

# First-grade Exam JN0-336 Tests & Passing JN0-336 Exam is No More a Challenging Task

P.S. Free 2026 Juniper JN0-336 dumps are available on Google Drive shared by ITCertMagic: <https://drive.google.com/open?id=1zpqsgDcCYfLVOVHTtLayxLls4Uko9CHD>

Successful people are those who never stop advancing. They are interested in new things and making efforts to achieve their goals. If you still have dreams and never give up, you just need our JN0-336 actual test guide to broaden your horizons and enrich your experience you can enjoy the first-class after sales service. Whenever you have questions about our JN0-336 Actual Test guide, you will get satisfied answers from our online workers through email. We are responsible for all customers. All of our JN0-336 question materials are going through strict inspection. The quality completely has no problem. The good chance will slip away if you still hesitate.

You will feel comfortable and pleasant to shop on such a good website. All the contents of our JN0-336 training dumps are organized logically. Each small part contains a specific module. You can clearly get all the information about our JN0-336 study guide. If you cannot find what you want to know, you can have a conversation with our online workers. Your questions on JN0-336 Exam Dumps will be answered accurately and quickly. We are still working hard to satisfy your demands.

## Reliable JN0-336 Test Tutorial | JN0-336 Exam Testking

If you want to achieve maximum results with minimum effort in a short period of time, and want to pass the Juniper JN0-336 Exam. You can use ITCertMagic's Juniper JN0-336 exam training materials. The training materials of ITCertMagic are the product that through the test of practice. Many candidates proved it does 100% pass the exam. With it, you will reach your goal, and can get the best results.

## Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q48-Q53):

### NEW QUESTION # 48

On which three Hypervisors is vSRX supported? (Choose three.)

- A. Hyper-V
- B. Citrix Hypervisor
- C. VMware ESXi
- D. Oracle VM
- E. KVM

Answer: A,C,E

Explanation:

vSRX is a virtual firewall that runs as a software instance on a hypervisor. A hypervisor is a software layer that allows multiple virtual machines to run on a single physical host. vSRX supports three hypervisors: VMware ESXi, Hyper-V, and KVM. VMware ESXi is a hypervisor that runs on x86 servers and supports various operating systems and applications. Hyper-V is a hypervisor that runs on

Windows Server and supports Windows and Linux virtual machines. KVM (Kernel-based Virtual Machine) is a hypervisor that runs on Linux and supports Linux, Windows, and other operating systems.

#### NEW QUESTION # 49

Which two functions does Juniper ATP Cloud perform to reduce delays in the inspection of files?  
(Choose two.)

- A. Juniper ATP Cloud uses a single antivirus software package to analyze files.
- B. Juniper ATP Cloud performs a cache lookup on files.
- C. Juniper ATP Cloud allows end users to bypass the inspection of files.
- D. Juniper ATP Cloud allows the creation of allowlists.

**Answer: B,D**

Explanation:

Juniper ATP Cloud is a cloud-based service that provides advanced threat prevention and detection for your network. It integrates with SRX Series firewalls and MX Series routers to analyze files and network traffic for signs of malicious activity.

Two functions that Juniper ATP Cloud performs to reduce delays in the inspection of files are:

Juniper ATP Cloud allows the creation of allowlists: Allowlists are lists of trusted files or file hashes that are excluded from scanning by Juniper ATP Cloud. You can create allowlists based on file name, file type, file size, file hash, or sender domain. By using allowlists, you can reduce the number of files that need to be uploaded to Juniper ATP Cloud for analysis and improve the performance and efficiency of your network.

Juniper ATP Cloud performs a cache lookup on files: Cache lookup is a process that checks if a file has been previously scanned by Juniper ATP Cloud and if there is a cached verdict for it. If there is a cached verdict, Juniper ATP Cloud returns it immediately without scanning the file again. If there is no cached verdict, Juniper ATP Cloud uploads the file for analysis. By using cache lookup, you can reduce the time and bandwidth required for scanning files by Juniper ATP Cloud.

#### NEW QUESTION # 50

You are deploying a new SRX Series device and you need to log denied traffic.

In this scenario, which two policy parameters are required to accomplish this task? (Choose two.)

- A. session-init
- B. deny
- C. count
- D. session-close

**Answer: B,D**

#### NEW QUESTION # 51

You are preparing a proposal for a new customer who has submitted the following requirements for a vSRX deployment:

- globally distributed,
- rapid provisioning,
- scale based on demand,
- and low CapEx.

Which solution satisfies these requirements?

- A. Juniper ATP Cloud
- B. AWS
- C. VMWare ESXi
- D. Network Director

**Answer: B**

Explanation:

The solution that satisfies the requirements for a vSRX deployment is AWS. AWS (Amazon Web Services) is a cloud computing

platform that provides on-demand services such as infrastructure, platform, software, and database as a service. AWS is globally distributed, meaning that it has data centers in multiple regions around the world. AWS also allows rapid provisioning, meaning that you can launch vSRX instances in minutes using preconfigured Amazon Machine Images (AMIs) or custom templates. AWS also enables scaling based on demand, meaning that you can adjust the number and size of vSRX instances according to your network traffic and performance needs. AWS also has low CapEx (capital expenditure), meaning that you only pay for what you use and do not need to invest in hardware or maintenance costs.

### NEW QUESTION # 52

Which two statements about SRX Series device chassis clusters are true? (Choose two.)

- A. Redundancy group 0 is only active on the cluster backup node.
- B. Each chassis cluster member device can host active redundancy groups
- C. Chassis cluster member devices must be the same model.
- D. Each chassis cluster member requires a unique cluster ID value.

**Answer: B,C**

Explanation:

In a chassis cluster, both nodes can host active redundancy groups. The active redundancy groups can be distributed between the two nodes, depending on the configuration and failover status, allowing each node to handle traffic for different sets of services or interfaces.

For the chassis clustering to function correctly, both nodes in the cluster must be of the same model.

This requirement ensures that the hardware capabilities, such as processing power and interface compatibility, are identical, which is crucial for maintaining consistent performance and behavior between cluster nodes.

### NEW QUESTION # 53

.....

With JN0-336 test answers, you are not like the students who use other materials. As long as the syllabus has changed, they need to repurchase new learning materials. This not only wastes a lot of money, but also wastes a lot of time. Our industry experts are constantly adding new content to JN0-336 test dumps based on constantly changing syllabus and industry development breakthroughs. We also hired dedicated IT staff to continuously update our question bank daily, so no matter when you buy JN0-336 Study Materials, what you learn is the most advanced. Even if you fail to pass the exam, as long as you are willing to continue to use our JN0-336 test answers, we will still provide you with the benefits of free updates within a year.
