## VCE Practice Questions with Correct Answers (Complete Solutions 2023)

What are the five sensing terms? Correct Answer Doubtful, Lost, Over, Short, Target D-LOST

What is the maximum number of targets that will be presented to an MMG platform? Correct Answer 2

Which one of the following is not a key component of threat based methodology? Correct Answer Ammunition Type

Which prerequisite should the primary evaluator meet prior to evaluating live fire gunnery? Correct Answer Be a Sergeant or above

Which of the following is not a command of execution? Correct Answer Firing

What is the eighth element in a fire command? Correct Answer Execution

MMG targets will be presented for a maximum of how many seconds in the offense? Correct Answer 50 seconds

When does time start for an offensive engagement? Correct Answer When all target(s) in the initial presentation are fully locked or first round is fired

the firer or Vehicle Commander must announce a sensing before what? Correct Answer Any Subsequent fire command  
Any supplemental fire command  
Terminating the engagement  
ALL OF THE ABOVE

Which is not a determining factor for target prioritization when multiple targets of the same threat level are encountered? Correct Answer Engage Far targets before near targets

All targets must be presented to the firer with a minimum of how much target visibility throughout the engagement? Correct Answer 90%

Initial defilade is provided in the defense for all crews when which of the following conditions are met? Correct Answer The crew is properly positioned in their defensive firing position

All targets are in the presentation are locked  
The crew has not engaged any targets currently presented  
ALL OF THE ABOVE

If you are not sure whether our AB-900 exam braindumps are suitable for you, you can request to use our trial version. Of course, AB-900 learning materials produced several versions of the product to meet the requirements of different users. You can also ask to try more than one version and choose the one that suits you best. And we have three different versions Of our AB-900 Study Guide: the PDF, the Software and the APP online.

## Microsoft AB-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Identify the core features and objects of Microsoft 365 services: This domain covers the main Microsoft 365 objects such as users, groups, licenses, mailboxes, SharePoint sites, and Teams. It also focuses on managing organization settings, roles, authentication, authorization, and core security features using Microsoft Entra and Microsoft Defender.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Understand data protection and governance tasks for Microsoft 365 and Copilot: This domain explains how Microsoft Purview protects and governs organizational data through classification, sensitivity labels, retention, and compliance tools. It also covers how Copilot accesses data, follows permissions, and how administrators monitor risks, alerts, and oversharing.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Perform basic administrative tasks for Copilot and agents: This domain focuses on managing Copilot and agents, including licensing, feature controls, and usage monitoring. It also covers creating agents, managing prompts, configuring user access, and monitoring agent activity through admin centers.</li> </ul>

## Microsoft AB-900 Exam Questions Vce & Exam AB-900 Questions Fee

If you are having the same challenging problem, don't worry; Microsoft is here to help. Our direct and dependable Microsoft Treasury with Microsoft 365 Copilot & Agent Administration Fundamentals Exam Questions in three formats will surely help you pass the Microsoft Treasury with AB-900 certification exam. Because this is a defining moment in your career, do not undervalue the importance of our Treasury with Microsoft 365 Copilot & Agent Administration Fundamentals (AB-900) exam dumps. Profit from the opportunity to get these top-notch exam questions for the AB-900 certification test.

### Microsoft 365 Copilot & Agent Administration Fundamentals Sample Questions (Q64-Q69):

#### NEW QUESTION # 64

Your organization has a Microsoft 365 subscription.

Which two tasks can you perform by using the Exchange admin center? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a mail flow rule.
- B. Add a custom domain.
- C. Assign a Microsoft Exchange license.
- D. Create a shared mailbox.

**Answer: A,D**

Explanation:

The correct answers are A and D because both tasks are supported directly in the Exchange admin center (EAC). Microsoft Learn states that administrators can manage mail flow rules in Exchange Online from the EAC under Mail flow > Rules, which includes creating and managing transport rules for organizational email handling. Microsoft Learn also states that administrators can create shared mailboxes in the EAC under Recipients > Mailboxes, where a shared mailbox can be added and then delegated to users. Option B is incorrect because adding a custom domain is normally done in the Microsoft 365 admin center, specifically on the Domains page. Although Exchange can later work with accepted domains and related mail flow settings, the act of adding and verifying a custom domain is not an Exchange admin center task.

Option C is incorrect because license assignment is handled through Microsoft 365 or Microsoft Entra administrative tools, not the Exchange admin center.

#### NEW QUESTION # 65

A Marketing user requests Copilot to "Summarize the latest budget proposal" stored on a SharePoint site restricted to Finance. The Marketing user is not a site member. Which principle governs Copilot's behavior and prevents it from returning the restricted content?

- A. Copilot applies Zero Trust verification before processing the request
- B. Microsoft Purview DLP automatically redacts financial figures from Copilot responses
- C. Copilot only uses content explicitly tagged with a sensitivity label (Grounding)
- D. Copilot strictly enforces the user's existing Microsoft 365 permissions and will not return content the user cannot access

**Answer: D**

Explanation:

This is the fundamental security principle of Microsoft 365 Copilot, often summarized as Copilot operates within your existing security, compliance, and privacy policies. If the user does not have permission to access a document (the budget proposal) via standard Microsoft 365 access controls (SharePoint permissions), Copilot will not be able to retrieve or include that content in its response. This is a primary security boundary.

**NEW QUESTION # 66**

An administrator must manage SharePoint site access for a sensitive HR site and assign Copilot add-on licenses to the 50 members of the "HR-Data-Users" team. Membership changes frequently due to high turnover. Which Microsoft Entra object is the most efficient choice for both access control and group-based license assignment?

- A. Mail-enabled Security Group
- B. Microsoft 365 Group
- C. Dynamic Security Group
- D. Distribution List

**Answer: C**

Explanation:

A Dynamic Security Group allows the administrator to define a rule (e.g., Department equals 'HR' AND Job Title equals 'Data User') that automatically adds or removes users based on their Microsoft Entra ID properties. This is highly efficient in a high-turnover environment as it removes the need for manual user management for both SharePoint site access and Group-based licensing (which is supported by Security Groups for Copilot add-on license assignment), making it the most appropriate and scalable solution.

**NEW QUESTION # 67**

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE Each correct selection is worth one point

**Answer:**

Explanation:

Statements	Yes	No
A site member of a Microsoft SharePoint site can invite users to access the content in the site.	<input checked="" type="radio"/>	<input type="radio"/>
A site owner of a Microsoft SharePoint site can add Microsoft 365 groups as site members.	<input checked="" type="radio"/>	<input type="radio"/>
A site owner of a Microsoft SharePoint site can remove another site owner from the site.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Statements	Yes	No
A site member of a Microsoft SharePoint site can invite users to access the content in the site.	<input checked="" type="radio"/>	<input type="radio"/>
A site owner of a Microsoft SharePoint site can add Microsoft 365 groups as site members.	<input checked="" type="radio"/>	<input type="radio"/>
A site owner of a Microsoft SharePoint site can remove another site owner from the site.	<input checked="" type="radio"/>	<input type="radio"/>

The correct selections are Yes, Yes, Yes . For statement 1, Microsoft Support explains that if you are not a site owner, you might still be able to invite other people to the site , although the invitation can generate an access request that a site owner approves or declines. Microsoft also states that site users have the opportunity to invite other people to collaborate on sites , unless that feature is disabled. That makes the statement true.

For statement 2, Microsoft Learn states that in SharePoint you can give people permissions to a site by adding individual users, security groups, or Microsoft 365 groups to one of the three SharePoint groups, including the Members group. That directly

supports the statement.

For statement 3, Microsoft documents that site ownership and membership can be managed by adding or removing owners, members, site owners, site members, and site visitors . For group-connected sites, Microsoft also documents that owners can manage group ownership and remove owner status. Therefore, a site owner can remove another site owner, provided at least one owner remains.

### NEW QUESTION # 68

You open the Microsoft Entra admin center as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

**Answer:**

Explanation:

The correct answer is Require multifactor authentication for administrative roles . In the exhibit, each recommendation shows its available Secure Score points . The listed values are 1/1 for Use least privileged administrative roles , 8/8 for Do not expire passwords , 0.73/8 for Enable policy to block legacy authentication , and 0/10 for Require multifactor authentication for administrative roles . Because 10 points is the highest value among the options shown, resolving that recommendation would improve the Identity Secure Score the most.

Microsoft Learn explains that Identity Secure Score in Microsoft Entra is based on Microsoft security recommendations, and each recommendation contributes a specific number of points depending on its impact and implementation state. Recommendations related to administrator protection are especially important because privileged accounts are high-value attack targets. Microsoft also emphasizes multifactor authentication for admin roles as a core identity security best practice. Therefore, both from the screenshot and from Microsoft's identity guidance, the recommendation with the greatest score improvement is Require multifactor authentication for administrative roles .

### NEW QUESTION # 69

.....

Our AB-900 study materials have a high quality which is mainly reflected in the pass rate. Our product can promise a higher pass rate than other study materials. 99% people who have used our AB-900 study materials passed their exam and got their certificate successfully, it is no doubt that it means our AB-900 study materials have a 99% pass rate. So our product will be a very good choice for you. If you are anxious about whether you can pass your exam and get the certificate, we think you need to buy our AB-900 Study Materials as your study tool, our product will lend you a good helping hand. If you are willing to take our AB-900 study materials into more consideration, it must be very easy for you to pass your exam in a short time.
