私たちのISO-IEC-27001-Foundation試験問題は、最も重要で効果的な報酬は、あなたが試験に合格させ、ISO-IEC-27001-Foundation認定試験資格書を得ることです。そしてそれは、すべての受験者が気になるものです。同時に、ISO-IEC-27001-Foundationでより実用的なスキルを得ることもでき、あなたの仕事の効率を向上させます。私たちのISO-IEC-27001-Foundation試験問題は信頼に値する商品です。

APMG-International ISO-IEC-27001-Foundation 認定試験の出題範囲:

トピック	出題範囲
トピック 1	Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
トピック 2	Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.
トピック 3	Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.
トピック 4	Self Confidence: Self-confidence is the belief in one’s abilities, competence, and value, reflecting a sense of assurance and inner strength.
トピック 5	Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.
トピック 6	Compliance: Regulatory compliance refers to an organization’s commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.
トピック 7	Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.

我々CertJukenでは、あなたは一番優秀なAPMG-International ISO-IEC-27001-Foundation問題集を発見できます。我が社のサービスもいいです。購入した前、弊社はあなたが準備したいISO-IEC-27001-Foundation試験問題集のサンプルを無料で提供します。購入した後、一年間の無料サービス更新を提供します。APMG-International ISO-IEC-27001-Foundation問題集に合格しないなら、180日内で全額返金します。あるいは、他の科目の試験を変えていいです。

APMG-International ISO/IEC 27001 (2022) Foundation Exam 認定 ISO-IEC-27001-Foundation 試験問題 (Q48-Q53):

質問 # 48

Identify the missing words in the following sentence.

The organization shall establish, implement, maintain and [?] an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document.

- A. enforce standards for
- B. report on
- C. continually improve
- D. communicate the importance of

正解: C

解説:

Clause 4.4 of ISO/IEC 27001:2022 states:

"The organization shall establish, implement, maintain and continually improve an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document." This requirement highlights that an ISMS is not static; it must evolve continuously to adapt to new risks, technologies, and business changes. Options A, C, and D are not mentioned in the clause. The continual improvement cycle is central to ISO standards, aligning with the Plan-Do-Check-Act (PDCA) model.

Thus, the missing words are "continually improve."

質問 # 49

Which attribute is NOT a required focus of continual ISMS improvement?

- A. Suitability
- B. Effectiveness
- C. Importance
- D. Adequacy

正解: C

解説:

Clause 10.2 (Continual Improvement) specifies that the organization must "continually improve the suitability, adequacy and effectiveness of the information security management system." This makes it clear that three attributes are explicitly required to be addressed:

* Suitability: ensuring the ISMS continues to meet organizational needs in changing contexts.

* Adequacy: ensuring the ISMS covers the necessary scope and provides sufficient control coverage.

* Effectiveness: ensuring the ISMS achieves intended outcomes in protecting information security.

The word "importance" is not part of the continual improvement requirement. Importance is implicit in prioritization of risks and actions, but it is not a required continual improvement attribute in ISO/IEC 27001.

Therefore, option D: Importance is the correct choice as it is not specified.

This distinction reinforces that continual improvement is not about subjective importance, but about systematic enhancement of the ISMS's suitability, adequacy, and effectiveness.

質問 # 50

Which factor is required to be determined when understanding the organization and its context?

- **A. Internal issues affecting the purpose of the ISMS**
- B. The ISO/IEC 27001 clauses which apply to the management system
- C. The information security objectives relevant to the ISMS
- D. The processes that will be required to operate the ISMS

正解: A

解説:

Clause 4.1 specifies exactly what must be determined when establishing context: "The organization shall determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended outcome(s) of its information security management system." This requirement is about understanding internal and external issues (e.g., culture, capabilities, regulatory environment) that influence the ISMS's effectiveness. Objectives (option B) are addressed later in Clause 6.2; processes (option C) are addressed in Clause 4.4 and operational planning; and "which clauses apply" (option D) is not a determination step-ISO/IEC 27001's requirements in Clauses 4-10 are not optional. Therefore, the direct, required factor per 4.1 is determining internal (and external) issues relevant to the organization's purpose and ISMS outcomes.

質問 # 51

Which International Standard can be used to implement an integrated management system with ISO/IEC 27001?

- **A. ISO/IEC 27013**
- B. ISO 9001
- C. None of the above
- D. ISO/IEC 27003

正解: A

解説:

ISO/IEC 27013 provides specific guidance on the integration of ISO/IEC 27001 (Information Security Management) and ISO/IEC 20000-1 (IT Service Management). It offers practical advice for organizations seeking a unified management system approach. While ISO/IEC 27003 (A) provides guidance on ISMS implementation, it does not address integration. ISO 9001 (C) is the Quality Management Standard and can be integrated, but the specific standard designed for integrating 27001 with ITSM is ISO/IEC 27013. Therefore, the correct answer is B: ISO/IEC 27013, as it is explicitly published for this purpose.

質問 # 52

Identify the missing word(s) in the following sentence.

When planning the ISMS, the organization is specifically required to plan actions to address risks and opportunities and how to [?] these actions.

- A. improve the effectiveness of
- B. apply competent resources to
- **C. evaluate the effectiveness of**
- D. communicate

正解: C

解説:

Clause 6.1.1 (Planning) states:

"The organization shall plan:

d) actions to address these risks and opportunities; and

e) how to:

* integrate and implement the actions into its ISMS processes; and

* evaluate the effectiveness of these actions."

This confirms the missing words are "evaluate the effectiveness of". Communication (A), applying resources (B), and improving effectiveness (C) are important concepts elsewhere but not the direct requirement stated in this clause.

質問 # 53
