

# Latest C-BW4H-2505 Study Notes | Latest C-BW4H-2505 Test Questions

P.S. Free 2026 SAP C-BW4H-2505 dumps are available on Google Drive shared by ExamDiscuss:  
<https://drive.google.com/open?id=1OrT3eAyyEZLZ1BSyNegFTnNrg3HepVYs>

We learned that a majority of the candidates for the C-BW4H-2505 exam are office workers or students who are occupied with a lot of things, and do not have plenty of time to prepare for the C-BW4H-2505 exam. Taking this into consideration, we have tried to improve the quality of our C-BW4H-2505 Training Materials for all our worth. Now, I am proud to tell you that our C-BW4H-2505 study dumps are definitely the best choice for those who have been yearning for success but without enough time to put into it.

## SAP C-BW4H-2505 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Data Acquisition into SAP BW</li> <li>4HANA: This section tests how Data Engineers manage data integration into SAP BW</li> <li>4HANA from multiple sources. It covers essential knowledge of tools and processes used for data extraction, transformation, and loading into the SAP environment.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Fundamentals: This section of the exam measures the foundational understanding of SAP Consultants and covers essential terms and concepts related to SAP BW</li> <li>4HANA and SAP Business Data Cloud. It focuses on the core framework and architecture necessary to navigate and work with these platforms.</li> </ul>

Topic 3	<ul style="list-style-type: none"> <li>• SAP BW Query Design: This section of the exam assesses the ability of Data Engineers to create and run queries using SAP BW</li> <li>• 4HANA. It evaluates how well candidates can work with query components to retrieve and structure data effectively for reporting and analysis.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• SAP BW</li> <li>• 4HANA Project and the Modeling Process: This section of the exam assesses how Data Engineers guide and contribute to SAP BW</li> <li>• 4HANA projects. It includes knowledge of modeling workflows, project lifecycle stages, and collaboration strategies within project teams.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Data Acquisition into SAP HANA: This section evaluates the capacity of SAP Consultants to integrate various data sources into SAP HANA. It assesses their ability to understand different ingestion techniques and ensure data accessibility for processing.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• SAP BW</li> <li>• 4HANA Modeling: This section targets the skills of Data Engineers in selecting appropriate modeling options and applying best practices like LSA++ within SAP BW</li> <li>• 4HANA. It focuses on designing scalable, high-performing data models.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• InfoObjects and InfoProviders: This section tests the knowledge of Data Engineers in working with InfoObjects and InfoProviders in SAP BW</li> <li>• 4HANA. It involves handling data structures used for organizing, storing, and accessing analytical data.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• SAP Analytics Tools and SAP Analytics Cloud: This section evaluates the skills of SAP Consultants in using tools like SAP Analytics Cloud, Lumira, and Analysis for Office to visualize and interpret data. It focuses on the consultant's ability to apply business intelligence tools within the SAP ecosystem.</li> </ul>

## SAP's Exam Questions for C-BW4H-2505 Guarantee First Attempt Success and Achieve Your Goals

Our C-BW4H-2505 study braindumps can be very good to meet user demand in this respect, allow the user to read and write in a good environment continuously consolidate what they learned. Our C-BW4H-2505 prep guide has high quality. So there is all effective and central practice for you to prepare for your test. With our professional ability, we can accord to the necessary testing points to edit C-BW4H-2505 Exam Questions. So high quality C-BW4H-2505 materials can help you to pass your exam effectively, make you feel easy, to achieve your goal.

## SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q20-Q25):

### NEW QUESTION # 20

Why do you use an authorization variable?

- A. To provide an analysis authorization with dynamic values
- B. To provide dynamic values for the authorization object S\_RS\_COMP
- C. To filter a query based on the authorized values
- D. To protect a variable using an authorization object

**Answer: A**

Explanation:

Authorization variables in SAP BW/4HANA are used to dynamically assign values to analysis authorizations, ensuring that users can only access data they are authorized to view. Let's analyze each option to determine why D is correct:

\* Explanation: The authorization object S\_RS\_COMP is related to CompositeProviders and their components. While this object plays a role in restricting access to specific CompositeProvider components, it is not directly tied to the use of authorization

variables. Authorization variables are specifically designed for analysis authorizations, not for generic authorization objects like S\_RS\_COMP.

\* Authorization variables are part of the analysis authorization framework, which focuses on restricting access to data based on characteristic values.

2. To filter a query based on the authorized values (Option B) Explanation: Filtering a query based on authorized values is a function of analysis authorizations themselves, not authorization variables.

Authorization variables are used to dynamically populate the values within an analysis authorization, but they do not directly filter queries.

Reference: Query filtering based on authorized values is handled by the runtime behavior of analysis authorizations, not by the variables themselves.

3. To protect a variable using an authorization object (Option C) Explanation: Protecting a variable using an authorization object is unrelated to the purpose of authorization variables. Variables in SAP BW/4HANA are typically protected through input validation or restrictions, but this is not the role of authorization variables.

Reference: Authorization variables are used to dynamically assign values to analysis authorizations, not to secure other variables.

4. To provide an analysis authorization with dynamic values (Option D) Explanation: Authorization variables are specifically designed to dynamically assign values to analysis authorizations at runtime. For example, you can use an authorization variable to restrict access to data based on the user's login ID, organizational unit, or other dynamic criteria. This ensures that users only see the data they are authorized to access without requiring static pre-defined values.

Reference: In SAP BW/4HANA, authorization variables are a key feature of the analysis authorization framework. They allow for flexible and dynamic restrictions, enhancing security and usability.

Conclusion The correct answer is D (To provide an analysis authorization with dynamic values). Authorization variables play a critical role in dynamically assigning values to analysis authorizations, ensuring that users can only access the data they are authorized to view.

## NEW QUESTION # 21

Which are use cases for sharing an object? Note: There are 3 correct answers to this question.

- A. A product dimension view should be used in different fact models for different business segments.
- B. Time tables are defined in a central space should be used in many other spaces.
- C. Use remote tables located in the SAP BW bridge space across SAP DataSphere core spaces.
- D. A source connection needs to be used in different replication flows.
- E. A BW time characteristic should be used across multiple DataStore objects (advanced).

**Answer: A,B,E**

Explanation:

Sharing objects is a common requirement in SAP Data Fabric and SAP BW/4HANA environments to ensure reusability, consistency, and efficiency. Below is a detailed explanation of why the correct answers are A, B, and D:

\* Correct: Sharing a product dimension view across multiple fact models is a typical use case in data modeling. By reusing the same dimension view, you ensure consistency in how product-related attributes (e.g., product name, category, or hierarchy) are represented across different business segments. This approach avoids redundancy and ensures uniformity in reporting and analytics.

Option A: A product dimension view should be used in different fact models for different business segments

\* Correct: Time characteristics, such as fiscal year, calendar year, or week, are often reused across multiple DataStore objects (DSOs) in SAP BW/4HANA. Sharing a single time characteristic ensures that all DSOs use the same time-related definitions, which is critical for accurate time-based analysis and reporting.

Option B: A BW time characteristic should be used across multiple DataStore objects (advanced)

\* Incorrect: While source connections can technically be reused in different replication flows, this is not considered a primary use case for "sharing an object" in the context of SAP Data Fabric. Source connections are typically managed at the system level rather than being shared as reusable objects within the data model.

Option C: A source connection needs to be used in different replication flows

\* Correct: Centralized time tables are often created in a shared or central space to ensure consistency across different spaces or workspaces in SAP DataSphere. By sharing these tables, you avoid duplicating time-related data and ensure that all dependent models use the same time definitions.

Option D: Time tables are defined in a central space should be used in many other spaces

\* Incorrect: While remote tables in the SAP BW bridge space can be accessed across SAP DataSphere core spaces, this is more about cross-space access rather than "sharing an object" in the traditional sense. The focus here is on connectivity rather than reusability.

Option E: Use remote tables located in the SAP BW bridge space across SAP DataSphere core spaces

\* SAP DataSphere Documentation: Highlights the importance of centralizing and sharing objects like dimensions and time tables to ensure consistency across spaces.

\* SAP BW/4HANA Modeling Guide: Discusses the reuse of time characteristics and dimension views in multiple DSOs and fact models.

\* SAP Data Fabric Architecture: Emphasizes the role of shared objects in reducing redundancy and improving data governance.

#### NEW QUESTION # 22

In SAP Web IDE for SAP HANA, you have imported a project including an HDB module with calculation views. What do you need to do in the project settings before you can successfully build the HDB module?

- A. Change the schema name
- B. Define a package
- C. Assign a space
- D. Generate the HDI container

Answer: C

#### NEW QUESTION # 23

In a DataStore object (advanced) of type Data Mart, which request-based deletion is possible?

- A. Only the most recent request in the active data table
- B. Only the most recent not activated request in the inbound table
- C. Any not activated request in the inbound table
- D. Any request in the active data table

Answer: B,C

#### NEW QUESTION # 24

What are benefits of separating master data from transactional data in SAP BW/4HANA? Note: There are 3 correct answers to this question.

- A. Ensuring referential integrity on your transactional data
- B. Allowing different data load frequency
- C. Providing language-dependent master data texts
- D. Avoiding generation of SID values
- E. Reducing the number of database tables

Answer: A,B,C

#### NEW QUESTION # 25

.....

Successful people are those who never stop advancing. They are interested in new things and making efforts to achieve their goals. If you still have dreams and never give up, you just need our C-BW4H-2505 actual test guide to broaden your horizons and enrich your experience. You can enjoy the first-class after sales service. Whenever you have questions about our C-BW4H-2505 Actual Test guide, you will get satisfied answers from our online workers through email. We are responsible for all customers. All of our C-BW4H-2505 question materials are going through strict inspection. The quality completely has no problem. The good chance will slip away if you still hesitate.
