CrowdStrike Falcon Administrator Sample Questions (Q37-Q42):

NEW QUESTION # 37

What is the goal of a Network Containment Policy?

- A. Partition a network for privacy
- B. Increase the aggressiveness of the assigned prevention policy
- C. Gain more visibility into network activities
- D. **Limit the impact of a compromised host on the network**

Answer: D

Explanation:

The goal of a Network Containment Policy is to limit the impact of a compromised host on the network. This policy allows users to isolate a host from the network, while still allowing it to communicate with the Falcon Cloud and other essential services. This can help prevent further damage or data exfiltration from a compromised host. The other options are either incorrect or not related to the policy.

NEW QUESTION # 38

During a sensor installation, what unique identifier is given to each sensor?

- A. Computer ID (CID)
- B. **Agent ID (AID)**
- C. Endpoint ID (EID)
- D. Security ID (SID)

Answer: B

NEW QUESTION # 39

You have been provided with a list of 100 hashes that are not malicious but your company has deemed to be inappropriate for work computers. They have asked you to ensure that they are not allowed to run in your environment. You have chosen to use Falcon to do this. Which is the best way to accomplish this?

- A. Using Custom Alerts in the Investigate App, create a new alert using the template "Process Execution" and within that rule, select the option to "Block Execution"
- B. Using the API, gather the list of SHA256 or MD5 hashes for each binary and then upload them, setting them all to "Never Allow"
- C. Using the Support Portal, create a support ticket and include the list of binary hashes, asking support to create an "Execution Prevention" rule to prevent these processes from running
- D. **Using IOC Management, gather the list of SHA256 or MD5 hashes for each binary and then upload them. Set all hashes to "Block" and ensure that the prevention policy these computers are using includes the option for "Custom Blocking" under Execution Blocking.**

Answer: D

Explanation:

The best way to ensure that a list of 100 hashes that are not malicious but your company has deemed to be inappropriate for work computers are not allowed to run in your environment is to use IOC Management, gather the list of SHA256 or MD5 hashes for each binary and then upload them. Set all hashes to "Block" and ensure that the prevention policy these computers are using includes the option for "Custom Blocking" under Execution Blocking. This will allow Falcon to block the execution of these hashes on the hosts using this policy. The other options are either incorrect or not efficient to achieve this goal.

NEW QUESTION # 40

Which role is required to manage groups and policies in Falcon?

- A. Prevention Hashes Manager
- B. Falcon Host Administrator
- C. Falcon Host Security Lead
- D. Falcon Host Analyst

Answer: B

Explanation:

The Falcon Host Administrator role is required to manage groups and policies in Falcon. This role allows users to create, edit and delete groups and policies, as well as assign them to hosts. The other roles do not have this capability. Reference: [CrowdStrike Falcon User Guide], page 17.

NEW QUESTION # 41

Which of the following best describes the Default Sensor Update policy?

- A. The Default Sensor Update policy is only used for testing sensor updates
- B. The Default Sensor Update policy does not have the "Uninstall and maintenance protection" feature
- C. The Default Sensor Update policy is disabled by default
- D. The Default Sensor Update policy is a "catch-all" policy

Answer: D

Explanation:

The Default Sensor Update policy is a "catch-all" policy. This means that any host that is not assigned to a specific sensor update policy will inherit the settings from the Default Sensor Update policy. The Default Sensor Update policy is enabled by default and has the "Uninstall and maintenance protection" feature turned on. You can modify the settings of the Default Sensor Update policy, but you cannot delete or disable it.

NEW QUESTION # 42

.....

The passing rate of our CCFA-200b test torrent is high but if you fail in the exam we will refund you in full immediately.
