In the PDF version, the HashiCorp Certified: Terraform Associate (003) (HCTA0-003) (Terraform-Associate-003) exam questions are printable and portable. You can take these HashiCorp Certified: Terraform Associate (003) (HCTA0-003) (Terraform-Associate-003) pdf dumps anywhere and even take a printout of HashiCorp Certified: Terraform Associate (003) (HCTA0-003) (Terraform-Associate-003) exam questions. The PDF version is mainly composed of real HashiCorp Terraform-Associate-003 Exam Dumps. Dumpexams updates regularly to improve its HashiCorp Certified: Terraform Associate (003) (HCTA0-003) (Terraform-Associate-003) pdf questions and also makes changes when required.

HashiCorp Terraform-Associate-003 Exam Syllabus Topics:

Topic	Details
Topic 1	• Create, maintain, and use Terraform modules: In this section of the exam, candidates are tested for creating a module, using a module in configuration, and topics such as refactoring an existing configuration into modules.
Topic 2	• Develop collaborative Terraform workflows: In this section, candidates are tested for their skills related to managing the Terraform binary, providers, and modules using version constraints and setting up remote states. It also covers the utilization of the Terraform workflow in automation.

Topic 3	• Manage resource lifecycle: The section covers topics such as Initializing a configuration using terraform init and its options and generating an execution plan using terraform plan and its options. It also covers the configuration changes using Terraform Apply and its options.
Topic 4	• Collaborate on infrastructure as code using HCP Terraform: In this section, the topics covered include analyzing the HCP Terraform run workflow, the role of HCP Terraform workspaces and their configuration options, and the management of provider credentials in HCP Terraform.

In addition, Terraform-Associate-003 exam dumps are high quality and accuracy, since we have professional technicians to examine the update every day. You can enjoy free update for 365 days after purchasing, and the update version for Terraform-Associate-003 Exam Dumps will be sent to your email automatically. In order to build up your confidence for the exam, we are pass guarantee and money back guarantee for Terraform-Associate-003 training materials, if you fail to pass the exam, we will give you full refund.

HashiCorp Certified: Terraform Associate (003) (HCTA0-003) Sample Questions (Q149-Q154):

NEW QUESTION # 149
Which of these is true about Terraform's plugin-based architecture?

- A. Terraform can only source providers from the internet
- B. All providers are part of the Terraform core binary
- C. Every provider in a configuration has its own state file for its resources
- D. You can create a provider for your API if none exists

Answer: D

Explanation:
Terraform is built on a plugin-based architecture, enabling developers to extend Terraform by writing new plugins or compiling modified versions of existing plugins1. Terraform plugins are executable binaries written in Go that expose an implementation for a specific service, such as a cloud resource, SaaS platform, or API2. If there is no existing provider for your API, you can create one using the Terraform Plugin SDK3 or the Terraform Plugin Framework4. Reference =
* 1: Plugin Development - How Terraform Works With Plugins | Terraform | HashiCorp Developer
* 2: Lab: Terraform Plug-in Based Architecture - GitHub
* 3: Terraform Plugin SDK - Terraform by HashiCorp
* 4: HashiCorp Terraform Plugin Framework Now Generally Available

NEW QUESTION # 150
What is the provider for this resource?

- A. Vpc
- B. Main
- C. Test
- D. aws

Answer: D

Explanation:
In the given Terraform configuration snippet:
resource "aws_vpc" "main" {

name = "test"
}
The provider for the resource aws_vpc is aws. The provider is specified by the prefix of the resource type. In this case, aws_vpc indicates that the resource type vpc is provided by the aws provider.
References:
Terraform documentation on providers: Terraform Providers

NEW QUESTION # 151
You can configure Terraform to log to a file using the TF_LOG environment variable.

- A. False
- B. True

Answer: B

Explanation:
You can configure Terraform to log to a file using the TF_LOG environment variable. This variable can be set to one of the log levels: TRACE, DEBUG, INFO, WARN or ERROR. You can also use the TF_LOG_PATH environment variable to specify a custom log file location. References = : Debugging Terraform

NEW QUESTION # 152
How does the Terraform cloud integration differ from other state backends such as S3, Consul, etc?

- A. All of the above
- B. It doesn't show the output of a terraform apply locally
- C. It is only arable lo paying customers
- D. It can execute Terraform runs on dedicated infrastructure in Terraform Cloud

Answer: D

Explanation:
Explanation
This is how the Terraform Cloud integration differs from other state backends such as S3, Consul, etc., as it allows you to perform remote operations on Terraform Cloud's servers instead of your local machine. The other options are either incorrect or irrelevant.

NEW QUESTION # 153
What value does the Terraform Cloud private registry provide over the public Terraform Module Registry?

- A. The ability to restrict modules to members of Terraform Cloud or Enterprise organizations
- B. The ability to share modules publicly with any user of Terraform
- C. The ability to share modules with public Terraform users and members of Terraform Cloud Organizations
- D. The ability to tag modules by version or release

Answer: A

Explanation:
The Terraform Cloud private registry provides the ability to restrict modules to members of Terraform Cloud or Enterprise organizations. This allows you to share modules within your organization without exposing them to the public. The private registry also supports importing modules from your private VCS repositories.
The public Terraform Module Registry, on the other hand, publishes modules from public Git repositories and makes them available to any user of Terraform. References = : Private Registry - Terraform Cloud : Terraform Registry - Provider Documentation

NEW QUESTION # 154
......

You can even print the study material and save it in your smart devices to study anywhere and pass the HashiCorp Certified:
