huawei-specific technologies for secure and high-performance storage deployment.
Topic 4	<ul style="list-style-type: none"> Storage Technology Trends: This section of the exam measures skills of a Data Center Specialist and covers the latest advancements in the storage industry. It focuses on emerging technologies that are shaping intelligent storage development, including trends like AI integration, green computing, and cloud-oriented storage evolution. Candidates are expected to understand how these trends influence storage planning and deployment in modern IT environments.

Reliable H13-624_V5.5 Exam Dumps - Pdf H13-624_V5.5 Dumps

It is well acknowledged that people who have a chance to participate in the simulation for the real test, they must have a fantastic advantage over other people to get good grade in the exam. Now, it is so lucky for you to meet this opportunity once in a blue . We offer you the simulation test with the App version of our H13-624_V5.5 preparation test, in order to let you be familiar with the environment of test as soon as possible. Under the help of the real H13-624_V5.5 test simulation, you can have a good command of key points which are more likely to be tested in the real test. Therefore that adds more confidence for you to make a full preparation of the upcoming H13-624_V5.5 Exam. In addition, since you can experience the process of H13-624_V5.5 the simulation test, you will feel less pressure about the approaching exam. It sounds wonderful, right? Of course, it is. So why not have a try? We promise you will enjoy this study.

Huawei HCIP-Storage V5.5 Sample Questions (Q52-Q57):

NEW QUESTION # 52

Single choice Which one of the following descriptions about the VCS service in the clustered NAS system is incorrect?

- A. Dependency between service groups can be defined
- B. The dependency between resources can be defined
- C. In special cases, you can cyclically define resource dependencies
- D. Each resource corresponds to an Agent

Answer: C

NEW QUESTION # 53

After the object deduplication function is enabled in Huawei distributed storage, the system compares which information of the object Information to perform duplicate object deletion (

- A. Object size
- B. Data protection level
- C. MD5 value

- D. Creation time

Answer: A,B,C,D

NEW QUESTION # 54

Regarding the application of the InfoStamper feature, which of the following multiple options are correct ()

- A. The anti-virus server reads files through snapshots, checks and kills viruses, and isolates them
- B. After the remote replication task is started, snapshots are created regularly at the set time interval, and then the snapshot time The data is synchronized to the slave, and only the incremental data between the current snapshot and the previous snapshot needs to be copied each time
- C. Snapshot avoids data loss caused by 2 failures, and supports fault-tolerant processing of comprehensive failure sub-health disks
- D. When the file data in the source directory is accidentally deleted, overwritten or invaded by a virus or other non-physical media When it is damaged, it can be restored through the files in the snapshot directory before the time of the failure.

Answer: A,C,D

NEW QUESTION # 55

(Judgment) FusionStorage Block uses a unique data block slicing technology and data based on DHT Hash The routing algorithm can evenly distribute the data of the volume to the fault domain of a larger resource pool, so that each volume can obtain a larger IOPS and MBPS performance also makes the load of each hardware resource relatively balanced.

- A. False
- B. True

Answer: B

NEW QUESTION # 56

In actual service scenarios, the HyperMetro feature of Huawei OceanStor Pacific series supports incremental synchronization. If a site fails, the site that wins arbitration continues providing services, and I/O requests change from the dual-write state to the single-write state. After the faulty site recovers, data generated during the fault can be synchronized to the recovered site.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

The HyperMetro feature in Huawei OceanStor Pacific series provides active-active storage with high availability. The *HCIP-Storage V5.5 Training Material (Module 4: Storage Design and Implementation)* states: "HyperMetro supports incremental synchronization. In the event of a site failure, the site that wins arbitration (via quorum server or static priority) continues services in single-write mode. After the faulty site recovers, HyperMetro resumes dual-write mode and synchronizes incremental data generated during the fault to the recovered site, ensuring data consistency." This process ensures minimal data loss and seamless recovery, making the statement true. The material emphasizes that incremental synchronization reduces the bandwidth and time required compared to full synchronization.
