Valid Test ACD201 Bootcamp - Latest ACD201 Exam Pattern

It is never too late to try new things no matter how old you are. Someone always give up their dream because of their ages, someone give up trying to overcome ACD201 exam because it was difficult for them. Now, no matter what the reason you didn't pass the exam, our study materials will try our best to help you. If you are not sure what kinds of ACD201 Exam Question is appropriate for you, you can try our free demo of the PDF version. There must be one that suits you best. Your life will become more meaningful because of your new change, and our ACD201 question torrents will be your first step.

Appian Senior Developer Sample Questions (Q46-Q51):

NEW QUESTION # 46
You're refining a story regarding a highly regulated form, where information needs to be sent to a regulatory body at the end of each month to ensure that the business complies with laws and legislation. The story only concerns the creation of the form.
You need to create a form that captures information to comply with the regulatory requirements.
Which two questions should you ask the business? (Choose two.)

- A. What information does the regulatory body require?
- B. What is the maximum length of each field?
- C. Is the information sent to the regulatory body via an integration?
- D. How often is the information sent to the regulatory body?

Answer: A,B

Explanation:
Knowing what information the regulatory body requires ensures the form captures all necessary data for compliance.
Understanding the maximum length of each field guarantees that the data collected will meet validation and regulatory constraints.

NEW QUESTION # 47
You're conducting a design review.
You identify slow-performing expression rules querying a specific data store, and need to understand the
"number of operations against data stores."
Which metric from the data_store_details.csv file is helpful to you?

- A. Execute Count
- B. TCCCotal Count
- C. Query Count

Answer: C

Explanation:
The "Query Count" metric in the data_store_details.csv file indicates the number of operations (queries) performed against data stores, helping you analyze data store usage.

NEW QUESTION # 48

You're designing a report to show the total number of cases per month grouped by region. A synced record exists for the data source.

Which design pattern is most appropriate in this case?

- A. Configure a!columnChartFieid() using a!columnChartConfig() with the case creation date as the primaryGrouping and the region as the secondaryGrouping.
- B. Configure a!pieChartFieid() using a!pieChartConfig() with the case creation date as the primaryGrouping and the region as the secondaryGrouping.
- C. Use a!queryRecordType() with a!aggregationFieids() to group the case creation date by region into a local variable. Pass the local variable value into the data input of a!columnChartField()

Answer: C

Explanation:

Using a!queryRecordType() with a!aggregationFields() to group by case creation date and region, storing the result in a local variable and passing it to the data input of a!columnChartField() ensures efficient aggregation and flexible chart display for your report.

NEW QUESTION # 49

You're developing a user input form for a financial services application.

One component of this form requires you to embed an external site (in the form of a URL) that can receive inputs from Appian and return updates as the user interacts with it.

What should you do?

- A. Use the Appian out-of-the-box Web Content Component. It can display content from a URL and provide both additional inputs, or receive updates as the user interacts with the embedded site.
- B. Use a component plug-in to achieve interaction with the embedded site, because this use case requires input-output or event parameters.
- C. Use an integration to achieve interaction with the embedded site while displaying information in the Appian out-of-the-box Web Content Component. That way you can refresh for updates and interact with the site.

Answer: B

Explanation:

A component plug-in is required because the standard Web Content Component in Appian only displays external sites and does not support direct two-way interaction or input/output event handling. A plug-in enables custom integration to allow input and receive updates as users interact with the embedded site.

NEW QUESTION # 50

An insurance company's product details are currently distributed across numerous database tables, encompassing over 60 to 70 fields.

You need to implement a product comparison tool for business users to compare up to three insurance products simultaneously, with all the product details in a tabular format.

Refer to the following sample format:

Which object should be used to transform the data into the required format?

- A. Record type with relationships
- B. Stored procedure
- C. VCCCiews

Answer: C

Explanation:

Database views are ideal for transforming complex, distributed product data into a single, flattened structure tailored for reporting or comparison. In this case, a view can pivot the 60-70 fields and organize them by attribute (e.g., Name, Type, Premium) across multiple product columns, enabling a tabular comparison layout like the one shown. Views also optimize performance and reduce transformation overhead in the interface layer.

NEW QUESTION # 51

......

PDFTorrent Appian ACD201 exam preparation material is designed to help you pass the Appian ACD201 exam on your first attempt. The formats mentioned above can be used right away after buying the product. So what are waiting for, get our Appian Senior Developer (ACD201) study material today and start your constructive progress towards your goals. The rest is assured by us when you give it your all.
