For candidates who prefer a more flexible and convenient option, WGU provides the Web-Development-Applications PDF file, which can be easily printed and studied at any time. The PDF file contains the latest real WGU Web Development Applications (Web-Development-Applications) questions, and Web-Development-Applications ensures that the file is regularly updated to keep up with any changes in the exam's content.

WGU Web-Development-Applications Exam Syllabus Topics:

Topic	Details

Topic 1	• Responsive Web Design (RWD) for Browsers and Apps: This section of the exam measures skills of Front-End Designers and covers concepts related to mobile-first layout planning, responsive frameworks, and techniques used to ensure compatibility with modern browsers and applications. Candidates must demonstrate how to adjust elements for better usability on mobile devices and apply responsive strategies that allow a single design to function seamlessly across various environments.
Topic 2	• HTML5, CSS3, and JavaScript Foundations: This section of the exam measures skills of Web Developers and covers the essential ability to manually code using HTML5, CSS3, and JavaScript to create structured, visually styled, and interactive web content. It focuses on building accurate page layouts, applying modern styling rules, and writing basic scripts that support user interaction. The aim is to ensure candidates can construct professional web documents using current standards and properly integrate all three technologies.
Topic 3	• Creating Adaptive Web Documents and Pages: This section of the exam measures skills of Front-End Designers and covers the techniques needed to make websites display correctly across traditional desktops and mobile devices. It emphasizes adaptive page layout, flexible formatting, and user-friendly presentation so that content remains readable and functional on screens of different sizes. Candidates are expected to show an understanding of how to create consistent designs that respond smoothly to device changes.
Topic 4	• Validation, Testing, and Form Development: This section of the exam measures skills of Web Developers and covers the ability to validate code, test web pages for accuracy, and build form components. It includes understanding how to detect errors, ensure compliance with standards, and implement form fields with inline validation to improve user experience. The focus is on creating forms that work reliably, meet usability expectations, and maintain proper data entry flow.

Act now, join us, and buy our Web-Development-Applications Study Materials. You will feel very happy that you will be about to change well because of our Web-Development-Applications study guide.

WGU Web Development Applications Sample Questions (Q81-Q86):

NEW QUESTION # 81
Given the following JavaScript code:
What happens when this code is executed?

- A. The object with the id innerHTML is changed to 6.
- B. The object with the demo is changed to 6.
- C. The object with the id innerHTML is changed to x.
- D. The object with the id demo is changed to x.

Answer: B

Explanation:
The provided JavaScript code sets a variable x to 6 and then assigns this value to the innerHTML of the HTML element with the id demo.
var x;
x = 6;
document.getElementById("demo").innerHTML = x;
Explanation:
* Variable Declaration: var x; declares the variable x.

* Variable Assignment: x = 6; assigns the value 6 to the variable x.
* DOM Manipulation: document.getElementById("demo").innerHTML = x; finds the element with id demo and sets its innerHTML to the value of x, which is 6.
Outcome:
* The content of the HTML element with the id demo will be changed to 6.
References:
* MDN Web Docs on getElementById
* W3C JavaScript DOM Manipulation

NEW QUESTION # 82
Given the following markup:

Where does the image align in relation to the text?

- A. The bottom of the image aligns to the top of Held world.
- B. The top of The image aligns to the top of Hello World
- C. The lop of the image aligns the bottom of Hello world.
- D. The bottom of the Image aligns to the bottom of Hello World

Answer: D

Explanation:
The CSS property vertical-align: baseline aligns the baseline of the element with the baseline of its parent. For inline elements like images, the baseline alignment means that the bottom of the image aligns with the bottom of the text.
* CSS vertical-align Property:
* Baseline Alignment: Aligns the baseline of the element with the baseline of its parent.
* Example:
<p>Hello World<img src="sample.jpg" style="vertical-align:baseline"></p>
* Analysis:
* The <img> element with vertical-align: baseline will align its bottom with the bottom of the surrounding text "Hello World".
* References:
* MDN Web Docs - vertical-align
* W3C CSS Inline Layout Module Level 3

NEW QUESTION # 83
Which tag is required when importing the jQuery library?

- A. `<meta>`
- B. `<section>`
- C. `<script>`
- D. `<body>`

Answer: C

Explanation:
> "The `<script>` tag is used to include JavaScript code or import external JavaScript libraries such as jQuery into an HTML document." Example:
```html
<script src="https://code.jquery.com/jquery-3.6.0.min.js"></script>
```
References:
* MDN Web Docs: HTML <script> element
* jQuery Documentation: Getting Started

NEW QUESTION # 84
Which element attaches an external CSS document to a web page?

- A. <style>
- B. <Link>
- C. <Meta>
- D. <Script>

Answer: B

Explanation:
To attach an external CSS document to a web page, the <link> element is used within the <head> section of the HTML document.
* <link> Element:
* Purpose: Links external resources, such as stylesheets, to the HTML document.
* Attributes:
* rel="stylesheet": Specifies the relationship between the current document and the linked resource.
* href="path/to/stylesheet.css": Specifies the URL of the external stylesheet.
* Example:
<head>
<link rel="stylesheet" href="styles.css">
</head>
* Other Options:
* <style>: Used to embed internal CSS directly within the HTML document, not for linking external CSS.
* <script>: Used to embed or link to JavaScript files.
* <meta>: Provides metadata about the HTML document, not for linking stylesheets.
* References:
* W3C HTML5 Specification - The link element
* MDN Web Docs - <link>
By using the <link> element correctly, you can ensure that your web page is styled with external CSS, maintaining a separation of concerns and making your HTML more manageable.

NEW QUESTION # 85
Which 3D transform affects the distance between the z-plane and the user?

- A. ☐
- B. ☐
- C. ☐
- D. ☐

Answer: B

Explanation:
Theperspective(n)method in CSS is used to affect the distance between the z-plane and the user, effectively changing the perspective depth of a 3D transformed element.
* perspective(n)Method: Theperspectivefunction defines how far the element is from the user. It affects the appearance of the 3D transformed element, giving it a sense of depth.
* Usage Example:
container {
perspective: 1000px;
}
In this example, the perspective is set to 1000 pixels, which defines the distance between the z-plane and the user.
* Properties:
* n: This represents the perspective distance. The lower the value, the more pronounced the perspective effect.
