New CCFA-200b Test Sample, Updated CCFA-200b Test Cram

Our company is professional brand established for compiling CCFA-200b exam materials for candidates, and we aim to help you to pass the examination as well as getting the related certification in a more efficient and easier way. Owing to the superior quality and reasonable price of our CCFA-200b Exam Materials, our company has become a top-notch one in the international market. So you can totally depend on our CCFA-200b exam torrents when you are preparing for the exam. If you want to be the next beneficiary, just hurry up to purchase.

CrowdStrike Falcon Administrator Sample Questions (Q102-Q107):

NEW QUESTION # 102

You are deploying the Falcon sensor to a total of 500 hosts. Hosts in an Organizational Unit (OU) will need a specific exclusion that was previously identified. This OU is expected to add members over the next quarter.

What is the best way to create a host group for this OU?

- A. Create a static group with from list of host names in the OU
- **B. Create a dynamic group with an assignment rule that filters for the OU**
- C. Create a static group with from list of all 500 host names.
- D. Create a dynamic group with an assignment rule that excludes the OU

Answer: B

NEW QUESTION # 103

What can exclusions be applied to?

- A. Only the groups selected by the administrator
- B. Only the default host group
- **C. Either all hosts or specified groups**
- D. Individual hosts selected by the administrator

Answer: C

Explanation:

The option that describes what exclusions can be applied to is that exclusions can be applied to either all hosts or specified groups. An exclusion is a rule that defines what files, folders, processes, IP addresses, or domains should be excluded from detection or prevention by the Falcon sensor. You can create and manage exclusions in the Exclusions page in the Falcon console. You can apply exclusions to either all hosts in your environment or to specific host groups that you select. You cannot apply exclusions to individual hosts selected by the administrator.

NEW QUESTION # 104

How can a Falcon Administrator configure a pop-up message to be displayed on a host when the Falcon sensor blocks, kills or quarantines an activity?

- A. By selecting "Enable pop-up messages" from the User configuration page
- **B. By turning on the "Notify End Users" setting at the top of the Prevention policy details configuration page**
- C. By ensuring each user has set the "pop-ups allowed" in their User Profile configuration page
- D. By enabling "Upload quarantined files" in the General Settings configuration page

Answer: B

Explanation:

A Falcon Administrator can configure a pop-up message to be displayed on a host when the Falcon sensor blocks, kills or quarantines an activity by turning on the "Notify End Users" setting at the top of the Prevention policy details configuration page. This setting allows users to enable or disable end user notifications for prevention actions taken by Falcon on Windows hosts. The other options are either incorrect or not related to configuring pop-up messages.

NEW QUESTION # 105

Which of the following would give you information about inactive sensors within the Falcon console?

- A. Sensor Coverage Lookup
- B. Sensor Update Policies
- C. Sensor Downloads
- **D. Sensor Health**

Answer: D

NEW QUESTION # 106

You have been provided with a list of 100 hashes that are not malicious but your company has deemed to be inappropriate for work computers. They have asked you to ensure that they are not allowed to run in your environment. You have chosen to use Falcon to do this. Which is the best way to accomplish this?

- A. Using the Support Portal, create a support ticket and include the list of binary hashes, asking support to create an "Execution Prevention" rule to prevent these processes from running
- B. Using Custom Alerts in the Investigate App, create a new alert using the template "Process Execution" and within that rule, select the option to "Block Execution"
- **C. Using IOC Management, gather the list of SHA256 or MD5 hashes for each binary and then upload them. Set all hashes to "Block" and ensure that the prevention policy these computers are using includes the option for "Custom Blocking" under Execution Blocking**
- D. Using the API, gather the list of SHA256 or MD5 hashes for each binary and then upload them, setting them all to "Never Allow"

Answer: C

Explanation:

The best way to ensure that a list of 100 hashes that are not malicious but your company has deemed to be inappropriate for work computers are not allowed to run in your environment is to use IOC Management, gather the list of SHA256 or MD5 hashes for each binary and then upload them. Set all hashes to "Block" and ensure that the prevention policy these computers are using includes the option for "Custom Blocking" under Execution Blocking. This will allow Falcon to block the execution of these hashes on the hosts using this policy. The other options are either incorrect or not efficient to achieve this goal.

NEW QUESTION # 107

.....

In order to let all people have the opportunity to try our CCFA-200b exam questions, the experts from our company designed the trial version of our CCFA-200b prep guide for all people. If you have any hesitate to buy our products. You can try the trial version from our company before you buy our CCFA-200b Test Practice files. The trial version will provide you with the demo. More importantly, the demo from our company is free for all people. You will have a deep understanding of the CCFA-200b preparation materials from our company by the free demo.
