When you decide to prepare for the Google certification, you must want to pass at first attempt. Now, make a risk-free investment in training and certification with the help of Professional-Cloud-Database-Engineer practice torrent. Our Professional-Cloud-Database-Engineer test engine allows you to practice until you think it is ok. Our Professional-Cloud-Database-Engineer Questions are the best relevant and can hit the actual test, which lead you successfully pass. Please feel confident about your Professional-Cloud-Database-Engineer preparation with our 100% pass guarantee.

Earning the Google Professional-Cloud-Database-Engineer Certification demonstrates your proficiency in designing, deploying, and managing scalable, secure, and highly available database solutions on Google Cloud Platform. It also proves your ability to optimize database performance, ensure data integrity, and implement disaster recovery and business continuity solutions. As a Google Cloud Certified - Professional Cloud Database Engineer, you will be recognized as an expert in the field of cloud-based database solutions and will have a competitive edge in the job market.

Google Professional-Cloud-Database-Engineer certification is designed for individuals who possess a deep understanding of Google Cloud Platform's database services, best practices, and solutions. Google Cloud Certified - Professional Cloud Database Engineer certification is ideal for IT professionals who specialize in database administration, engineering, or architecture and are looking to validate their skills and knowledge in this field. By obtaining this certification, individuals can demonstrate their expertise in designing, deploying, and managing highly available, scalable, and secure databases on Google Cloud Platform.

## Latest Released Google Professional-Cloud-Database-Engineer Test Assessment: Google Cloud Certified - Professional Cloud Database Engineer - Professional-Cloud-Database-Engineer Latest Test Camp

What do you think of using PassLeaderVCE Google Professional-Cloud-Database-Engineer Exam Dumps? PassLeaderVCE Google Professional-Cloud-Database-Engineer certification training dumps, it may be said, is the most excellent reference materials among all exam-related reference materials. Why? There are four reasons in the following. Firstly, PassLeaderVCE exam dumps are researched by IT experts who used their experience for years and can figure out accurately the scope of the examinations. Secondly, PassLeaderVCE exam dumps conclude all questions that can appear in the real exam. Thirdly, PassLeaderVCE exam dumps ensures the candidate will pass their exam at the first attempt. If the candidate fails the exam, PassLeaderVCE will give him FULL REFUND. Fourthly, PassLeaderVCE exam dumps have two versions: PDF and SOFT version. With the two versions, the candidates can pass their exam with ease.

Google Professional-Cloud-Database-Engineer Exam is a professional certification that assesses an individual's knowledge and expertise in designing, developing, and managing Google Cloud Platform database solutions. Google Cloud Certified - Professional

Cloud Database Engineer certification is intended for individuals with experience in database development and management who wish to validate their skills in the latest Google Cloud Platform database technologies.

## Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q72-Q77):

### NEW QUESTION # 72

You are running a large, highly transactional application on Oracle Real Application Cluster (RAC) that is multi-tenant and uses shared storage. You need a solution that ensures high-performance throughput and a low-latency connection between applications and databases. The solution must also support existing Oracle features and provide ease of migration to Google Cloud. What should you do?

- **A. Migrate to Bare Metal Solution for Oracle.**
- B. Migrate to Compute Engine.
- C. Migrate to Google Cloud VMware Engine
- D. Migrate to Google Kubernetes Engine (GKE)

**Answer: A**

Explanation:

Oracle is neither licensed nor supported in GCE. The only platform which supports RAC and all existing Oracle features is BMS.

### NEW QUESTION # 73

You are designing for a write-heavy application. During testing, you discover that the write workloads are performant in a regional Cloud Spanner instance but slow down by an order of magnitude in a multi-regional instance. You want to make the write workloads faster in a multi-regional instance. What should you do?

- **A. Add more read-write replicas.**
- B. Place the bulk of the read and write workloads closer to the default leader region.
- C. Keep the total CPU utilization under 45% in each region.
- D. Use staleness of at least 15 seconds.

**Answer: A**

### NEW QUESTION # 74

You recently launched a new product to the US market. You currently have two Bigtable clusters in one US region to serve all the traffic. Your marketing team is planning an immediate expansion to APAC. You need to roll out the regional expansion while implementing high availability according to Google-recommended practices. What should you do?

- A. Maintain a target of 23% CPU utilization by locating:  
cluster-a in zone us-central1-a  
cluster-b in zone europe-west1-d  
cluster-c in zone asia-east1-b
- B. Maintain a target of 35% CPU utilization by locating:  
cluster-a in zone us-central1-a  
cluster-b in zone australia-southeast1-a  
cluster-c in zone europe-west1-d  
cluster-d in zone asia-east1-b
- C. Maintain a target of 23% CPU utilization by locating:  
cluster-a in zone us-central1-a  
cluster-b in zone us-central1-b  
cluster-c in zone us-east1-a
- **D. Maintain a target of 35% CPU utilization by locating:  
cluster-a in zone us-central1-a  
cluster-b in zone us-central2-a  
cluster-c in zone asia-northeast1-b  
cluster-d in zone asia-east1-b**

**Answer: D**

#### NEW QUESTION # 75

Your company is developing a new global transactional application that must be ACID-compliant and have 99.999% availability. You are responsible for selecting the appropriate Google Cloud database to serve as a datastore for this new application. What should you do?

- **A. Use Cloud SQL.**
- B. Use Cloud Spanner.
- C. Use Bigtable.
- D. Use Firestore.

**Answer: A**

#### NEW QUESTION # 76

Your team recently released a new version of a highly consumed application to accommodate additional user traffic. Shortly after the release, you received an alert from your production monitoring team that there is consistently high replication lag between your primary instance and the read replicas of your Cloud SQL for MySQL instances. You need to resolve the replication lag. What should you do?

- A. Identify and optimize slow running queries, or set parallel replication flags.
- B. Stop all running queries, and re-create the replicas.
- C. Edit the primary instance to add additional memory.
- **D. Edit the primary instance to upgrade to a larger disk, and increase vCPU count.**

**Answer: D**

#### NEW QUESTION # 77
