## 最新的 UiPath Certified Professional UiPath-ABAv1 免費考試真題 (Q161-Q166):

### 問題 #161

What is an Asset in UiPath?

- A. A way to store and manage the source code for custom activities.
- B. A way to store and organize project-related files and folders.
- C. A way to store and organize reusable automation components within the platform.
- D. A way to store shared variables or credentials that can be used in different automation projects.

答案: D

解題說明:

In UiPath Orchestrator, Assets are managed resources such as credentials, connection strings, or other variable data that multiple processes can access securely. According to UiPath:

"Assets in Orchestrator are shared variables or credentials that can be used in automation projects, ensuring centralized management

and secure access control." Assets are configured and managed through Orchestrator, allowing for seamless updates without modifying individual automation projects.

#### 問題 #162

For text assets, is there any character limit for the Global Value Field?

- A. Yes, this field allows for up to 4000 characters
- B. Yes, this field allows for up to 1000000 characters
- C. No, there is no such limit
- D. Yes, this field allows for up to 100000 characters

答案: A

解題說明:

For text assets in UiPath, there is a character limit for the Global Value Field, which allows for up to 4000 characters. This limit is important for managing data sizes and ensuring performance and stability within the UiPath Orchestrator environment. References:

#### 問題 #165

What is same-screen detection for actions recorded in an UiPath Task Capture diagram?

- A. After finishing the capture process, Task Capture offers to detect actions per all documents that contain similar screenshots and also offers to merge them. The merge is automatic, thus making the process fast and efficient
- B. Prior to starting the capture process, Task Capture analyzes the applications used and groups them by similarity of appearance, so that during the recording the screenshots will be automatically grouped
- C. After finishing the capture process, Task Capture offers to detect actions per all documents that contain similar screenshots and also offers to merge them. The actions can also be manually reviewed prior to merging

- D. During the capture process Task Capture automatically detects actions that contain similar screenshots and also merges them

答案：C

解題說明：

In an UiPath Task Capture diagram, same-screen detection for actions recorded is described by the feature where after finishing the capture process, Task Capture offers to detect actions per all documents that contain similar screenshots and also offers to merge them. The actions can also be manually reviewed prior to merging. This feature ensures that similar actions are grouped, enhancing the clarity and efficiency of the process documentation.
