

# Microsoft Realistic Verified MS-721 Answers Pass Guaranteed Quiz

2026 Latest TestInsides MS-721 PDF Dumps and MS-721 Exam Engine Free Share: [https://drive.google.com/open?id=1y651UetEc6OwpwjS\\_SPyj6Rt8fRe6EV-](https://drive.google.com/open?id=1y651UetEc6OwpwjS_SPyj6Rt8fRe6EV-)

As we always want to do better in this career, our research center has formed a group of professional experts responsible for researching new technology of the MS-721 study materials. The technology of the MS-721 practice prep will be innovated every once in a while. As you can see, we never stop innovating new version of the MS-721 Exam Questions. We really need your strong support. We always adopt the kind and useful advices of our loyal customers who wrote to us and gave us their opinions on their study.

## Microsoft MS-721 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Plan and design collaboration communications systems: This domain covers how to plan and design Teams meeting policies and settings, plan and design Teams Phone and PSTN connectivity, plan and design Teams-certified device solutions, and prepare the network for Teams.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Configure and manage Teams meetings, webinars, and town halls: In this domain, managing meeting policies including policy packages and group policy assignments are focused. More topics include configuring meeting settings, and avatars for Teams meetings, configure Microsoft Mesh meetings in Microsoft Teams, configure and manage audio conferencing, configure and manage Teams webinars, and configure and manage Teams Town halls.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Configure and manage Teams Phone: This domain covers how to configure Teams Phone policies, dial plans, calling policies, call park policies, caller ID policies, IP Phone policies, and mobility policies. Moreover, it also covers configuring auto attendants and call queues, configure dynamic emergency calling, and configuring dynamic emergency calling, configuring and managing calling features for Teams Phone, and configuring and managing calling features for Teams Phone.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Configure and manage Teams Rooms and devices: This section covers how to manage and maintain Teams Rooms and devices, device settings, local network settings, and device updates. it also covers how to configure and manage Teams Android devices and manage Teams Windows devices in addition to optional features for Teams Rooms and devices.</li> </ul>

## Newest Verified MS-721 Answers - Pass MS-721 Exam Easily

The TestInsides is committed to ace the MS-721 exam preparation at any cost. To achieve this objective the TestInsides has hired a team of experienced and certified Microsoft MS-721 exam trainers. They work together and put all their expertise to offer TestInsides MS-721 Exam Questions in three different formats. These three MS-721 exam practice question formats are PDF file, desktop practice test software, and web based practice test software.

The Microsoft MS-721 exam is designed to test the candidate's ability to design, implement, and maintain collaboration and communication systems using Microsoft technologies, including Microsoft Teams, Skype for Business, SharePoint, and Exchange. MS-721 Exam also evaluates the candidate's knowledge of security and compliance, as well as their understanding of hybrid environments and migration strategies.

### Microsoft Collaboration Communications Systems Engineer Sample Questions (Q225-Q230):

#### NEW QUESTION # 225

Exhibit

You are deploying Microsoft Teams Calling Plans.

You port all phone numbers to Microsoft Teams Phone as shown in the exhibit (Click the Exhibit tab.) You need to assign. The number -1-234-555-5334 to an auto attendant.

What should you do first?

- A. Assign the number to the resource account of the auto attendant.
- B. Get an auto attendant toll number.
- C. Create a port order for a user number.
- D. Open a Microsoft support case to initiate an inventory type change.

**Answer: C**

#### NEW QUESTION # 226

You have a Teams Phone deployment that contains an office in Mumbai.

The Mumbai office has a new Session Border Controller (SBC) named SBC1 that uses Direct Routing.

Users must be able to use SBC1 only when they are at the Mumbai office.

How should you complete the commands? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

#### NEW QUESTION # 227

Case Study 1 - Litware, Inc

Overview

Litware, Inc. is an online retailer.

Litware is replacing its telephony platform with Microsoft Teams Phone.

Currently, all users are assigned Microsoft 365 E3 licenses.

Existing Environment

Telephony Environment

The existing telecommunications system has several third-party IP-PBXes at the corporate and warehouse sites. Currently, the PBXes are linked through the corporate WAN and an inter-office dial plan is in place.

A unique PSTN direct inward dial (DID) is assigned to each user. The last five digits of each DID are used as an extension.

Litware piloted Microsoft Skype for Business Server Enterprise Voice, but has since decided to migrate directly to Teams Phone.

During the pilot, a response group was created, and the response group is still in use. Agents in the response group use Skype for Business Server- certified handsets.

Locations

Litware has global retail stores and datacenters.

The telephony topology contains the following four types of sites:

## Corporate sites

The corporate sites contain information workers who collaborate by using the Teams desktop client and SharePoint Online.

The reception desk at each corporate site has an analog intercom with an integrated door control.

Each intercom connects to an existing PBX by using an FXS Analog Telephony Adapter (ATA).

SIP trunks are delivered directly to the site by using a resilient WAN that connects directly to the on-site PBX solution.

## Warehouse sites

The warehouse sites are critical to the business. Users at these sites use either the Teams desktop client or the Teams mobile client.

Each warehouse has a public announcement (PA) system that connects to the PBX by using a SIP ATA, along with the sites' existing ISDN trunks.

Currently, users at the company's warehouse in Georgia can call the PA system by dialing 123456.

All calls to emergency services from the warehouses are played over the warehouses' PA system automatically.

WAN connectivity at the warehouses can be unreliable, so local PSTN connectivity is preferred as compared to centrally hosted connectivity.

## Retail sites

Each retail site has only one or two desk phones and a specialized point of sale (POS) computer that cannot run the desktop or web versions of the Teams client.

Users at the retail sites have the Teams app and an associated data plan installed on their mobile device.

Currently, each retail uses a managed SD-WAN appliance to connect to both the internet and the corporate WAN.

The users report that in the event of an internet outage at the retail sites, they can use their mobile devices, which have strong reception.

## Requirements

### Planned Changes

Litware plans to implement the following changes:

- \* Maintain the existing emergency call PA integration.

- \* Replace the existing IP-PBX solutions by using Teams Phone.

- \* Consolidate all its PSTN trunks by using region-specific datacenters, whenever possible. During the planned deployment of Teams Phone, Litware will open a new retail site in the United Kingdom that will have five users. Litware does not have any existing telephony in the United Kingdom. Management at the new retail site wants to use Microsoft Teams Calling Plans for the users.

You are opening a new warehouse site in Melbourne. The new warehouse will connect to a phone carrier by using a Session Border Controller (SBC). Dialing rules are an area code of two digits beginning with a zero followed by a subscriber number of eight digits. For example, an E.164 number of +61370105550 will be translated to 03 7010 5550 and +61255505550 will be translated to 02 5550 5550.

### Technical Requirements

Litware identifies the following technical requirements:

- \* Minimize the amount of voice traffic over the WAN.

- \* Whenever possible, use natively supported Teams solutions.

- \* Avoid replacing existing analog device adapters and SIP phones.

- \* Assign a Microsoft 365 Phone System license to all the users listed in a CSV file.

- \* Ensure that the retail sites can place and receive calls in the event of a WAN failure.

- \* Assign a phone number of +61370105550 to a user named User1. User1 is located at a corporate site.

- \* Ensure that the warehouse sites maintain calling in the event of an internet outage or Teams service failure.

- \* Provide users at the United Kingdom retail site with phone numbers. The users must only be allowed to make in-country calls.

- \* Replace the response group from the Skype for Business Server Voice Enterprise pilot with a call queue. The agents must be able to use their existing handset.

You need to connect the analog intercoms to Teams Phone.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a trusted application endpoint for Teams.
- B. Create a configuration profile for IP phones.
- C. Register the ATAs with a Teams-certified SBC.
- D. Enable Direct Routing to a Teams-certified SBC.
- E. Create a resource account for each intercom.

**Answer: C,D**
