

JN0-336 Test Study Guide & New JN0-336 Test Answers

P.S. Free 2026 Juniper JN0-336 dumps are available on Google Drive shared by DumpsValid: <https://drive.google.com/open?id=19eM2JQfQPRsLE9tVIdESz8CP7bnRVDU>

Our JN0-336 study materials are easy to be mastered and boost varied functions. We compile Our JN0-336 preparation questions elaborately and provide the wonderful service to you thus you can get a good learning and preparation for the JN0-336 exam. Now there are introduces on the web for you to know the characteristics and functions of our JN0-336 Training Materials in detail. And we also have free demo on the web for you to have a try on our JN0-336 exam questions. You will be touched by our great quality of JN0-336 study guide.

JN0-336 PDF questions can be read on various smart devices such as laptops, tablets, and smartphones. Juniper JN0-336 PDF format is easier to download and use. Our Juniper JN0-336 exam questions in PDF file can be printed, making it easy to study via a hard copy. To be recognized by Juniper JN0-336 candidates must pass the Security, Specialist (JNCIS-SEC) (JN0-336) exam and the registration fee for the exam is high, between \$100 and \$1000. Therefore, candidates will never risk their precious time and money.

New JN0-336 Test Answers & New JN0-336 Study Plan

In today's global market, tens of thousands of companies and business people are involved in this line of JN0-336 exam. It is of utmost importance to inquire into the status of exam candidates' wills to figure out what are the JN0-336 practice materials you really needed. According to your requirements we made our JN0-336 Study Materials for your information, and for our pass rate of the JN0-336 exam questions is high as 98% to 100%, we can claim that you will pass the exam for sure.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q76-Q81):

NEW QUESTION # 76

You want to control when cluster failovers occur.

In this scenario, which two specific parameters would you configure on an SRX Series device? (Choose two.)

- A. heartbeat-threshold
- B. heartbeat-cos
- C. heartbeat-interval
- D. heartbeat-address

Answer: A,C

Explanation:

To control when cluster failovers occur, you need to configure two specific parameters on an SRX Series device: heartbeat-interval and heartbeat-threshold. These parameters determine how often the nodes in a cluster exchange heartbeat messages and how many consecutive heartbeats can be missed before a failover is triggered. The heartbeat-interval specifies the time interval in seconds between each heartbeat message. The default value is 1 second and the range is from 0.1 to 10 seconds. The heartbeat- threshold

specifies the number of consecutive heartbeats that must be missed before a failover occurs.

The default value is 3 and the range is from 2 to 255.

NEW QUESTION # 77

Which two statements are true about the vSRX? (Choose two.)

- A. It does not have VMXNET3 vNIC support.
- **B. It has VMXNET3 vNIC support.**
- C. UNIX is the base OS.
- **D. Linux is the base OS.**

Answer: B,D

Explanation:

Reference: Juniper Networks Security, Specialist (JNCIS-SEC) Study Guide, Chapter 1: Introduction to Junos Security, page 1-8.

The vSRX is a virtual security appliance that runs on a virtual machine. It provides firewall, VPN, and other security services in a virtualized environment.

The vSRX is based on a version of Junos OS that is optimized for virtualization. It runs on a Linux kernel and uses a KVM hypervisor. It supports VMware ESXi and KVM hypervisors.

The vSRX has support for VMXNET3 vNICs, which are high-performance virtual network interfaces provided by VMware. These interfaces can provide higher throughput and lower CPU utilization than other virtual NIC types.

NEW QUESTION # 78

Which statement about security policy schedulers is correct?

- **A. Multiple policies can use the same scheduler.**
- B. When the scheduler is disabled, the policy will still be available.
- C. A policy can have multiple schedulers.
- D. A policy without a defined scheduler will not become active

Answer: A

Explanation:

Schedulers can be defined and reused by multiple policies, allowing for more efficient management of policy activation and deactivation. This can be particularly useful for policies that need to be activated during specific time periods, such as business hours or maintenance windows.

NEW QUESTION # 79

Exhibit

Referring to the SRX Series flow module diagram shown in the exhibit, where is application security processed?

- **A. Services ALGs**
- B. Screens
- C. Security Policy
- D. Forwarding Lookup

Answer: A

NEW QUESTION # 80

Click the Exhibit button.

You have implemented SSL client protection proxy. Employees are receiving the error shown in the exhibit.

How do you solve this problem?

- A. Install a new SRX Series device to act as the client proxy
- **B. Import the existing certificate to each client device.**

- C. Reboot the SRX Series device.
- D. Load a known good, but expired. CA certificate onto the SRX Series device.

Answer: B

Explanation:

SSL client protection proxy is a feature that allows you to decrypt and inspect the SSL traffic from clients to servers. To do this, you need to install a certificate authority (CA) certificate on the SRX Series device and import the same certificate to each client device. This way, the SRX Series device can act as a proxy between the client and the server and perform security checks on the decrypted traffic. If the client device does not have the certificate installed, it will receive an error message like the one shown in the exhibit.
