Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q127-Q132):

NEW QUESTION # 127
Your administrator creates maintenance conditions on the Maintain Project Enterprise Labor Resources page.
An HCM person is included in a condition with a process order value of 1 and, additionally, there are three other conditions, all with a process order value of 10. Identify two correct statements about the Maintain Project Enterprise Labor Resources process as it relates to process order values. (Choose two.)

- A. For the three conditions that have the same process order value of 10, the records are processed in ascending numeric order based on the condition name.
- B. For the three conditions that have the same process order value of 10, the records are processed in ascending alphabetic order based on the condition name.
- C. The process creates a resource by using the conditions with a process order value of 10 but does not create more than one resource for the same person even if subsequent conditions apply to the person.
- D. The process creates a resource by using the condition with a process order value of 1 but does not create more than one resource for the same person even if subsequent conditions apply to the person.

Answer: B,D

Explanation:
Reference:https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapex/define-project- resource-management-configuration.html#OAPEX1449200 Topic - FAQs for Define Project Enterprise Labor Resources What's the processing order of project enterprise labor resource maintenance conditions?
Records are processed by the Maintain Project Enterprise Labor Resources process in ascending order based on the process order value that you specify on the Create Condition page. For example, assume that an HCM person is included in a condition with a process order value of 1. If a resource doesn't already exist for that person, then the process creates a resource for the condition with the process order value of 1. The process doesn't create more than one resource for the same person even if subsequent conditions apply to the person.
If multiple conditions have the same process order value, then records are processed in ascending alphabetic order based on the condition name.

NEW QUESTION # 128
As you go through the first-quarter close for your customer, you notice that the burden amounts calculated do not seem to be right. Based on the calculations, you notice that the amounts calculated are not considering the burden schedule override at a task level, which was done during the second month of the quarter.
What is the reason for this problem?

- A. Only new expenditure items charged to the task use the new burden schedule; expenditure items processed earlier cannot be reprocessed.
- B. Only new expenditure items charged to the task use the new burden schedule; expenditure items processed earlier can be manually marked for reprocessing.
- C. All expenditure items charged to the task use the new burden schedule.
- D. You can enable automatic reprocessing of expenditure items processed before the burden schedule change.

"The search for resources cannot be completed because the project resource search index is not available. Contact your help desk."
Identify the cause for this error message. (Choose the best answer.)

- A. The index is in the process of being updated.
- B. The index is not in the process.
- C. The index has been built.
- D. The most recent update of the index finished successfully.

Answer: A

Explanation:
Ref: https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/fapfm/implementing-project- execution-management-applications.html#FAPFM1724547 Topic - Submitting the Process to Maintain Project Resource Search Index: Procedure Submit the Maintain Project Resource Search Index job set to update the resources that appear on the Search and Evaluate Resources page when a resource manager searches for resources to fulfill project resource requests. The job set consists of a set of processes that facilitate efficient and rapid searches for qualified resources.
Resource managers can't search for resources or view resource details if the search index isn't available for a project resource request with qualifications or keywords. For project resource requests without qualifications and keywords, resource managers can search for and evaluate resources based on resource availability even if the search index isn't current or available.
Caution: The search index isn't available if the Maintain Project Resource Search Index job set process fails, or while the process is running.
