

Esri EAEP2201 Exam | EAEP2201模擬対策 - 10の主要プラットフォームの1つEAEP2201認証pdf資料

valid EAEP2201 Enterprise Administration Professional 2201 Practice Course

Please Get the Link of the Exam to proceed further - <https://www.educationry.com/?product=pass-2201-enterprise-administration-professional-2201-certification-exam-educationry>

Most effective these exam dumps are routinely updated with usually precise and most current material by profoundly talented authorities, that have obtained authentication in their absolute very first attempt. Whenever you get your hands around the most current exam dumps preparation supply, then, at that point, you don't need to pressure over alluding to distinctive sources. These correct exam dumps pdf cover just about every single prospectus of this exam. You must merely concentrate on these exam questions cautiously and comprehend them well.

Using the assistance with the exam dumps you can quickly release your stress more than your exam readiness due to the deficiency. Prepare on time and get genuine exam dumps for efficient preparation. Get the additional weight due to the fact of it, you can get the itemized this exam questions connected along with your affirmation. These precise exams supply you using a belief of how to plan for the exam successfully. The genuine exams intended for operating on the expert abilities of the contender for the exam certification dumps who want to be able to cope with just about every one of the concerns impeccably.

Get prepared by means of the updated exam, you find out using the most current innovations, and any time you program by the most recent exam dumps 2022, you comprehend its significance and also the advantages in the executions. The part of the veritable exam dumps is coordinated appropriately by the endeavors of our topic matter experts. Carve out opportunities to perform it appropriately and afterward, you receive the greatest outcomes in your exam conclusion. Make your preparation in advance by taking the exam dumps.

Choose the major excellent exam dumps for the preparation of the exam which are checked by the exam dumps. The greatest exam questions and answers are finished by the precise exam dumps that happen to be in your schedule. Get ready with a compelling exam dumps pdf then you definitely will truly like to answer 90% from the exam certification dumps ideal. The fundamentals of the certified exam are investigated by professionals, so our refreshed exam questions will construct your capacity of inventiveness.

Esri EAEP2201認証pdf資料 & EAEP2201過去問無料

我々Pass4Testでは、あなたは一番優秀なEsri EAEP2201問題集を発見できます。我が社のサービスも良いです。購入した前、弊社はあなたが準備したいEAEP2201試験問題集のサンプルを無料で提供します。購入した後、一年間の無料サービス更新を提供します。Esri EAEP2201問題集に合格しないなら、180日以内で全額返金します。あるいは、他の科目の試験を変えていいです。

Esri Enterprise Administration Professional 2201 認定 EAEP2201 試験問題

(Q63-Q68):

質問 # 63

A portal administrator is trying to enable web-tier authentication (IWA) for the ArcGIS Enterprise portal using Active Directory and IIS.

Steps taken:

- * Configured portal with Microsoft version of ArcGIS Web Adaptor
- * Set identity store to Active Directory
- * Added AD users to the portal
- * Disabled anonymous access in Portal

Users are not prompted to sign in and are not automatically logged in.

What should the administrator do next?

- A. Assign a default user type to all portal members
- B. Enable Windows Authentication in IIS
- C. Refresh user membership in the Portal Administrator Directory
- D. Work with the IT department to disable anonymous access to the IIS web server

正解: D

解説:

When using IWA through the Web Adaptor (IIS), the IIS server itself must be configured to deny anonymous access and allow Windows Authentication. Simply disabling anonymous access within the Portal settings is not enough.

From Esri's web-tier authentication guide:

"For IWA to function as expected, anonymous access must be disabled in IIS for the ArcGIS Web Adaptor, and Windows Authentication must be enabled. If IIS still allows anonymous access, users will bypass authentication prompts."

- * Option B is irrelevant here-user types don't affect login behavior.
- * Option C is a content sync feature, not related to authentication.
- * Option D (Enable Windows Authentication) is correct only if it hasn't already been done, but the missing step is disabling anonymous access in IIS.

Reference: ArcGIS Enterprise - Configuring Web-Tier Authentication with IIS

質問 # 64

A GIS administrator is publishing a feature service. All 2,400 features in the dataset must be able to be returned from a single request to the service.

Which action should the administrator perform?

- A. Adjust pooling to handle the request
- B. Use service defaults for publishing
- C. Increase the max record count
- D. Enable cached drawing mode

正解: C

解説:

By default, feature services limit the number of records returned in a single request (usually set to 1,000). To allow all 2,400 features to be returned in one call, the administrator needs to increase the

"Maximum number of records returned by the server" (maxRecordCount) setting during or after publishing.

From the ArcGIS Server documentation:

"The maxRecordCount property defines the number of records returned by the server in a single request. To return all features, this value must be increased accordingly."

- * Option A (adjust pooling) relates to concurrency and scalability, not data retrieval limits.
- * Option C would keep the default setting of 1,000, which would not meet the requirement.
- * Option D relates to visual performance, not record retrieval.

Reference: ArcGIS Server - Feature Service Settings and Tuning for Performance

質問 # 65

A client has an internet-accessible ArcGIS Enterprise deployment with the Web Adaptors in the DMZ, and the remaining

components are on an internal network behind a firewall. A user on the internet must access a web map in that environment. Which ports must be open in the firewall between the DMZ and the internal network?

- A. 443 and 6443
- B. 80 and 443
- C. 6443 and 7443
- D. 2443 and 6443

正解: B

質問 # 66

An ArcGIS Pro user receives the following error when trying to publish to ArcGIS Enterprise:

"Unable to publish to ArcGIS Server, error 001369: failed to create service" The ArcGIS Server logs reveal:

- * Failed to create service
- * Internal server error
- * Unable to instantiate class for XML schema type
- * Invalid XML registry file
- * 390 ArcSOC processes running
- * Server uses only half of available RAM

Which action should the administrator perform?

- A. Use more dedicated instances instead of shared
- B. Increase the non-interactive desktop heap size
- C. Scale up the ArcGIS Server machine resources

正解: A

解説:

This issue is consistent with desktop heap exhaustion, especially when a high number of ArcSOC processes (e.g., 390) are running on Windows. Desktop heap is a limited memory resource used for GUI and system object management. When it runs out, services can fail to start and produce XML-related errors.

Increasing the non-interactive desktop heap size in the Windows registry resolves this.

From Esri documentation:

"If the Windows desktop heap size is too low, ArcGIS Server may be unable to create new processes (ArcSOC), causing service failures and related internal server errors."

* Option B is a generic fix and won't address the specific heap exhaustion issue.

* Option C doesn't help if the root issue is OS-level heap size limits.

Reference: ArcGIS Enterprise - ArcSOC process limits and Windows desktop heap size

質問 # 67

A client has an internet-accessible ArcGIS Enterprise deployment with the Web Adaptors in the DMZ, and the remaining components are on an internal network behind a firewall. A user on the internet must access a web map in that environment. Which ports must be open in the firewall between the DMZ and the internal network?

- A. 443 and 6443
- B. 80 and 443
- C. 6443 and 7443
- D. 2443 and 6443

正解: C

解説:

Web Adaptors in the DMZ must forward requests to internal components (Portal and Server). These internal services operate over HTTPS via ports:

- * 7443 for Portal for ArcGIS
- * 6443 for ArcGIS Server

Therefore, the firewall must allow traffic over ports 6443 and 7443 from the Web Adaptors (DMZ) to the respective internal services.

From ArcGIS Enterprise security documentation:

"When using Web Adaptors in the DMZ, make sure ports 6443 and 7443 are open between the Web Adaptors and the internal ArcGIS Server and Portal components respectively."

* OptionBis partially correct but leaves out Portal (7443).

* OptionCis for HTTP/HTTPS access from the public, not internal communications.

* OptionDincludes the Data Store admin port (2443), which isn't required here.
